Skills

Python | FastAPI | Langchain | LangGraph | Huggingface | LLMs | Gen AI | Docker | Azure | AWS (Lambda, EC2, S3, DynamoDB) | PostgreSQL | MongoDB | MySQL | Elasticsearch | ELK Stack | Django | Git | CI/CD (Jenkins, GitHub Actions) | Typescript | Javascript

Experience

Private AI Toronto, Canada · Remote
Backend Engineer 08/2024 - Present

- Designed, developed, and maintained critical features across PAI's backend infra, including the **coreference resolution** engine.
- Led system tests refactoring, introducing modular architecture that reduced debugging time by **~30%**.
- Contributed to **Nvidia's NeMo Guardrails**, integrating PAI's APIs to strengthen LLM safety and governance tooling.
- Automated integration testing pipeline, cutting developer QA effort by **4+ hours per feature** and accelerating deployment cycles.
- Mentored junior engineers and enforced coding standards through active code reviews, raising overall team velocity.
- Played a key role in engineering hiring, conducting technical interviews and shaping evaluation criteria.

DoctorPlan California, US · Remote
Backend Engineer 08/2022 - 03/2024

- Designed, Developed and Maintained backend and infrastructure for a Health Tech platform.
- Refactored legacy services into modular **TypeScript** code, cutting development time by **~40%**
- Spearheaded the design, development and deployment of **Image Processing Engine**, handling images up to **200MP**.
- Dockerized** the backend stack, reducing deployment time by **80%** and enabling seamless CI/CD integration.

LikeMinds Gurugram, India · Hybrid
Senior Backend Engineer 09/2021 - 08/2022

- Led a team of 3 engineers to build a **Chat platform**.
- Spearheaded end-to-end development of high-impact features (Events, Resources), driving a **~25% boost** in **user retention**.
- Optimized cold-start APIs, slashing average response times by **~90%**, significantly improving user experience.
- Migrated **log analysis** application to a self-managed **ELK** stack, cutting infrastructure costs by **~86%**.

Freelance US & India · Remote
Backend Engineer 07/2020 - 08/2021

- Partnered with early-stage startups (0-1, 1-10) to architect and deliver production-grade MVPs under tight timelines.
- Reduced backend development time by **~80%** by introducing **Django** over raw Python, streamlining APIs and admin workflows.
- Integrated advanced third-party tools (rate limiters, VPN firewalls) to enhance platform stability, cutting **crash frequency by 67%**.
- Engineered a custom content platform with collapsible tree structures for interconnected blog stories.
- Worked cross-functionally with design, product, and frontend teams to deliver scalable backend solutions.

Vakildesk Technologies Private Limited Delhi, India · On-site
Backend Engineer 01/2021 - 05/2021

- Engineered a Central Processing Engine to scrape government portals and auto-ingest structured data into the application database, increasing average session duration by 22%.
- Designed and implemented WebDAV-based cloud document collaboration, enabling real-time co-authoring and version control.

JRD Financial Services Ltd Delhi, India · On-site
SDE Intern 10/2020 - 12/2020

- Built the backend for a scalable calendar application using Django (MVC) and PostgreSQL, delivering a fully functional MVP in under 4 weeks.

Education

Jamia Millia Islamia 2018 - 2021
Master of Computer Applications - MCA, Computer Science

Delhi University 2015 - 2018
Bachelor of Science - BS, Computer Science
