EXPERIENCE

Indiana University

Research Software Engineer

Bloomington, IN

Aug 2024 - Present

- Developed the lab website using React JS, integrated dynamic features, and enhanced existing UI components.
- Developed python scripts to perform large-scale data cleaning and analysis for a peer review scientific study.
- Designed and deployed Canvas and model-driven Power Apps with Power Automate workflows for idea tracking and multi-stage approvals, reducing manual follow-ups by over 50%.
- Working on developing an AI agent that analyzes research datasets and automatically generates interactive data visualizations, integrating results directly into the lab website.

Teaching Assistant

Aug 2024 – May 2025

- Provided technical guidance to students on SQL, relational database design, and query optimization.
- Designed, reviewed, and analysed complex assignments and projects on advanced database concepts to enhance student problem-solving and system design skills.

Cognizant Technology Solutions

Software Engineer

Chennai, India

July 2021 – July 2023

- Designed and developed high-performance .NET Core RESTful APIs leveraging the Mediator design pattern, improving scalability and reducing processing time by 30%.
- Integrated automated unit testing and mocking frameworks in the .NET Core environment, boosting code coverage by 45%.
- Built reusable, responsive UI components using React.js, resulting in a 20% improvement in website load times.
- Engineered and optimized T-SQL queries, stored procedures, triggers, and views in MS SQL Server to support major database migration projects.
- Redesigned and optimized database schemas with indexing strategies, table partitioning, and execution plan analysis, reducing query runtimes by 30%.
- Automated batch data processing workflows using PowerShell scripts, reducing data processing time by 25%.
- Collaborated with Agile Scrum teams, participating in sprint planning, estimation, ensuring consistent on-time releases.
- Built and maintained Azure DevOps CI/CD pipelines, deployed containerized ASP.NET Core services to Azure App Service, and used Azure Blob Storage and Application Insights for storage and monitoring.

TECHNICAL SKILLS

Languages: C#, JavaScript, Python, R, Java, C/C++, HTML/CSS, VB.NET

Web Technologies: ASP.NET, ASP.NET CORE, ASP.NET Web Forms, React, JQuery, Redux, Django, Node.js, Bootstrap

Databases: SQL Server, MySQL, PostgreSQL, Oracle, MongoDB

Developer Tools: Git, TFS, Visual Studio, VS Code, Postman, Jupyter, Anaconda, Docker,

Cloud Technologies: Azure (App Service, Functions, Blob/Queue Storage, ARM Templates, CLI, Application Insights)

Other Technologies: Power Apps, Power Automate, SharePoint, Power BI, Tableau, Kafka, Jira, Swagger, Shell Script

PROJECTS

Rentr | MongoDB, Express, React, Node.js, Firebase, Github

- Built a scalable rental management system using the MERN stack, capable of handling the growing users and listing data.
- Designed an intuitive and User Interface with React.js, incorporating advanced search filters and interactive property maps and implemented real-time features like live availability updates and instant messaging for enhanced user interaction.

Placements, Internships, Entrances (PIE) | C#, .Net, React, MySQL, Github

- Developed a dynamic web application enabling users to independently access information on placements, internships, and higher education opportunities. Leveraged ASP.NET for back-end development and used React on the front end.
- Implemented authentication and authorization using ASP.NET Identity and ensured role-based access control for the users and integrated third-party APIs for real-time data updates, improving the accuracy and relevance of placement Information.

EDUCATION

Indiana University Bloomington

Masters of Science in Computer Science (GPA: 4.0 / 4.0)

IN, United States

Aug 2023 – May 2025

Osmania University

Bachelors of Engineering in Information Technology (GPA: 8.76 / 10)

Hyderabad, India

Aug 2017 – May 2021

ACHIEVEMENTS

- Certificate of Academic Excellence from Indiana University Bloomington for outstanding achievement as a master's student in the Luddy School of Informatics, Computing, and Engineering.
- Received a Gold Medal for being one of the university top rankers in my undergraduate studies from Osmania University.
