

NANDINI GUNDU

(989) 621-7780 | n.gundu.369@gmail.com | [linkedin.com/in/nandinigundu](https://www.linkedin.com/in/nandinigundu)

Professional Summary

- Data Analyst with 3 years of experience delivering data-driven reporting solutions that improved operational efficiency by **30%** and reduced manual processes by **40%** across multiple business functions.
- Skilled in SQL, Tableau, Power BI, and Python for developing dashboards and visual analytics that support decision-making for senior leadership.
- Experienced in optimizing SQL queries and data models, resulting in **25% faster** report refresh times and improved system performance.
- Adept at transforming complex datasets into actionable insights that enhanced stakeholder visibility and improved KPI tracking accuracy by **20%**.
- Proficient in working with complex datasets from multiple platforms, including SQL Server, Snowflake, and Redshift.
- Strong collaborator with cross-functional teams, working effectively in Agile environments using tools like JIRA and Confluence.

Technical Skills

Programming Scripting Languages: SQL, Python (Pandas, NumPy), R(Basic), UNIX, VBA

Database: MS SQL Server, Snowflake, Redshift, Azure Synapse, Trino, Spark

Visualization Tools and Platforms: Tableau, Power BI, Excel (PivotTables, VLOOKUP, Macros), DAX, Visual Studio Code, Jupyter Notebook, Google Looker Studio

ETL & Data Processing: Data Modeling, Data Profiling, Data Governance, Data Visualization, Data Sourcing, Data Wrangling, ETL/ELT Workflows

Project Management: JIRA, Confluence, Lucid chart, SharePoint

Work Experience

Tableau Developer, Amtrak, Washington, D.C.

May 2024 – May 2025

Operations – Compliance and Metrics: The Customer Service Performance Metric Integrator (CSPMI) One-Stop project will address the critical needs identified by Amtrak for trusted data access and “right time” availability of data for optimized decision-making. It will provide Amtrak with a highly available data warehouse platform for online analysis of data across business units. The objective of the CSPMI One-Stop project is to provide a modern environment for customer service performance metrics data reporting needs. CSPMI will report on performance of various business units through dashboards and reports to provide actionable information on a regular basis (daily, weekly, monthly and annually) for various levels of management. This will help to improve overall customer satisfaction at Amtrak

- Designed and developed interactive Tableau dashboards for leadership, improving visibility into customer service performance and reducing decision-making time by **35%**.
- Collected, analyzed, and translated user requirements into technical specifications, improving report accuracy and stakeholder satisfaction by **25%**.
- Integrated Tableau with multiple internal databases, increasing data consistency and reducing report refresh failures by **20%**.
- Automated recurring reports using Tableau and SQL, reducing manual reporting efforts by **40%** and improving operational efficiency.

- Developed and optimized SQL queries that boosted query performance by **30%** and improved data retrieval times.
- Performed detailed data audits, increasing the accuracy and completeness of business KPIs by **18%**.
- Collaborated with cross-functional teams to align analytics solutions, contributing to a **15% improvement** in overall reporting efficiency.
- Collaborated with cross-functional teams to align analytics solutions, contributing to a **15% improvement** in overall reporting efficiency.
- Trained business users through Webex and one-on-one sessions, increasing dashboard adoption and self-service analytics usage by **50%**.
- Participated in Agile sprints and cross-functional ceremonies, ensuring timely delivery of BI enhancements and reducing backlog by **10%**.

Environment: Tableau, SQL Server, Power BI, Microsoft Office Suite, JIRA, Confluence, Lucidchart.

Data Analyst, Helical IT Solutions Pvt Ltd, India

June 2021 – July 2023

- Designed and deployed Tableau dashboards to visualize key business trends and KPIs, enabling leadership to make faster, data-driven strategic decisions.
- Developed SQL queries and ETL data pipelines to extract, transform, and aggregate data from, improving reporting reliability and scalability.
- Performed data wrangling and preprocessing using SQL and Excel to ensure high data quality, increasing reporting accuracy by **25%**.
- Automated recurring performance reports, reducing manual effort by **30%** and improving operational efficiency.
- Partnered with stakeholders to define business metrics, analytical requirements, and KPI frameworks for performance tracking and decision support.
- Conducted ad-hoc analysis and delivered actionable insights, contributing to a **15% increase** in the adoption of data-driven strategies across teams.
- Built data models and standardized reporting templates, streamlining dashboard updates and reducing development time by **20%**.
- Monitored data quality through systematic validation checks and implemented data improvements that enhanced dashboard accuracy and reliability.
- Collaborated with cross-functional technical and business teams to document requirements, enhance visual design, and ensure dashboard scalability and long-term maintainability.

Environment: Tableau, Power BI, SQL, Excel, MS SQL Server, Redshift, Azure Synapse.

Workshops

Celonis Technical star – Rising Star (Business & Technical)

Power BI Data Analyst Professional Certificate

IBM Data Analyst Professional Certificate

Education

Master of Science, Information Systems, Central Michigan University, MI

Coursework: Data Visualization: Theory and Practice, Business Data Analytics, Business Decision Modeling

Bachelor of Technology, Electronics & Communication Engineering, SR Engineering College, India
