Projects

Corporate Consulting Project – Valeo Case Study: Identifying Supply Chain Risks

Global Supply Chain Analysis and Planning Major Capstone

January 2025 – March 2025

- Identified 44%-63% unit cost savings through alternative supplier sourcing to offset a 20% semiconductor price increase.
- Designed a 3-phase supplier integration roadmap to eliminate 100% single-source risk and strengthen supply chain resilience.
- Conducted legal/IP compliance reviews and presented actionable risk mitigation strategies to Valeo senior leadership.

Company Class Project - Cummins Case Study

Strategic Procurement

October 2024 – November 2024

- Analyzed 4 supplier options (USA, Taiwan, India, domestic Bearings Inc.) across 5 key metrics: Total Landed Cost (TLC), quality, shipping reliability, geopolitical risk, and tariffs.
- Modeled up to 30%-unit cost variance between suppliers; quantified risk-adjusted TLC impacts to optimize global sourcing strategy.
- Delivered sourcing recommendations to Cummins leadership with projected cost savings and risk reduction for critical components supporting customer satisfaction and business objectives.

Company Class Project – Ford Case Study

Strategic Procurement

September 2024 – October 2024

- Evaluated 3 global suppliers (USA, Mexico, China) using a 6-factor weighted scorecard (scored 4.4/5) covering risk, sustainability, technology, quality, pricing, and lead time.

- Modeled cost differentials up to 25%, factoring tariffs (2.5%), tooling investments, and transportation costs to optimize sourcing.
- Recommended supplier strategy projected to reduce lead time variability, enhance production reliability, and optimize total landed cost for Ford's F-150 crankshaft lines
