

Summary

Results-driven **Data Analytics Engineer** with over 5 years of experience leveraging complex healthcare and financial datasets to deliver **actionable insights** that support strategic business goals. Proficient in **SQL, Python, R, and advanced Excel** (including **DAX** and **VBA**) for data manipulation, modeling, and predictive analytics. Expert in creating **interactive dashboards** with **Power BI, Tableau, and AWS QuickSight** to visualize critical KPIs and enhance operational performance. Skilled in **automating ETL workflows** using **AWS Glue and Lambda** to improve data pipeline efficiency. Adept at collaborating with **cross-functional teams** across **clinical, finance, HR, and supply chain**, facilitating clear **stakeholder communication** to align analytics solutions with business needs. Committed to ensuring **data integrity**, regulatory compliance (**HIPAA**), and security standards while driving improvements in patient care and risk management.

Skills

Programming & Scripting: Python (Pandas, NumPy), R, SQL, VBA

Excel & Automation: Power Query, PivotTables, Power Pivot, DAX, VLOOKUP/XLOOKUP, VBA Macros, Array Functions

Data Modeling & Analysis: Financial Modeling, Statistical Modeling, Forecasting, KPI Development

Business Analysis Skills: Requirements Gathering, Stakeholder Communication, KPI Definition, Process Improvement, Data Validation, Workflow Documentation, Agile Methodology, Regulatory & Compliance Reporting (HIPAA, Audit, Risk)

Visualization Tools: Tableau, Power BI, AWS QuickSight, Excel Dashboards

ETL & Workflow Automation: AWS Glue, AWS Lambda, Python ETL Scripts, Alteryx, VBA

Cloud & Warehousing: Amazon Redshift, Snowflake, AWS S3, AWS IAM

Documentation & Tools: Confluence, Visio, Lucidchart, SharePoint, MS Word, PowerPoint, OneNote

Security & Compliance: HIPAA, Secure Data Handling, Access Controls, AWS IAM Policies

Project Management: Jira, Agile/Scrum, Microsoft Teams

Experience

Data Analytics Engineer

Optum, Eden Prairie, MN

May 2024 – Present

- Analyzed large-scale healthcare datasets using **SQL** and **Amazon Redshift** to generate actionable insights, supporting enhancements in patient care delivery, resource allocation, and operational efficiency.
- Designed, optimized, and maintained scalable **data models** and **data pipelines** in Amazon Redshift to enable fast querying and reliable reporting across clinical, finance, HR, and **supply chain** functions.
- Developed and automated ETL workflows leveraging **AWS Glue, AWS Lambda**, and **Python** scripts, significantly reducing manual effort and improving data ingestion reliability.
- Created interactive, real-time dashboards and reports using **Power BI** and **AWS QuickSight** to visualize KPIs such as patient flow, cost trends, and resource utilization, enabling stakeholders to make informed decisions.
- Employed advanced **Excel** techniques, including **Power Pivot, DAX**, array formulas, and **VBA macros**, to streamline data transformation, automate recurring reports, and enhance reporting accuracy.
- Applied statistical analysis and predictive modeling with **Python (Pandas, NumPy)** and **R** to forecast healthcare demand and identify operational trends, supporting strategic planning.
- Collaborated extensively with cross-functional teams, including clinical, finance, HR, and **supply chain**, to gather requirements, ensure clear **stakeholder communication**, and deliver tailored data solutions aligned with business goals.
- Maintained strict adherence to **HIPAA** and internal security standards by working closely with compliance and IT security teams to implement data access controls via **AWS IAM** policies.
- Conducted continuous data quality assessments by identifying, troubleshooting, and resolving discrepancies across multiple data sources to ensure accuracy and consistency in reporting.
- Recommended process improvements and reporting enhancements that increased efficiency, improved decision support, and aligned analytics efforts with evolving business needs.
- Led training sessions and knowledge-sharing workshops for business users and junior analysts on using **Power BI dashboards** and advanced Excel features to empower data-driven decision-making across departments.
- Developed and documented comprehensive data dictionaries and process workflows using **Confluence** and **Visio**, improving transparency and consistency in data governance and analytics operations.
- Monitored and optimized data pipeline performance by analyzing system logs and query execution plans, reducing report run times, and enhancing overall system efficiency.

