

CAREER SUMMARY

Data Scientist / Python Developer / Jr. Python Developer

Detail-oriented and analytical Data Scientist with 4+ years of progressive experience in Python development and data science roles across retail and finance domains. Proven ability to develop scalable machine learning models, deploy cloud-based solutions, and optimize data workflows using modern tools like GCP, Flask, and Django. Adept at extracting actionable insights from complex datasets to drive business performance. Strong communication, problem-solving, and teamwork skills with a track record of delivering high-impact solutions in cross-functional environments.

AREAS OF EXPERTISE

- **Languages & Tools:** Python, SQL, Bash, Git, Postman
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Keras, Flask, Django
- **Cloud & DevOps:** GCP (Cloud Functions, Cloud Run, BigQuery), GitHub
- **Data Integration:** Oracle Data Integrator (ODI)
- **Soft Skills:** Analytical Thinking, Communication, Team Collaboration, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

Halvik Corp

Jul 2024 – Present

Associate Data Scientist

- Built and deployed scikit-learn models on GCP Cloud Run, boosting stock availability by 18%.
- Automated sales forecasting using Python and BigQuery, reducing manual effort by 70% and increasing forecast accuracy by 22%.
- Created Flask APIs for model deployment and integrated with internal CRM systems.
- Led cross-functional workshops to communicate data-driven insights to business stakeholders.
- Utilized GCP Cloud Functions for scalable data pipeline execution and integration with retail systems.

C&S Wholesale Grocers

Mar 2022 – Jul 2024

Python Developer

- Designed and deployed 15+ Python-based microservices using Cloud Functions and Cloud Run, reducing deployment time by 30%.
- Built automation scripts to streamline inventory reconciliation, improving data accuracy by 25%.
- Created data ingestion pipelines using ODI and SQL, handling over 5 million daily transactions across retail branches.
- Implemented Django REST APIs integrated with GCP services, supporting high-volume retail operations.
- Developed and tested Postman collections for API endpoints, improving QA coverage by 40%.
- Maintained source code repositories using GitHub, including branching strategies and PR reviews.
- Wrote and optimized complex SQL queries to support analytics dashboards for retail managers.
- Conducted performance tuning of backend systems in a Linux-based environment, improving response times by 20%.
- Mentored 2 junior developers and led weekly code review sessions to maintain coding standards.

Bloomberg LP

Mar 2021 – Sep 2021

Jr. Python Developer

- Developed backend services in Python for internal data platforms supporting market analysis tools.
- Built cloud-native apps using GCP services such as Cloud Run, reducing server maintenance needs.
- Automated data validation scripts using Python and SQL, cutting manual effort by 50%.
- Contributed to a Django-based financial dashboard for internal stakeholders.
- Integrated APIs using Postman and performed regression testing with test suites.
- Participated in Agile ceremonies and collaborated with global teams on high-impact deliverables.
- Improved error logging and monitoring using custom Python scripts, enabling faster incident response.

St. Cloud State University

Aug 2020 – Dec 2020

Teaching Assistant

- Assisted in teaching undergraduate Python programming and data structures courses.
- Supported students in coding labs and debugged issues across Linux-based systems.
- Graded assignments and provided feedback to 50+ students, fostering an interactive learning environment.
- Encouraged the use of GitHub for version control and collaborative development in academic projects.

EDUCATION & CERTIFICATIONS

- **Masters in Engineering Management | GPA: 3.93** Aug 2022 - May 2024
St. Cloud State University | Minnesota, USA
- **Bachelors in Electrical and Electronics Engineering | GPA: 3.32** Aug 2016 - May 2020
Government Engineering College | Kerala, India
- **Lean Six Sigma**
