

NAGA SRINU SAMANA

Data Analytics and Azure Data Engineering professional

✉ nagasrinusamana0505@gmail.com ☎ (314) 269-6146 📍 Saint Louis

PROFESSIONAL SUMMARY

Results-driven Data Analytics and Azure Data Engineering professional with strong expertise in AI/ML security research. Experienced in designing and implementing end-to-end data pipelines, developing large-scale data analysis solutions, and conducting adversarial prompt detection for Large Language Models (LLMs). Skilled in translating complex data insights into actionable strategies, ensuring model safety, and driving business and research initiatives.

PROFESSIONAL EXPERIENCE

- Data Analysis and Visualization Intern**, *Excelerate, GlobalShala*

03/2024 – 04/2024

 - Executed data cleaning operations, improving overall dataset quality.
 - Developed efficient SQL queries and stored procedures to automate routine tasks, serving as team lead for the project.
- Project Management Intern**, *Excelerate, GlobalShala*

07/2023 – 08/2023

 - Developed a comprehensive project plan to execute a global event, including project breakdown structure, cost estimates, risk register, and RACI matrix.
 - Led global team collaboration using online project management tools to streamline task execution.
- Program Analyst**, *Cognizant Technology Solutions*

09/2021 – 05/2023
Hyderabad, IN

 - Designed custom Formula Fields, Validation Rules, Field Dependencies, Workflows, Approval Processes, Page Layouts, and Search Layouts.
 - Developed business logic using Apex programming and Visualforce. Implemented security and sharing rules at the object level.
 - Optimized Salesforce applications to enhance operational efficiency and data accuracy.
- Junior Analyst Intern**, *Drive Dock Private Ltd (Startup)*

08/2019 – 08/2021
Bhimavaram, India

 - Collected and compiled data to analyze past trends and current market scenarios.
 - Applied statistical techniques to generate actionable insights and create comprehensive reports.

EDUCATION

- Master of Science in Analytics**, *Saint Louis University - Saint Louis, MO*

01/2024 – Present

 - Graduate-level coursework: Foundations of Analytics, Applied Analytics Methods I & II, Survey Analytics & Methods, Information Retrieval, Advanced Analytics, Project Management Principles, Ethical Evidence-Based Decision Making, Contemporary Issues in Analytics, Visualization & Feedback, Cloud Security
- Bachelor of Technology, Electrical & Electronics Engineering**,
SRKR Engineering College Bhimavaram

07/2017 – 05/2021

CGPA: 7.9

TECHNICAL SKILLS

Programming & Analytics

Python, SQL, R, pandas, NumPy, scikit-learn, TensorFlow.

AI & Machine Learning

Adversarial Prompt Detection, Model Security & Vulnerability Analysis.

Other Tools & Platforms

Salesforce Administration & Development, Microsoft Office Suite.

Data Engineering (Azure)

Azure Data Factory, Azure Synapse Analytics, Azure Databricks, Azure Data Lake, Power BI, ETL Pipelines, Delta Lake, Azure Blob Storage.

Visualization Tools

Power BI, Tableau, Matplotlib, Seaborn.

Soft Skills

Communication, Critical Thinking, Problem Solving, Teamwork, Time Management, Project Management.

PROJECTS

Social Media Data Analysis

- Analyzed a dataset of 300,000+ rows with 0 features to explore social media usage, entertainment habits, and lifestyle metrics.
- Conducted segmentation by age, gender, and country to identify platform preferences, content engagement trends, and spending behaviors.
- Implemented Python (pandas, NumPy, Seaborn, Matplotlib) to visualize correlations between screen time, sleep quality, physical activity, and digital fatigue.

Adversarial Prompt Detection Classifier

- Built a classifier for detecting adversarial prompts targeting LLMs using transformer embeddings and machine learning classifiers.
- Processed and cleaned dataset, trained models, and evaluated using precision, recall, and F1- score.
- Applied findings to enhance model safety and resilience in practical AI applications.

CERTIFICATIONS

Python Programming, Project Management, Google Analytics for Beginners, Data Visualization, Salesforce Administration, Salesforce Developer I

RESEARCH EXPERIENCE

Independent AI / LLM Security Research Adversarial Prompt Detection

- Developed an Adversarial Prompt Detection Classifier to identify and mitigate malicious or jailbreak-style prompts targeting Large Language Models (LLMs).
- Conducted data preprocessing, feature extraction, model training, and evaluation using accuracy, F1-score, and confusion matrices.
- Enhanced LLM safety and robustness by classifying prompts as benign or adversarial and generating actionable insights for secure deployment.
