

PROFESSIONAL SUMMARY:

- **Experienced Business Analyst** with over 9+ years of expertise in healthcare, and payer systems, specializing in EDI, HL7/FHIR, Salesforce CRM, and QNXT integrations.
- Proven ability to **gather, analyze, and document business and system requirements** across multiple healthcare projects involving HIPAA compliance, CMS regulations, and EMR systems.
- Strong understanding of **HIPAA EDI transactions (837, 835, 270/271, 278)** and experience validating claims processing systems for Medicare, Medicaid, and commercial payers.
- Hands-on experience with **FHIR APIs** for clinical data integration and interoperability between internal systems and external providers using HL7 v2/v3 and Fast Healthcare Interoperability Resources.
- In-depth knowledge of **QNXT platform modules** (Eligibility, Claims, Authorizations, Enrollment) and hands-on experience in mapping and testing payer data integrations.
- Skilled in implementing **Salesforce Health Cloud and Service Cloud** for managing patient journeys, provider networks, and automated workflows to streamline care coordination.
- Proficient in **ICD-9 to ICD-10 conversions** using CMS General Equivalence Mappings (GEMs) and supporting regulatory transitions like 4010 to 5010 EDI upgrades.
- Strong background in **data modeling (Logical & Physical)** using Erwin and designing system workflows and business process diagrams with MS Visio and Lucidchart.
- Experienced in **Agile methodologies** including backlog grooming, sprint planning, user story creation, and participating in daily standups and retrospectives.
- Expertise in creating **BRDs, FRDs, User Stories, Use Cases**, and maintaining traceability through Requirement Traceability Matrices (RTMs).
- Delivered **UAT coordination and test planning** across multiple phases of system implementations, including writing and reviewing test scripts and scenarios.
- Conducted **JAD and JRP sessions** to align technical teams, QA, and business users on project scope, system changes, and delivery timelines.
- Skilled in **data validation and SQL querying** for data analysis, report generation, and ensuring data accuracy across migration and integration efforts.
- Strong grasp of **ETL workflows** and reconciled disparate data across systems, ensuring master data integrity and compliance.
- Familiar with **project tracking tools** like JIRA, Confluence, Microsoft Project (MPP), and Azure DevOps for task management and documentation.
- Collaborated closely with PMs to evaluate **change requests, risks, and dependencies**, and provided impact assessments and executive reporting.
- Adept at building and presenting **status reports, dashboards, and KPIs** to stakeholders and leadership, ensuring transparency and accountability.
- A detail-oriented, communicative, and collaborative professional with a consistent track record of **delivering complex healthcare and insurance solutions** on time and in compliance with regulatory standards.

TECHNICAL SKILLS:

Business Analysis: JAD/JRP sessions, GAP Analysis, Use Cases, User Stories, BRD/FRD

Modeling & Prototyping: MS Visio, Lucid chart, Balsamiq, Erwin Data Modeler

Project & Documentation: JIRA, Confluence, Microsoft Project (MPP), Azure DevOps

ETL/Data Integration: SQL, XML, Data Mapping, Crosswalks, RTM

Testing & QA: UAT Planning, Test Case Design, Test Scripts, Quality Center

Reporting & Analytics: Advanced Excel, Dashboards, KPIs, Tableau

Methodologies & Frameworks: Agile, Waterfall, Hybrid SDLC, Sprint Planning, Backlog Grooming, Retrospectives, Change Management, Risk Assessment, PMO Collaboration

Healthcare Standards & Regulatory Compliance: HIPAA (5010, ICD-9/ICD-10), CMS Guidelines & Regulations, HL7 v2/v3, FHIR APIs, HIPAA X12 EDI Transactions: 837 (P/I/D), 835, 270/271, 276/277, 278

CRM & Healthcare Platforms: Salesforce Health Cloud / Service Cloud, Microsoft Dynamics CRM, Epic, Cerner, Facets, NASCO

PROFESSIONAL EXPERIENCE:

