## SUMMARY

Results-driven Full Stack Developer with 4+ years of experience designing and delivering scalable, secure web applications using **Java, Spring Boot, React, Angular, and Node.js**. Experienced in building cloud-native microservices, integrating **AI/ML APIs** (OpenAI, Azure Cognitive), and deploying full-stack solutions on **AWS and Azure**. Strong collaborator with expertise in **RESTful APIs, SQL/NoSQL** databases, test automation, and **CI/CD** workflows, consistently delivering high-quality code in Agile environments across domains like e-commerce, banking, and healthcare.

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

Feb 2025- Present

Valour USA

- Developed real-time web interfaces using Angular, NgRx, and JavaScript to enhance user experience and responsiveness.
- Built RESTful microservices with Node.js (Express), OAuth 2.0, and integrated MySQL and MongoDB for efficient data handling.
- Deployed and managed Azure applications using ARM templates and Kafka for reliable asynchronous communication.
- Automated CI/CD with GitHub Actions and Azure DevOps; built an AI-based document processor with Azure Cognitive Services and OpenAI, cutting manual effort by 60%.

### Full Stack Developer

Nov 2021 – Oct 2022

Droom

- Designed high-performance real-time tracking dashboards using React, Redux, and TypeScript to improve user visibility and reduce load.
- Built secure Spring Boot microservices with JWT authentication, integrating PostgreSQL and Cassandra for processing live shipment data.
- Deployed scalable logistics applications on AWS using EC2, Lambda, CloudFormation, with monitoring via CloudWatch and Datadog.
- Orchestrated CI/CD pipelines with Jenkins and AWS CodePipeline, maintaining 90%+ test coverage and improving deployment speed by 30%.

### Junior Software Engineer

Oct 2019 – Oct 2021

DCB Bank

- Designed a secure banking platform using Angular, Spring MVC, and Oracle DB to manage user accounts and transactions.
- Implemented backend services with Spring Security, OAuth 2.0, and JWT; optimized queries to cut data retrieval time by 40%.
- Streamlined CI/CD with GitLab and Jenkins; ensured quality with unit and BDD testing using JUnit, Mockito, and Cucumber.
- Integrated AppDynamics, Log4j, ServiceNow, and Zendesk to enhance monitoring and reduce incident resolution time by 35%.

## SKILLS

- Programming Languages:** C, C++ Java 17, TypeScript, JavaScript, SQL, PL/SQL, Python
- Frontend:** Angular, NgRx, React, Redux, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, WebSockets
- Backend & Frameworks:** Spring Boot, Spring MVC, Node.js (Express), RESTful APIs, JWT Authentication, OAuth 2.0, Microservices Architecture
- Databases:** MySQL, PostgreSQL, Oracle, Cassandra, MongoDB
- Cloud & DevOps:** Azure (App Services, Functions, Blob Storage, Service Bus), AWS (EC2, Lambda, S3, CloudFormation), GitHub Actions, Azure DevOps, Jenkins, AWS CodePipeline, GitLab, Docker, CI/CD Pipelines
- Testing & Monitoring:** JUnit, Mockito, Cucumber, Jest, Mocha, AppDynamics, DataDog, CloudWatch, Log4j
- AI & Automation:** Azure Cognitive Services, OpenAI APIs
- Messaging & Streaming:** Azure Service Bus, RabbitMQ, Kafka
- Tools & Collaboration:** Git, Jira, ServiceNow, Zendesk, Agile Scrum, Code Review, Version Control
- Soft Skills:** Algorithms, Data structures, Agile Methodologies

## EDUCATION

### Master of Science (MS) – Computer Science | University of North Texas

DEC 2024

- Relevant Coursework: Computer Algorithms, Big Data and Data Science, Software Engineering, Machine Learning

### B.E – Electronics Communication Engineering |Matrusri Engineering College

MAY 2022

- Relevant Coursework: AI, Machine Learning, Computer Operating Systems, Computer Networks

## PROJECTS

### AI-Powered Medical Document Processor

- Developed an AI-driven document processing tool using Azure Cognitive Services and OpenAI APIs to automate text extraction and summarization, reducing manual processing time by 60%.
- Integrated the solution within existing healthcare workflows, improving data accuracy and enabling faster decision-making for medical teams.

### Job Search Platform

- Architected and deployed a full-stack platform on AWS EC2 supporting 5,000+ concurrent users, with a responsive Angular front-end that boosted user engagement by 30%.
- Refactored Spring Boot backend and optimized MySQL queries, improving search throughput by 20%, while implementing secure JWT and OAuth authentication.

### Online Code Editor

- Built a real-time collaborative code editor using React.js, Node.js, and Docker, supporting 100+ active sessions with <50ms WebSocket communication for live synchronization.
- Deployed on AWS Fargate with autoscaling and secure session management using JWT, OAuth 2.0, and MongoDB, ensuring reliable performance under variable loads.
