Open to Relocate

**FULL-STACK .NET DEVELOPMENT | CLOUD COMPUTING (AZURE, AWS) | WEB & API DEVELOPMENT |  
MICROSERVICES ARCHITECTURE | FRONTEND FRAMEWORKS (ANGULAR, REACT, BLAZOR)**

---

## SUMMARY

- **Full Stack .NET Developer** with **4+ years** of experience in designing, developing, and deploying enterprise applications using **C#, .NET Core, ASP.NET MVC, Web API, WPF, WCF, and ADO.NET** across stand-alone, client-server, and web-based environments.
  - Skilled in modern front-end frameworks, including **Angular (v8+)** and **React.js**, to build responsive SPAs with features like routing, dependency injection, component communication, and state management.
  - Experienced in cloud platforms with hands-on expertise in Azure (VMs, Web Apps, Blob, Cosmos DB, Azure SQL, PaaS) and AWS (EC2, S3, CloudWatch), along with containerization using **Docker**.
  - Strong understanding of **DevOps practices** with experience in CI/CD, infrastructure management, and automation, leveraging **Azure DevOps, PowerShell, and Linux** environments.
  - Proficient in databases including **SQL Server 2016/2018, Oracle PL/SQL**, and **NoSQL** systems, with experience in schema design, query optimization, and stored procedures.
  - Knowledgeable in **Microservices architecture, SOA, SOAP/WSDL services**, and **REST APIs**, enabling scalable and secure distributed systems.
  - Adept at working in Agile Scrum teams, collaborating closely with product owners and **QA**, with proven delivery in iterative SDLC and TDD methodologies.
  - Strong background in **JavaScript, TypeScript, HTML5, CSS3, Bootstrap, jQuery, and Angular CLI**, enabling the delivery of intuitive, user-centric applications.
- 

## TECHNICAL SKILLS

**Languages & Technologies:** C, C#, .NET Frameworks, .NET Core, EF Core, VB.NET, Web Services, WCF, WPF, ADO.NET, LINQ, Entity Framework.

**Databases:** SQL 2014/2016/2019, PL/SQL, T-SQL, SQL, Oracle.

**Web Technologies:** HTML, CSS, AJAX, jQuery, JavaScript, TypeScript, Python, PowerShell, Angular 13, JSON, XML, XSL, Bootstrap.

**Operating Systems:** Windows 10/8/7/XP, Windows Server 2018 R2.

**Cloud Services:** Azure, AWS

**Version Control Tools:** VSS, SVN, TFS, Git, Azure DevOps

**IDE and Tools:** Microsoft Visual Studio. Net 2022/2019/2017/2015, MS Office, SSMS, SQL Profiler, SQL Server Agent.

**MS Software Packages:** MS Office, MS FrontPage, Microsoft Visio, SharePoint, MS Excel.

**Reporting Tools:** Tableau, SSRS

---

## EXPERIENCE

**Full Stack .NET Developer | Stryker, Chicago, IL**

**Aug 2024 – Present**

- Designed and developed end-user specifications and customized applications, ensuring alignment with business requirements.
- Developed client and backend applications using **Angular, Bootstrap 4, and TypeScript**, enhancing UI responsiveness by 30%.
- Leveraged **Angular services/resources** for standardized data access, reducing duplicate API calls by 20%.

- Created custom **Angular directives** (multi-field form elements, background uploads) and enhanced detail pages with Angular Material (pagination, filtering).
- Engineered secure web pages using **C#, ASP.NET MVC, Web Services, caching, and state management**, improving reliability.
- Designed and implemented **C#.NET services** to handle database communication and return data efficiently to clients.
- Developed **Windows services, RESTful services, and multithreaded applications** with Web API, improving throughput by 40%.
- Designed and optimized **SQL schemas, T-SQL queries, stored procedures, triggers, and functions**, achieving 20% faster query performance.
- Implemented **JWT-based authentication** in ASP.NET Core Web API, securing endpoints and enforcing user-level authorization.
- Configured **Azure Blob Storage containers** for secure file and image storage.
- Designed and implemented **SSO and MFA solutions with Azure AD**, strengthening authentication and compliance.
- Implemented **Azure Application Insights** to capture user activities and log errors, reducing debugging time by 35%.
- Developed **role-based access mechanisms in Azure Active Directory**, enabling secure authorization flows.
- Automated deployments with **Azure DevOps and GitHub**, cutting release cycles by 50%.
- Supported **unit testing (MS Unit Test)** to validate design specifications and improve system stability.
- Conducted **unit, integration, and system testing**, ensuring applications passed quality checks before production release

**.NET Developer | Wells Fargo, INDIA**

**Jan 2022- Jun 2023**

- Designed and implemented applications with **.NET Framework 4.6, MVC, and AngularJS**, improving modularity and maintainability.
- Built responsive **front-end UIs using HTML5, CSS3, JavaScript, TypeScript, Bootstrap, and AngularJS/Angular 2/4**.
- Developed presentation layers with **Angular 4 and Angular Material**, enhancing user experience.
- Contributed across all **SDLC phases** (analysis, design, development, testing), ensuring on-time delivery.
- Configured **WCF throttling and concurrency**, boosting service throughput by 25%.
- Built **RESTful services with ASP.NET Web API** to integrate mobile applications seamlessly.
- Implemented **SQL Cache Dependency** in WCF services, improving performance and reducing database load.
- Developed **MVC patterns** for client-server communication, ensuring structured and reusable code.
- Implemented **LINQ to SQL** for efficient data access operations.
- Collaborated with product owners and stakeholders to refine requirements and prioritize features.
- Designed **partial views and MVC interfaces** for seamless data exchange across servers.
- Deployed applications on **IIS web servers**, ensuring stable hosting environments.
- Conducted **unit and functional testing with NUnit**, achieving high-quality releases.
- Participated actively in **Agile ceremonies** (grooming, planning, standups, retrospectives).
- Performed **code reviews, Git branch management, and environment deployments**, ensuring version control and stability.

**.NET Developer | Canara HSBC Life Insurance, INDIA**

**Jul 2020 – Dec 2021**

- Worked on two projects as a **developer, analyst, and tester**, delivering robust business logic using **C#, MVC, ADO.NET, JavaScript, Ajax, and jQuery**.
- Designed **GUIs with ASP.NET MVC** and implemented business logic in C# MVC Controllers.
- Implemented **two-way data binding in AngularJS**, improving UI responsiveness by 25%.
- Built **form validation** using HTML validators combined with AngularJS state management.
- Integrated multiple pages into **Single Page Applications (SPA)** using AngularJS routes and providers.

- Designed and developed **WCF REST services** for stateless and scalable architectures.
  - Consumed **third-party REST APIs** with C#, JSON, and XML to extend system integrations.
  - Developed web pages with **HTML, CSS, JavaScript, AJAX, and AngularJS**, delivering user-friendly experiences.
  - Designed and hosted **WCF services** in MVVM architecture, ensuring maintainability.
  - Developed **C#-based multithreaded applications**, improving parallel processing capabilities.
  - Applied **generics, lambda expressions, extension methods, and LINQ to SQL** for cleaner and efficient code.
  - Conducted **requirement analysis, design, coding, testing, deployment, and support**, ensuring full SDLC adherence.
- 

## EDUCATION

**University:** University of Central Missouri | **City, state:** Warrensburg, MO | **Concentration:** Master of Science Computer Science | **Month, year:** Dec 2024