Valley Health, Winchester, VA

07/2024 – Present

Sr. Business Analyst

- Gathered and analyzed high-level business requirements for multiple external projects during each release cycle to ensure alignment with organizational goals.
- Led gap analysis and elicited user requirements through interviews, JAD sessions, and stakeholder meetings to define functional and non-functional needs.
- Supported the development of SOA-based architecture and data warehouse solutions to enable efficient data mining and enterprise analytics.
- Managed full lifecycle of HIPAA-compliant EDI transactions, including validation with Medicare, Medicaid, and commercial payers.
- Designed and implemented HIPAA 5010 and ICD-10 conversions, including mapping documents and crosswalks between code sets.
- Developed and executed EDI testing frameworks, documentation standards, and performance metrics for both internal and external data exchanges.
- Worked extensively with HL7 v2 and v3 standards to support healthcare system interoperability and clinical data integration.
- Integrated and validated FHIR APIs to support real-time access and exchange of patient data in alignment with HL7 and ONC standards.
- Collaborated with technical teams to implement QNXT modules, including Eligibility, Claims, and Authorizations, ensuring proper data integration and process automation.
- Developed and executed QNXT data mapping and validation strategies, ensuring compliance and accuracy in payer-side operations.
- Gathered CRM requirements and implemented Salesforce Health Cloud to manage patient engagement, provider networks, and care coordination.
- Configured Salesforce automation (Workflows, Reports, Dashboards) and led data migration activities from legacy CRM systems.
- Worked closely with marketing and business teams to align CRM (Salesforce and Microsoft Dynamics) features with strategic goals.
- Performed ETL operations and reconciled master data across multiple systems, ensuring high data quality and consistency.
- Created Logical and Physical Data Models using Erwin, reflecting current and target state architectures for data-driven solutions.
- Reviewed payer companion guides and maintained payer compliance documentation, ensuring HIPAA EDI and FHIR standards were met.
- Designed wireframes and UI prototypes using Balsamiq, facilitating effective communication between business users and development teams.
- Used Confluence and JIRA to manage project documentation and requirements, enabling cross-functional collaboration and traceability.
- Documented and translated business needs into BRDs and Functional Specifications, coordinating with development and QA teams.

- Created UAT test plans and supported quality assurance activities, ensuring deliverables met acceptance criteria and regulatory compliance.
- Worked with CMS and HIPAA regulations, ensuring that all system implementations met healthcare compliance and reporting standards.

Colonial Life & Accident Insurance, Columbia, SC

01/2023 – 06/2024

Business Analyst

- Gathered and analyzed business requirements from cross-functional teams to define functional workflows and system interactions.
- Designed **Impact Analysis Documents (IADs)** for financial modules including GL-AP, GL-AR Summary, and reconciliation reports to support business reporting needs.
- Conducted side-by-side comparisons for migration from **EDI 4010 to 5010**, specifically for 270 (Eligibility), 278 (Prior Authorization), and other core X12 transactions.
- Validated **EDI 837 (Professional, Institutional, Dental)** and **835 (Remittance Advice)** claim adjudication logic and formats against payer requirements.
- Participated in **JAD sessions, stakeholder interviews**, and requirement review sessions to capture and refine business needs.
- Created **Use Cases, User Stories, and UML diagrams** using Microsoft Visio and Architect Enterprise to communicate functional requirements.
- Developed **current and future-state workflows** for Ambulatory Practices using Visio to visualize business transformation.
- Estimated business analysis efforts and resource needs across project phases, aiding in budget and timeline planning.
- Managed **Product Backlogs and Sprint Backlogs** in Agile projects, and facilitated Sprint Planning and Review meetings with business and technical teams.
- Authored **Change Requests** and coordinated impact assessments with impacted teams for resolution and implementation.
- Reviewed and validated **Requirement Traceability Matrices (RTMs)** and **Test Cases** in collaboration with QA teams.
- Maintained project timelines and tracked status using **Microsoft Project (MPP)**; represented the BA team in **PMO meetings** and executive updates.
- Designed and executed **test scenarios and cases** for validating EDI 4010 to 5010 transitions, enrollment processing, and real-time transactions like 270/271 and 276/277.
- Performed forward and backward mapping between **ICD-9 and ICD-10** using CMS General Equivalence Mappings (GEMs).
- Participated in **Customer UAT sessions** alongside development and testing teams to validate solution accuracy and usability.
- Attended and contributed to walkthroughs, peer reviews, and stakeholder meetings involving PMs, QA leads, and developers.
- Supported the Project Manager by assessing **change requests, evaluating risk**, and conducting project-related presentations.
- Collaborated with technical teams to **integrate QNXT platform modules** (claims, eligibility, member enrollment) with EDI transaction systems.
- **Validated Salesforce CRM integration** with eligibility and prior auth systems; assisted in mapping business needs to Salesforce capabilities.
- Participated in **FHIR API implementation** and validation for patient data retrieval, enhancing interoperability between internal systems and external health data sources.
- Worked cross-functionally to ensure compliance with **HIPAA, CMS regulations**, and payer-specific requirements across all system enhancements.

