CAREER SUMMARY

Dedicated healthcare professional with experience across behavioral health, genetic research, and neurostimulation therapy. Proven track record of supporting diverse patient populations and managing therapeutic programs in both clinical and hospital settings. Excels in multidisciplinary collaboration, patient-centered care, and applying scientific knowledge in real-world healthcare environments.

PROFESSIONAL EXPERIENCE

KORB Health Group, Austin, TX

2025 – Present

Program Coordinator and Custom Experience Lead

Specialized in managing new business partners while cultivating strong relationships with clients and channel partners. Demonstrated expertise in product knowledge, operations management, document creation, and HIPPA management for patient-to-provider connections.

- Manage patient files and coordinate physician-led weight loss programs across multiple clinics.
- Create demographic data visuals and handle day-to-day scheduling and communications.
- Troubleshoot IT issues and coordinated efforts to meet group goals to ensure maximum efficiency of company resources.
- Coordinate with physicians, administrative staff, and marketing teams to implement patient-centered service improvements.
- Lead onboarding and training of new support staff to maintain consistent client experience and compliance with HIPAA standards.

Anew Era TMS, Austin, TX

2024-2025

TMS Technician/Care Coordinator

- Performed cortical mapping and administered TMS treatments for depression, anxiety, and migraines in a high-volume clinic.
- Collaborated with a multidisciplinary team including physicians, NPs, and support staff to ensure individualized care and protocol compliance.
- Participated in weekly team meetings to discuss patient progress, refine workflows, and enhance clinic efficiency.

Austin State Hospital, Austin, TX

2023-2024

Activity Coordinator/PNA III/ Rehab Tech IV

- Facilitated therapeutic recreational activities and supported ADLs to encourage patient autonomy.
- Worked closely with nursing staff and case managers to plan individualized care strategies and recovery goals.
- Delivered rehabilitation programming to support reintegration into community living environments.
- Collaborated with clinical teams to evaluate program effectiveness and report on patient engagement trends.
