

Narayani Vadhuka Jillellamudi

DATA ANALYST

Mobile: +13128099517 | Gmail Id: vadhukajillellamudi0412@gmail.com | Location: Chicago IL

SUMMARY

- Dynamic and results-oriented Data Analyst with around 4 years of hands-on experience in Healthcare and IT sectors.
- Proficient in SDLC methodologies, adeptly navigating both Agile and Waterfall frameworks to deliver high-quality data solutions.
- Proficient in **Python, and SQL**, demonstrating the ability to leverage these languages for robust data analysis, machine learning, and statistical modeling.
- Proficient in creating impactful visualizations using **Tableau, Power BI, and Advanced Excel (including Pivot Tables and VLOOKUP)** to convey complex data insights to diverse stakeholders.
- Extensive experience with various databases, including **MySQL, Redis, MongoDB, DynamoDB, PostgreSQL, and Teradata**, showcasing the ability to manage and analyze diverse data sets.
- Proficient in deploying data solutions on **AWS (EC2, RDS, S3), Microsoft Azure, and Google Cloud Platform**, emphasizing versatility in cloud-based data management and analytics.

SKILL

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
IDEs:	Visual Studio Code, Jupyter Notebook, IntelliJ
Database:	MySQL, MongoDB, DynamoDB, PostgreSQL
Cloud Technologies:	AWS (EC2, RDS, S3), Google Cloud Platform
Other Technical Skills:	Google Analytics, Power Query, SAS, JIRA, SAP, SSIS, SSRS, Machine Learning Algorithms, Probability distributions, Confidence Intervals, ANOVA, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing
Version Control Tools:	Git, GitHub
Operating Systems:	Windows, Linux, Mac iOS

EXPERIENCE

Data Analyst | Capital One Financial, IL

Aug 2023 - Present

- Spearheaded a customer segmentation and targeted marketing project at Capital One, utilizing Python and Jupyter Notebooks for exploratory data analysis.
- Implemented K-means clustering algorithm to categorize customers based on transaction patterns, achieving a 15% improvement in the precision of targeted marketing campaigns.
- Employed SQL for efficient data extraction from Capital One's databases, ensuring seamless integration of diverse data sources for comprehensive analysis.
- Utilized Tableau for data visualization, transforming complex datasets into actionable insights and contributing to an increase in campaign conversion rates.
- Monitored key performance indicators through statistical analysis, resulting in a 10% reduction in customer acquisition costs and improving campaign ROI.

Data Technology Analyst Intern | Southwest Airlines, Dallas

May 2023 – Aug 2023

- Utilized Qualitative and Quantitative analytics to reduce field server issue resolution time by 15%.
- Designed & developed 20+ Power BI dashboards for Key Performance Indicators (KPI) metrics, boosting decision-making by 25%.
- Facilitated and served as Scrum master for 7 standups and retrospectives, fostering a 15% increase in team productivity.
- Designed UI prototypes of employee used webpage and mobile application using Figma, improving project efficiency by 30%.
- Oversaw 30 Jira tickets for handling the server issues and webpage development, optimizing workflow efficiency using Kanban.

Data Analyst| NextGen Healthcare, India

Nov 2019 – Aug 2022

- Collected and integrated patient feedback data from diverse sources, including surveys, online reviews, and internal records, using SQL for efficient data retrieval.
- Developed interactive dashboards in Tableau to visualize patient satisfaction scores, trends, and areas requiring improvement, aiding in identifying patterns for enhancing overall patient experience.
- Conducted regression analysis to identify factors influencing patient satisfaction scores, providing actionable recommendations for improvement to relevant departments.
- Collaborated with patient care and service teams to provide data-driven recommendations for improving specific aspects of patient experience, resulting in a 15% increase in overall satisfaction.
- Assisted in machine learning models (Random Forest, Regression) to predict patient satisfaction scores based on historical data, assisting in proactive improvement efforts.

EDUCATION

Master of Science in Business Analytics – University of Illinois at Chicago, IL
Bachelors in Biotechnology – K L University, Vijayawada, Andhra Pradesh, India
