Systems Engineer & Project Manager | Data-Driven Innovation | User Experience | Cross-functional Leadership

A Biomedical Engineer and Quality Systems Engineer leveraging a strong foundation in **data-informed decision making**, **cross-functional leadership**, and **AI** principles. Proven ability to drive **innovation**, streamline processes, and enhance **user experience** by translating complex technical requirements into impactful solutions.

Skills

- **Product Management:** User Research, Prototyping, Product Lifecycle Management, Design Thinking, Data-Driven Decision Making, Project Management, Strategic Collaboration, Innovation
- **Technical & Analytical:** Quality Systems Management, Python, AI, Data Analysis & Interpretation, SOLIDWORKS 3D Design, MATLAB, Business Strategy
- **Leadership & Communication:** Cross-Functional Team Leadership, Technical Documentation, Strategic Collaboration, Communication & Presentation Skills, Stakeholder Engagement, Analytical Problem Solving
- **Regulatory & Quality Systems:** ISO Standards, MDSAP Requirements, Regulatory Documentation, Audit Management, Risk Analysis, Process Optimization, Quality System Regulations Adherence

Experience

Jun. 2024 - Jun. 2025

Quality Systems Engineer | Applied Medical

- **Streamlined regulatory compliance** across multiple jurisdictions by developing and implementing a comprehensive mapping system for 500+ Standard Operating Procedures (SOPs) and **authoring technical documentation**, ensuring adherence to ISO standards and MDSAP requirements.
- **Drove a 15% reduction in compliance errors** by developing and deploying key quality metrics, enabling data-informed decisions for process enhancements.
- **Led cross-functional initiatives** to enhance quality management systems and regulatory compliance programs, fostering a culture of continuous improvement.
- **Partnered with Engineering, QA, and Regulatory teams** to effectively translate user feedback into actionable product requirements, influencing product development.
- **Designed and implemented data visualization solutions** for real-time tracking and reporting of quality metrics across diverse product lines, improving visibility and decision-making.
- **Drove process improvements** through rigorous data analysis and user-centered design approaches, significantly enhancing customer experience.

Aug. 2021 - Dec. 2023

Undergraduate Research Assistant | California State University, Long Beach - Biomedical Engineering

- **Collaborated with cross-functional teams** to prototype and rigorously test innovative microfluidic tools, accelerating advancements in research methodologies.
- **Optimized prototype production processes** by effectively utilizing advanced manufacturing technologies including CNC milling and 3D printing.
- **Engineered precise control systems** for integrated microfluidic applications, ensuring high accuracy and reliability in experimental setups.
- **Communicated project findings** and career opportunities to students, fostering engagement in STEM fields.

Technical Projects

Medical Device Innovation | Team Lead | 2023

- Led cross-functional team in end-to-end development of an EMG/IMU tracking system (95% accuracy in motion detection), designing an intuitive UI for real-time monitoring and guiding product from concept to prototype.

Biomaterials Research | Project Manager | 2023

- Designed innovative synthetic skin substitute using advanced materials technology, developing user-friendly application protocols and comprehensive documentation for regulatory submission to facilitate healthcare provider adoption.

Education

MIT Sloan + CSAIL | Cambridge, Massachusetts | 2025

- Post Graduate Program, Artificial Intelligence (AI): Implications for Business Strategy

California State University Long Beach | Long Beach, California | 2019 - 2023

- BS, Biomedical Engineering
- GPA: 3.75
- Magna Cum Laude, President's Honor List
