

VENKATA NAGA VINEEL KODI

Full Stack Developer

venkatanagavineel.k28@gmail.com | +1 (414) 406-8898

PROFESSIONAL SUMMARY:

To seek a challenging position as a software professional with **7+** years of software development experience, innovation, dedication that enable me to continue to work in a fast-paced environment, leveraging my current knowledge and fostering creativity with many learning opportunities.

- Proficient in crafting and implementing various application features, notably CRUD functionalities, utilizing JavaScript frameworks and libraries such as AngularJS, ReactJS, NodeJS, adhering to ES6 Specifications.
- Demonstrated mastery of modern web architecture through the adept utilization of advanced frameworks including Angular 17, React JS, Redux, Typescript.
- Expertise in architecting and leading the development of a web application based on Micro frontend architecture using Angular 17, Typescript, webpack module federation.
- Skilled in integrating automation into application development practices, ensuring streamlined processes.
- Skilled in writing unit test cases using Jasmine, Karma, Mocha.
- Experienced in utilizing NgRx framework to build reactive applications in Angular, inspired by Redux pattern, ideal for managing complex states and extensive user interactions.
- Experience in design and development of web-based applications using Java, JDBC, JPA, SQL, Servlets, Hibernate, JSP, XML, Java-API, Spring Microservices, RESTful Web Services and Spring.
- Worked with ORM tool Hibernate involving Connection pooling, Mappings, Transaction Management.
- Experience in implementing SOA (Service Oriented Architecture) using Web Services (SOAP, WSDL, Restful) and REST Services.
- Used Maven scripts for building and deploying the application in web/App servers.
- Familiar in deploying applications through Web sphere.
- Expertise in Web API, SQL, MySQL, PostgreSQL.
- Hands on experience in Front-End technologies like Angular, Bootstrap 3.1, HTML5, JavaScript, CSS3, jQuery, Google Web Toolkit (GWT), Tag Libraries, Custom Tags, Ajax and Node JS and Next JS.
- Sound understanding and good knowledge on ES6, React JS, Backbone JS.
- Managed AWS DevOps services like EC2, S3 Buckets, Lambda, Dynamo DB, Elastic search, Virtual Private Cloud (VPC) through AWS Console and API Integration.
- Experienced in developing web-based applications using Java/J2EE, Servlets, Struts (Struts, Tag Libraries and Struts custom validation rules, Tiles), Spring IOC, Spring MVC, Spring AOP, Spring Security, Spring Boot, Spring Web Flow, Spring Data, JDBC, Spring Data Rest, Spring Data JPA, Web Services (SOAP & Restful services) and ORM frameworks like Hibernate.

EDUCATION:

- Master's in ITM from University of Wisconsin-Milwaukee, USA Jan 2023 – Jun 2024
- Bachelors in ECE from KSRM College of Engineering, India Oct 2013 – Apr 2017

VENKATA NAGA VINEEL KODI

Full Stack Developer

venkatanagavineel.k28@gmail.com | +1 (414) 406-8898

TECHNICAL STACK:

Languages	Java, JavaScript (ES6+), Typescript, SQL, PL/SQL
Frameworks & Libraries	Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Angular, AngularJS, React.js, Redux, NgRx, Next.js, Node.js, Express.js
Architecture	Microservices, Micro-frontend (Webpack Module Federation), Event-driven (Kafka, RabbitMQ, JMS)
XML Technologies	XML, XSL, WSDL, SOAP
Web Technologies	HTML5, CSS3, SCSS, JSON, jQuery, Ajax, Bootstrap, Webpack, AJAX
Cloud Platforms	AWS (EC2, S3, Lambda, DynamoDB, VPC, CloudWatch, API Gateway, IAM), Azure Cloud (AKS, Migration)
Databases	PostgreSQL, MySQL, MongoDB, Neo4j
Servers	Apache Tomcat, IIS, IBM Web sphere
DevOps & CI/CD	Docker, Kubernetes, Jenkins, Maven, Gradle, Terraform, Ansible, Git (GitHub, GitLab, SVN, TFS)
IDE Tools	VS Code, STS, IntelliJ, Web Storm, Sublime Text.
Web Services	Express.js, SOAP, RESTful, UDDI, WSDL, JAX-RS, JAX-WS, JAX-B.
Testing Tools	JUnit, Mockito, Jasmine, Karma, Postman, Swagger
Authentication Authorization	JWT, Keycloak, Auth0
Methodologies	Agile Scrum

