

Nagapriyatham Pindi | Data Analyst

MA, USA | +1 (857) 267-6274 | nagapriyathampindi@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with near 4 years of experience in healthcare and financial domains, specializing in SQL, Python, Snowflake, and cloud-based analytics. Skilled at collecting, cleaning, and structuring data from multiple internal and external sources, including claims, EHR systems, and financial platforms. Proven ability to design scalable ETL pipelines, build interactive dashboards (Tableau, Power BI, Excel), and generate insights that reduce reporting errors by up to 35% and accelerate decision-making. Adept at ensuring HIPAA-compliant data handling, solving complex data quality issues, and collaborating with cross-functional stakeholders to deliver measurable business outcomes. Experienced in leveraging predictive modeling and forecasting techniques to enhance clinical and financial decision support.

TECHNICAL SKILLS

Programming & Scripting: Python (Pandas, NumPy), SQL (T-SQL, PL/SQL, PostgreSQL, MySQL)

Data Engineering & ETL: ETL pipeline design, Data ingestion & transformation, Azure Data Factory, Databricks, PySpark, Alteryx, Talend

Data Warehousing & Databases: Snowflake, Amazon Redshift, MS SQL Server, Cloud-based Data Warehouses

Data Visualization & Reporting: Tableau, Power BI, Excel (Pivot Tables, Power Query, VBA)

Big Data & Cloud Platforms: Microsoft Azure (ADF, Databricks, Synapse), AWS (S3, Glue, Redshift)

Data Quality & Governance: Data validation, Reconciliation, Cleaning & Profiling, Metadata Documentation, Lineage Tracking

Healthcare Data Expertise: Claims data (medical & pharmacy), Clinical/EHR data, Provider performance, Utilization metrics

Financial Data Expertise: Capital markets datasets, Retail banking data, Risk analysis, Regulatory reporting

Compliance & Standards: HIPAA, SOX, Data Governance, Finance Regulatory Compliance

EXPERIENCE

Data Analyst
Humana | USA

Dec 2024 - Present

- Collected, cleaned, and validated 20M+ monthly records from claims systems, EHR feeds, and external providers, improving downstream reporting accuracy by 30%.
- Designed SQL queries and automated Python scripts to detect and resolve recurring data issues, saving 25+ hours per month in manual reconciliation.
- Built Tableau and Excel dashboards tracking patient outcomes, cost utilization, and care gaps, enabling 100+ clinicians and executives to make faster data-driven decisions.
- Applied statistical and predictive models (regression, forecasting) on claims and utilization datasets to identify high-cost patient cohorts and predict care gaps, leading to ~12% cost reduction through earlier interventions.
- Partnered with cross-functional teams to deliver analytical reports that reduced care gap closure time by 15% while aligning insights with clinical and business priorities.
- Leveraged Snowflake to centralize claims and health data, cutting query latency by 40% and ensuring HIPAA-compliant, audit-ready data workflows.

Data Analyst
CitiusTech | India

Jun 2021 - Sep 2023

- Processed and validated 15M+ healthcare claims and clinical records across multiple data sources, ensuring 99.5% accuracy in datasets delivered to compliance and business teams.
- Built Power BI dashboards highlighting provider performance, utilization patterns, and patient outcomes, adopted by 50+ stakeholders across client projects.
- Improved data pipeline efficiency by 20% through optimized SQL queries and automated quality checks.
- Partnered with client-facing teams to define reporting requirements and delivered datasets that supported regulatory submissions and high-value programs.
- Authored process documentation and established reproducible workflows aligned with HIPAA and internal governance standards.

Data Analyst Intern
Hexaware Technologies | India

Dec 2020 - May 2021

- Assisted in building ETL workflows with Azure Data Factory, Databricks, and SQL to ingest trading and retail banking data from 5+ sources.
- Supported financial data modeling and reconciliation processes, ensuring compliance with Basel III and SOX reporting standards.
- Validated datasets powering capital markets dashboards, improving reporting accuracy by 20%.
- Prepared datasets for regulatory risk analysis and collaborated with finance teams to align reporting with compliance objectives.

EDUCATION

Masters in Information Systems

Northeastern University Boston, MA, USA

May 2025

Bachelors in Computer Science

JNTUH, Hyderabad, India

May 2022
