SUMMARY

Business Analyst with 3 years of experience delivering data-driven process improvements and enterprise reporting solutions across manufacturing, technology, and healthcare domains. Proven expertise in requirements gathering, BRD/FRD development, Agile delivery, and stakeholder collaboration to translate complex business needs into scalable technical solutions. Strong analytical background leveraging SQL, Python, Power BI, and Tableau to drive insights, optimize workflows, and support executive decision-making. Adept at business process reengineering, change management, and system integrations across SAP, Salesforce, and Microsoft Dynamics 365. Recognized for strong communication, problem-solving, and the ability to bridge business and technology teams to deliver measurable outcomes.

SKILLS

- **Business Analysis & Documentation:** Requirement Gathering, BRD, FRD, Use Case Development, Process Modelling, Workflow Design, User Stories, Gap Analysis, Impact Analysis, Business Case Development
- **Project Management & Methodologies:** Agile, Waterfall, SDLC, Stakeholder Management, Change Management, Risk Management
- **Data Analysis & Visualization:** Power BI, Tableau, Looker, Advanced Excel, SQL, Python
- **Cloud Platforms:** AWS
- **Data Analysis Techniques:** Data Cleansing, Data Wrangling, Statistical Analysis, Time Series Analysis, A/B Testing
- **Enterprise Tools:** Jira, Confluence, SAP, Microsoft Dynamics 365, Salesforce CRM
- **Business Process Improvement:** Root Cause Analysis, Lean Six Sigma, DMAIC, Process Reengineering, Continuous Improvement
- **Soft Skills:** Critical Thinking, Problem-Solving, Communication, Negotiation, Stakeholder Collaboration, Time Management, Presentation Skills
- **Healthcare & Compliance Knowledge:** HIPAA, EMR, HER
- **Version Control & Collaboration:** Git, GitHub, Trello, Microsoft Teams
- **Other Tools:** Microsoft Visio, Lucidchart, ChatGPT

WORK EXPERIENCE

Honeywell

January 2025 – Present

Business Analyst

- Spearheaded a cross-functional digital process optimization initiative, translating complex business requirements into BRDs, FRDs, user stories, and acceptance criteria in alignment with enterprise standards.
- Partnered with operations, finance, IT, and compliance teams to document current-state workflows, perform gap and impact analysis, and design scalable future-state process models.
- Evaluated structured and semi-structured datasets using SQL and advanced Excel to identify operational patterns and support strategic, data-driven decision-making.
- Designed interactive Power BI dashboards to monitor operational KPIs, enhancing reporting visibility and reducing manual reporting effort by 30%.
- Facilitated Agile delivery activities including sprint planning, backlog grooming, stakeholder demos, and UAT coordination to ensure timely and high-quality releases.
- Established change management and risk mitigation frameworks by documenting dependencies, controls, and rollout plans to enable smooth adoption of process enhancements.
- Supported enterprise system integrations across SAP, Salesforce, and Microsoft Dynamics 365, ensuring data accuracy, traceability, and cross-platform process continuity.
- Optimized business workflows using root cause analysis and Lean techniques, achieving a 20% reduction in overall process cycle time through automation and streamlined approvals.

Infosys

January 2021 – December 2022

Business Analyst

- Executed a data-driven enterprise reporting modernization for a global client, eliciting business requirements and converting them into detailed BRDs, functional specifications, and use cases aligned with stakeholder expectations.
- Coordinated closely with client stakeholders, product owners, and development teams to translate business needs into user stories and prioritize backlogs within Agile delivery frameworks.
- Performed comprehensive data validation, cleansing, and reconciliation activities using SQL and Excel to ensure accuracy and consistency across operational and financial reports.

- Built Tableau and Power BI reports to visualize performance trends and support executive-level insights, improving reporting turnaround time by 25%.
- Documented end-to-end business processes and system interactions using BPMN and Visio, enabling clearer understanding of dependencies and integration touchpoints.
- Conducted UAT planning and execution by developing test scenarios, coordinating defect triage, and validating fixes with business users to ensure solution readiness.
- Supported enterprise application workflows across SAP and Salesforce CRM, ensuring alignment between business processes and system functionality.
- Enhanced stakeholder adoption through structured change support, training materials, and communication plans, contributing to a 15% improvement in user engagement during rollout phases.

PROJECTS

Sales Forecasting Dashboard for Retail CRM

- Developed a dynamic Tableau dashboard integrated with Salesforce CRM to visualize sales trends and support data-driven sales forecasting.
- Conducted data analysis using Python to identify seasonal patterns and guided stakeholders through scenario planning, enhancing decision-making in quarterly reviews.

Real-Time Supplier Risk Assessment System

- Developed an AI-driven risk assessment model using AWS Redshift and Python, analyzing supplier performance metrics and reducing procurement risks.
- Designed an automated vendor evaluation framework, integrating data from SAP Ariba and Power BI dashboards for enhanced decision-making.
- Implemented real-time alerts and anomaly detection, identifying potential disruptions in the supply chain before impacting operations.

EDUCATION

Master of Science in Engineering Management

Westcliff University, Irvine, CA |

Bachelor of Engineering in Electronics and Communication

Raja Rajeswari College of Engineering | Bangalore, India
