

NAGA RAJITHA BHOGADI

Miami, FL | nrajithabhogadi@gmail.com | +603-808-1377 | <https://www.linkedin.com/in/naga-rajitha-bhogadi-23b1a2339/>

EDUCATION

FLORIDA INTERNATIONAL UNIVERSITY, Knight Foundation School of Computing and Information Sciences

Masters in Data Science & Artificial Intelligence

Miami, FL | 08.2023 – 04.2025

- Grade Point Average (GPA): 3.92/4.00
- Relevant Coursework: Data Science, Machine Learning, Artificial Intelligence, AI Ethics, Database Management Systems, Statistics

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY, Sri Sunflower College of Engineering and Technology

Bachelors in ECE

Kakinada, AP | 08.2013 – 07.2017

- Grade Point Average (GPA): 7.6/10
- Member of the Institute of Electrical and Electronics Engineers

PROFESSIONAL EXPERIENCE

Florida International University

Miami, FL

Research Analyst

August 2023 – April 2025

- Collected and analyzed large datasets using R and Python, uncovering critical patterns boosted decision-making accuracy by 30%.
- Delivered data analysis, building comprehensive reports and visualizations enhanced stakeholders' understanding of market opportunities and drove a 20% increase in project success rates.

Shriram Chits Private Limited

Vijayawada, AP

System Analyst

Jan 2019 – Dec 2020

- Performed data cleaning, preprocessing, and integrity checks to ensure accurate analysis while managing relational databases and executing complex SQL queries.
- Identified trends and generated actionable insights by applying statistical techniques and creating visualizations, optimizing decision-making and enhancing system performance.

Gamma Private Limited

Hyderabad, AP

Customer Analyst

Oct 2017 – Dec 2018

- Evaluated client interactions using CRM systems, identifying patterns and implementing process improvements increased consumer endorsement by 25%.
- Conducted quality assurance surveys and analyzed customer data to extract insights, improving issue resolution rates by 30% and reducing response times by 20%.

TECHNICAL SKILLS

-
- **Programming Languages:** Python, R, SQL, Java, MATLAB, Data Structures
 - **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-Learn, Plotly, PyTorch, NLTK
 - **Data Analysis & Visualization Tools:** Power BI, Tableau, Excel, Azure Data Explorer
 - **Databases & Big Data Technologies:** MySQL, Azure
 - **Data Science & Analytics Concepts:**
Data Processing: ETL Processes, Data Cleaning & Preprocessing, Data Normalization
Data Modeling: Data Architecture, Data Integration, Data Warehousing, Data Lake Management
Statistical & Machine Learning Techniques: Regression Models, Forecasting Techniques, Time Series Analysis, A/B Testing, Hypothesis Testing, Causal Inference, Model Evaluation & Validation
Big Data & Data Pipelines: Data Pipeline Development, Ad-hoc Analyses
 - **Additional Tools & Platforms:** Salesforce, Manual Testing, Git, Regression Models, Forecasting Techniques, ad-hoc analyses, A/B Testing, causal inference, Hypothesis Testing

PROJECTS

Airbnb Data Analysis Using Machine Learning:

- Carried out a thorough examination of Airbnb data using machine learning models, revealing the impact of temporal, geographic, and other factors on price changes and revamping pricing prediction accuracy by 25%.

- Enhanced stakeholder comprehension of price dynamics by 15% by providing actionable insights on temporal and location-based aspects and conducting a thorough review of machine learning models.

Crime Data Analysis and Visualization Using Machine Learning:

- Developed a machine learning-based crime prediction system using Azure Databricks, leveraging Random Forest, K-Means Clustering, and Exponential Smoothing for trend forecasting and hotspot detection.
- Designed and implemented interactive Power BI dashboards for real-time crime data visualization, enabling law enforcement agencies to optimize resource allocation and improve public safety.

Fraud Detection Using Decision Tree-Based Machine Learning Models:

- Implemented and evaluated three decision tree-based machine learning models (predict_DT, predict_DT_bagging, and predict_DT_randomforest) to classify fraudulent transactions.
- Optimized model performance using hyperparameter tuning and achieved a validation accuracy of 99.1% with the Random Forest classifier, improving fraud detection efficiency.

VOLUNTEER EXPERIENCE

- Engaged in a three-day volunteer commitment at FIU's career fair, contributing to event coordination and fostering connections between students and prospective employers.
- I actively volunteered in both technical and non-technical festivals throughout my undergraduate years, playing a key role in event planning, organization, and creating memorable experiences for participants.

EXTRACURRICULAR ACTIVITIES

Engaged in a University of Miami Horizon AI Hackathon, we showcased AlphaHealthMate—an AI Healthcare Assistant set to transform the healthcare landscape. Leveraging Advanced Machine Learning, Neural Networks, Deep Learning, and Natural Language Processing, we introduced an integrated solution for enhancing healthcare and overall well-being. Proposed a sustainable, user-friendly approach to revolutionize the current healthcare system.