WORK EXPERIENCE:

Client: Cigna, TN

Nov 2024 – Present

Role: Full-Stack Developer

Roles & Responsibilities:

- Worked as Full stack web developer and lead front-end web development team in developing an angular application using Angular, Webpack Module Federation, SASS, HTML5, Spring Boot, Key cloak, PostgreSQL, Docker in Agile/Scrum based project.
- Worked on implementing micro frontend architecture utilizing Angular, Webpack, HTML5, SASS, and cross-app authentication using JWT to communicate with backend REST APIs.
- Worked as a full stack developer developing Angular application and micro services using Angular, Webpack, HTML5, GCP, Spring Boot, PostgreSQL.
- Expertise on Java/J2EE technologies (Core Java, JEE, Java Script, HTML/HTML5, JSP, Spring, Web Service), XML and SQL.
- Implemented inter-service communication using RESTful APIs, message queues (Apache Kafka), or event-driven architectures (e.g., Apache Kafka, AWS SNS/SQS).
- Utilized MongoDB to implement database interactions, performing CRUD operations and complex queries to store and retrieve data.
- Utilized AWS CloudWatch using functions & triggers to analyse log data from AWS services for troubleshooting and debugging of applications and infrastructure components.
- Developed AWS Lambda functions using Java to implement serverless and event-driven architecture to handle specific business logic and tasks, such as data processing, file handling, or API integrations.

VENKATA NAGA VINEEL KODI

Full Stack Developer

venkatanagavineel.k28@gmail.com | +1 (414) 406-8898

- Worked in developing application based on Object Oriented Programming (OOPS) concepts, Java and web-technologies including Core Java, Collections, JDBC & Connection pooling, Spring Core, DI, MVC, Spring Boot, Micro Services, Hibernate, J2EE, JPA, XML, XSD, JSON, Maven, Log4j, JUnit, SOAP and RESTful Web services, PL/SQL, JDBC, and IBM WebSphere.
- Experience working in Agile/Scrum environment.
- Experience in developing persistence layer with Hibernate (OR Mapping) framework and JPA with good performance optimization techniques.
- Experience in various design patterns MVC (Model-View-Controller), Singleton, Factory, DAO, and DTO in the development of multi-Tier distributed Enterprise Applications.
- Good understanding of most used Java and J2EE Design Patterns.
- Experience working on Microservice design patterns.
- Created and maintained Docker images and Docker containers.
- Experience in writing Liquibase scripts to migrate databases to PostgreSQL and converting existing ORACLE and MySQL server databases to PostgreSQL.

Employer: S&P Global, India

Sep 2021 – Sep 2022

Role: Senior Software Engineer – Application Developer

Roles & Responsibilities:

- Integrated Auth0 for authorization and authentication of users and API calls from different application.
- Used Log4J to print info, warning and error data on to the logs and Spring Swagger to generate documentation for a Spring REST API.
- Using advanced level of HTML5, AJAX, JavaScript, CSS3 and SCSS. Implemented application-level persistence using Hibernate and Spring. Developed various UI (User Interface) components using JSP, and HTML.
- Expertise in developing UI based dynamic application and GUIs using HTML5, CSS3, JavaScript, AJAX, XML, Angular and AngularJS Worked with Docker to deploy Micro-services in modern containers to increase Isolation.
- Worked on REST with JSON to test data and Postman for testing the Web Services and Documentation of the Web API.
- Used various Bootstrap components like accordion, date picker, time picker, alert, buttons, modal and react-bootstrap components.
- Making changes to existing web applications and creating new components using React.JS and Angular and Lazy-Loading components.
- Utilized RxJS and observables to manage complex asynchronous data flows, improving application speed and maintainability.
- Architected and developed scalable back-end solutions with Java, Spring Boot, leading to decreased API response times.
- Worked in testing tools like Karma, Protractor, and Jasmine to ensure code quality and reliability, resulting in bug-free applications.
- Developed Spring based services which listen to Spring integration HTTP Endpoint for events.
- Participated code review and mentoring sessions, used GIT as version control and GIT Bash for GIT interactions.
- Used spring core annotations for Dependency Injection, Spring DI and Spring MVC for RESTful APIs and Spring Boot for Microservices.
- Used Docker images to host Microservices inside Azure Kubernetes service.
- Good knowledge in Microservices development using Spring boot and Azure Cloud.
- Experience in migrating on-prem servers to Azure Cloud.
- Using advanced level of AngularJS, HTML5, AJAX, JavaScript, CSS, SCSS. Implemented application-level persistence using Hibernate and Spring.
- Developed Java Server components using Spring, Spring MVC, Hibernate, Web Services technologies.