Business Analyst

- Gather requirements and document the proposed processes to the existing system. Modules included: Claims Processing Files and HIPAA Guidelines adherence across the company.
- Enhanced applications associated with Claim Numbers so that duplicate Claim Numbers could be allowed in the system. Updated the Electronic Claims, Patient Screen and Sales Administration processes.
- Understand and analyze, design, and write functional requirements for new software products.
- Responsible for architecting integrated HIPAA, Medicare solutions, Facets.
- Worked on as is-To be system and performed Gap Analysis.
- Developed UML diagrams like flow chart, activity Diagram, Use Cases.
- Claim Transactions and Billing Transactions – Created flows for adequate matching of Claims. Matched Billing File and EDI Claim File records upon receipt.
- Duplicate Claim Number Project – Enhanced three different applications – EDI Feeds and Patient Screen App to allow duplicate claim numbers to exist in the database.
- Drug Card Project – Worked in a project involving Miami Systems to create Drug Cards.
- Created Test File to be sent to the Drug Card Vendors for approval. Worked on a Paid without prejudice project for various States.
- Knowledge of FHIR protocols and experience supporting EHR/EMR system implementations (Epic, Cerner).
- Created process flow diagrams and system architecture visuals in Lucidchart to support requirement discussions.
- Skilled in advanced Excel functions for data analysis, reporting, and dashboard creation.
- Testing - Developed Test Scripts using Test Director/Quality Center and coordinated with developers to quickly resolve the defects associated with them.
- Conducted JRP sessions and JAD sessions with the management, users and other stakeholders for open and pending issues to develop specifications.
- Analyzed and evaluated User Interface Designs, Technical Design Documents and Quality Assurance Test Conditions the performance of the application from various dimensions.
- Helped create the 'Business Glossary' to facilitate efficient understanding of the business process amongst the other teams.

Shields Health Solutions, Stoughton, MA**01/2019 – 08/2021****Business Analyst**

- Played pivotal role in eliciting requirements and updated Scope, BRD and FRD.
- Conducted the gap analysis for 4010 to 5010 HIPAA EDI Transactions.
- Managed requirements using Rational RequisitePro.
- Worked with Agile-Scrum Master to translate HIPAA requirements for HIPAAHL7 Conversion project created Interface specification during requirement sprints and update Cross-X Walk documents.
- Experience in negotiating conflicting QNXT requirements during change control process while Implementing Medicare (Part D) Claims.
- Worked with various types of member correspondence for capturing FACETS-IVRS and Provider portal projects.
- Documented current business processes, business flows, rules and artifacts, and propose "To-Be/Future" business processes Medicaid and Medicare Pharmacy benefit project.
- Facilitated JAD session for altering custom HIPAA -EDI270/271(Benefit and Eligibility Inquire/Response) & 837 EDI process flows.
- Supported business process modeling with clear visual artifacts to aid development teams.
- Utilized MS Word and Outlook extensively for documentation and communication
- Translated the Functional Requirements into use cases and use case diagrams.
- Worked with Architect, SME and Developer to enhance "AS-IS" the process diagram using MS Visio.

- Updated Requirement Traceability matrix and worked with Developer to bring in Change control PVRC Tracker for deployed code. Effectively managed version and change control during the migration from NASCO to FACETS.
- Facilitated weekly status meeting and created weekly status reports on progress of key team efforts.

Omega Healthcare, Boca Raton, FL

06/2016 – 12/2018

Business Analyst

- Gathered business requirements from the Business team.
- Designed and developed Use Cases and UML models using Microsoft Visio.
- Writing change requests & follow up with the respective teams on the impact and action.
- Reviewing the test cases and requirement traceability matrix along with the testing team.
- Tracked the project status in MPP, prepared the project status reports and represented the BA team in the PMO meetings.
- Wrote and executed basic SQL queries for data validation and verification in support of business requirements
- Involved in Customer UAT along with the Development & testing teams.
- Participated regularly in walkthroughs and review meetings with PM, QA Lead and development teams.
- Assisted the PM in setting up realistic expectations and in evaluating the impact of change requests and risks and conducted project related presentations.
