Executive Summary:

Over 3 years as an SAP BI Consultant with Accenture Solutions Private Limited. Part of the SAP BI team handling end-to-end ETL processes, data modeling, process chains, job scheduling, and report development using SAP BW and SAP BO. Experienced in creating and maintaining AFO and Web Intelligence (WEBI) reports using BEx queries, troubleshooting issues, and ensuring smooth report delivery for business users.

Technical Skills

SAP Platforms:

SAP NetWeaver, SAP ERP (ECC), SAP BW 7.5, SAP BusinessObjects BI Platform 4.2

Reporting & Analytics:

BEx Queries, Analysis for Office (AFO), Web Intelligence (WEBI), Report Development & Scheduling

ETL & Data Modeling:

Data Extraction, Transformation & Loading (ETL), InfoObjects, DSOs, InfoCubes, CompositeProviders

Ticketing & Issue Management:

ServiceNow - Incident, Problem, and Request Handling

Job Scheduling & Monitoring:

SAP Process Chains, Data Load Monitoring, Performance Tuning

Version Control & Deployment:

Transport Requests (TRs), Promotion Management in BO

Client : Financial Management Information - Post Office Pvt Limited, UK

Duration : June 2021 - May 2023

Role : SAP BW Consultant

Employer : Accenture Solutions Pvt Limited

Environment : ERP, ECC, SAP BW 7.5, SAP BO 4.2, Bex Analyzer, Flat files

Description :

The project involved end-to-end support and enhancement of the SAP BW/BI reporting landscape for the Post Office's Financial Management Information (FMI) systems. The objective was to ensure accurate, timely, and insightful financial and operational reporting to assist leadership in making informed decisions. Key responsibilities included ETL process optimization, data modeling, report development, and production support for various business units across the UK.

Key Responsibilities:

- Modeled and developed SAP BW objects including InfoObjects, DataStore Objects (DSOs), and data models for integrating SAP and non-SAP systems.
- Managed ETL processes, including data extraction, transformation, and loading, ensuring accuracy and optimal performance.
- Uploaded data from flat files into the BI system and scheduled production data loads.
- Performed data compression on InfoCube requests and managed data transfers from F fact tables to E fact tables.
- Created semantic partitions in Development and transported them to Quality and Production systems via transport requests (TRs).
- Monitored SAP BW system health, identifying and resolving issues related to data loading, query execution, and report performance.
- Developed multiple AFO and Web Intelligence (WEBI) reports using BEx queries in SAP BusinessObjects BI Platform 4.2.
- Scheduled and rescheduled AFO and WEBI reports to meet business requirements and ensure timely data delivery.
- Resolved user-reported issues in AFO and WEBI reports through ServiceNow, handling tickets efficiently and providing tailored solutions.

Client: Safran Group

Duration: March 2020 - April 2021

Role: Application Development Associate

Employer: Safran India Private Limited

Environmet: ECC, SAP BW 7.5, ERP, SAP BO 4.2, WEBI, ServiceNow, Flat Files

Description :

Safran is an international high-technology group, operating in the aviation (propulsion, equipment and interiors), defense and space markets. Its core purpose is to contribute to a safer, more sustainable world, where air transport is more environmentally friendly, comfortable and accessible. Safran has a global presence, with 92,000 employees and sales of 23.2 billion euros in 2023, and holds, alone or in partnership, world or regional leadership positions in its core markets. Safran undertakes research and development programs to maintain the environmental priorities of its R&T and innovation roadmap.

Key Responsibilities:

- Developed and maintained SAP BW data models including InfoObjects, InfoCubes, DataStore Objects (DSOs), MultiProviders, and CompositeProviders.
- Designed ETL processes using SAP Data Services for data extraction, transformation, and loading from ECC, S4HANA, and external systems.

- Created SAP BO reports using Web Intelligence, Crystal Reports, and Dashboards for business users.
- Configured and maintained universes in SAP BO to enable ad-hoc reporting.
- Worked on performance tuning of BW queries and BO reports to improve load and runtime efficiency.
- Handled data extraction from multiple source systems and ensured data quality and consistency in BW.
- Managed transport requests for BI objects across development, quality, and production systems.
- Scheduled and monitored ETL jobs, reports, and alerts to ensure SLA adherence.
- Provided end-user support for BI queries, report customizations, and troubleshooting issues.
- Collaborated with functional teams to gather reporting requirements and translate them into technical specifications.
- Monitored system performance including query execution times, database loads, and memory usage in BW and BO environments.