VENKATA NAGA VINEEL KODI

Full Stack Developer

venkatanagavineel.k28@gmail.com | +1 (414) 406-8898

- Developed batch jobs using Spring Batch and developed email notification system for bulk Candidate/Requisition failures using Spring Mail.
- Developed RESTFUL web service and hands on experience in JSON parsing and XML parsing.
- Migrated CRM of the product from Angular 2 to Angular 8.

Client: PWC Limited, India

Apr 2020 – Aug 2021

Employer: JoulestoWatts Business Solutions Pvt Ltd

Role: Front End Developer

Roles & Responsibilities:

- Worked on creating Angular application as well as server-side development (Node.js, MongoDB and neo4j) in this role.
- Designed and implemented the user interface using HTML5, CSS3, JavaScript, Node JS and AngularJS.
- Used AJAX and JSON to make asynchronous calls to the project server to fetch data.
- Used RESTful client to interact with the services by providing the RESTful URL mapping.
- Managed Angular CLI for component, service, pipe, directive, and module creation.
- Worked with Angular Modules, Services, Templates, Directives, Route Security Guards, Lazy-Loading, and RXJS to build Single-page applications with user validation forms and RESTful services.
- Implemented JWT token-based authentication and authorization for REST APIs.
- Created custom plugins, templates and functions for Angular.js application.
- Used React.JS in components like JSX, creating React components, Virtual components etc.
- Designed and developed API's using REST framework and Spring Boot and used Bootstrap along with React JS in creating the Application.
- Involved in hosting Amazon EC2, S3, RDS, Elastic Bean Stack, and other services of the AWS infrastructure.
- Worked on Cloud implementation by installing, building, and deploying applications using Cloud Foundry and using AWS.
- Involved in writing Java API for AWS Server less (Lambda) to manage some of the AWS services.
- Created Jenkins jobs and pipelines communicate to AWS resources
- Extensively used MVC, Factory, Delegate and Singleton design patterns.
- Strong Core Java background with experience in Collections, Multi-Threading, Java 8, Interfaces, RMI, Serialization, Synchronization, Exception Handling, Java Swing, OOPs techniques, Logging and Performance Tuning.
- Used spring framework including spring core/IoC, Spring Web, Spring Security and implement the authentication, authorization, and access-control features by using Spring Security.
- Used Spring Inversion of Control (IOC) for injecting the beans and reduced the coupling between the classes and implemented the Model View Controller using Spring MVC.
- Implemented the application using Spring Boot Framework and handled the security using Spring Security.

Client: Accenture, India

Apr 2017 – Apr 2020

Employer: Ecobiased Technologies

Role: Java Web Developer

Roles & Responsibilities:

- Designed and Developed Data Migration tool using OOPS, Object Oriented methodologies, Design patterns, frameworks to migrate customer data and Improved tool overall performance by 60%
- Designed and developed GUI screens for user interfaces using JSP, JavaScript, XSLT, AJAX, XML, HTML5, CSS3, Bootstrap, jQuery and DHTML.
- Developed a HTTPS server and implemented features to serve different file types (TLS)
- Extensively involved in coding with Core Java concepts like Collections, Exception Handling, Multithreading, Java I/O, and Generics to implement some business logic.
- Acquired knowledge of Angular basics, including Components, templates, and Data binding.

VENKATA NAGA VINEEL KODI

Full Stack Developer

venkatanagavineel.k28@gmail.com | +1 (414) 406-8898

- Followed Agile methodology and involved in daily SCRUM meetings, Sprint planning, showcases and retrospective and used JIRA as tracking tool.
- Implemented RESTful web services to retrieve data from client side and made REST API calls from Angular and parsed the data to project client and handled the Security and Authorization using OAuth and JWT.
- Implemented Angular services to connect applications to back-end APIs to POST/GET the data used on UI.
- Used Spring Boot to deploy both RESTful Web services and MVC applications.
- Experience in using various tools and IDEs for development and design like Eclipse, STS.
- Assisted in testing Angular components for Cross-browser compatibility and Responsive design.
- Collaborated closely with UI/UX designers to convert design mock-ups into pixel-perfect Angular templates.
- Improved Angular app Performance by Optimizing, rendering and minimizing API queries through data caching.