Environment: SQL, Amazon Redshift, AWS Glue, AWS Lambda, Python (Pandas, NumPy), R, Power BI, AWS QuickSight, Excel (Power Pivot, DAX, VBA Macros), Tableau, HIPAA Compliance, AWS IAM.

Business Data Analyst

London Stock Exchange Group (LSEG), India

Nov 2021 – Dec 2022

- Conducted detailed **financial and operational data analysis** using **SQL** and **Python (Pandas, NumPy)** to evaluate **credit risk**, loan performance, and **fraud trends**, providing actionable insights for risk management and revenue optimization.
- Developed and maintained dynamic **Tableau dashboards** and **Excel financial models** to monitor **loan portfolios**, **cash flow**, **delinquency rates**, and **customer behavior**, enabling real-time tracking of key financial metrics.
- Built and managed **forecasting models** using advanced **Excel** functions such as **Power Pivot**, **DAX**, **VLOOKUP**, and **VBA macros**, improving budgeting accuracy and financial reporting processes.
- Performed comprehensive **variance analysis** (actuals vs. forecast/budget), providing insightful commentary that supported strategic financial decisions across business units.
- Automated recurring financial data processing and reporting tasks using **Python** and **VBA**, significantly reducing manual efforts and increasing reporting speed and reliability.
- Created and tracked critical **financial KPIs** related to **revenue**, **expenses**, **delinquency**, **risk exposure**, and **customer retention**, aligned with business and compliance goals.
- Supported **FP&A (Financial Planning and Analysis)** teams with **scenario planning**, **cost-benefit analysis**, and **what-if modeling**, helping leadership optimize resource allocation and investment strategies.
- Collaborated closely with cross-functional stakeholders in **finance**, **compliance**, **risk**, **treasury**, and **branch operations** to gather requirements, deliver customized reports, and ensure effective **stakeholder communication**.
- Applied **R** for statistical modeling and trend analysis to support credit risk scoring, customer segmentation, and marketing strategy optimization.
- Extracted and analyzed data from enterprise data warehouses using complex **SQL queries**, ensuring accuracy in regulatory reporting and supporting internal/external audit processes.
- Ensured consistency and integrity of financial data through rigorous **data validation**, **reconciliation**, and adherence to **internal control** policies and **regulatory standards**.
- Delivered insightful presentations and reports to senior leadership, contributing to **quarterly business reviews (QBRs)**, strategic decision-making, and enterprise-level financial planning.
- Conducted **profitability analysis** by product line and customer segment to identify cost-saving opportunities and margin improvements.
- Created detailed documentation including data dictionaries, process workflows, and compliance checklists to support **financial governance** and audit readiness.

Environment: SQL, Python (Pandas, NumPy), R, Tableau, Excel (Power Pivot, DAX, VLOOKUP, VBA Macros), Financial Modeling, Forecasting, FP&A, Variance Analysis, KPI Development, Reporting Automation, Regulatory Compliance, Stakeholder Communication.

Business Analyst

Wells Fargo, India

Aug 2018 – Nov 2021

- Participated in gathering and documenting **business and functional requirements** by working closely with senior analysts during client and internal meetings.
- Performed **data cleaning and basic analysis** using **Excel** (PivotTables, filters, formulas) to support process improvement initiatives.
- Assisted in creating **client presentations**, **status reports**, and **process diagrams**, helping communicate key insights and recommendations.
- Used **SQL** to run simple queries for data extraction and validation tasks under the guidance of the data team.
- Contributed to **process mapping exercises** using **Microsoft Visio**, helping identify workflow inefficiencies and potential automation opportunities.

Environment: Microsoft Excel (PivotTables, filters, formulas), SQL (basic queries), PowerPoint, Visio, Microsoft Teams, SharePoint, Agile methodology

EDUCATION

University of Central Missouri, Warrensburg, MO

Master's in Computer Science, Jan 2023 – Aug 2024

Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad, INDIA

Bachelor of Technology, Aug 2014 – May 2018

CERTIFICATIONS

Tableau for Data Analysis & Data Visualization by Coursera Career

Essentials in Data Analysis by **Microsoft and LinkedIn**

Data Analytics Essentials by **Cisco**
