Professional Summary

Motivated and adaptable Full Stack Developer with 3+ years of experience designing, developing, and maintaining web applications. Skilled in both frontend and backend technologies with a strong focus on clean code, usability, and performance. Experienced in Agile environments, cross-team collaboration, and code reviews. Passionate about problem-solving and always eager to learn new languages and technologies. Ready to contribute to a forward-thinking tech company in the U.S.

Professional Experience

Full Stack Developer

Officecore – Mobile Solutions | 2022 – 2025

- Develop and maintain web applications and services using VB.NET and C#
- Design responsive UIs with HTML, CSS, JavaScript, Telerik, and Bootstrap
- Build and maintain scalable REST APIs
- Participate in code reviews to ensure high-quality, maintainable code
- Collaborate with product and design teams to implement user-centered features
- Writing unit, integration, and acceptance tests for back-end services
- Led the development of an automated contractor billing and reporting system for Comcast, reducing payment errors and saving significant operational costs
- Built a SQL-driven scheduling service and dynamic cost engine with milestone-, task-, and cancellation-based pricing logic, plus real-time reporting tools
- Operate in a fast-paced Agile/Scrum environment with continuous releases
- Document software and maintain internal development resources

Full Stack Developer

Qualitest / Comply – Lab Systems Development | 2020 – 2022

- Developed web applications using Java (Spring), HTML, and CSS
- Resolved bugs, enhanced UI/UX, and designed new features
- Participated in Agile development cycles and SCRUM ceremonies
- Collaborated with project leads across all phases of the SDLC
