EDUCATION

University of Missouri - Kansas City, Kansas, MO

Master of Science, Computer Science

Aug 2023-Dec 2024

CGPA: 3.50/4.0

Vignan's Foundation for Science, Technology and Research, Guntur, India.

Jun 2016-Apr 2020

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.89/10

TECHNICAL SKILLS

- **Programming Languages:** Java, C, C++, Python, JavaScript, SQL.
- **Web Technologies:** HTML5, CSS3, JavaScript, TypeScript, jQuery, React.js, Spring Boot, Spring Cloud, Microservices, Rest API, Node.js.
- **Database Management:** MYSQL, SQL Server, Oracle MongoDB, PostgreSQL, Complex SQL queries, Triggers.
- **Cloud Services:** AWS (EC2, S3, SNS, Lambda), Google Cloud Platform (GKE, Cloud Storage), IAM, Amazon RDS, VPC, Azure.
- **Linux Security and OS Administration:** File System Permissions, User Access Controls, Groups, Boot Process, File Systems, Issue Trouble Shooting, Spring Security, Microservices, RESTful web services, Windows, Linux.

PROFESSIONAL EXPERIENCE

Project Engineer at Wipro Limited Bengaluru, Karnataka, India

Jun 2020 – Nov 2023

Skills (Java, JavaScript, Spring Boot, React.js, Angular, Rest API's, AWS)

- The **Cloud-Based Telecom Billing System** streamlines **subscription management, billing, and payment processing** for telecom providers. It enables users to **choose plans, monitor data usage, and receive automated invoices**. Developed with **Java, Spring Boot, and React**, the system follows a **microservices architecture**, ensuring **scalability and easy maintenance**.
- To safeguard access, it employs **JWT authentication and OAuth2**, while **role-based access control (RBAC)** manages user permissions. Payments are processed through **Stripe/PayPal**, and invoices are securely stored in **AWS S3**. Real-time **usage monitoring and analytics** are provided via **WebSocket's**.
- The system is hosted on **AWS (EC2, S3, RDS, Lambda, CloudWatch)** for **high availability and cost optimization**. Performance is improved using **Redis caching, lazy loading, and API rate limiting**. **CI/CD pipelines with Docker, Kubernetes, and Terraform** enable smooth deployments, while **advanced security measures** protect against **XSS, CORS vulnerabilities, and data breaches**, ensuring a **secure and reliable** platform.

Technical Support at UMKC

Aug 2023 – Dec 2024

Skills (Network Protocols, OS Administration, Linux Security, Documentation and SOP'S)

- Demonstrated expertise in web development, application security, and debugging, ensuring optimal user experiences and strong data protection. Collaborated with cross-functional teams and clients to design scalable web applications, optimize performance, and implement best coding standards. Provided technical assistance, enhanced documentation, and improved both front-end and back-end features for more efficient and responsive web solutions.

ACADEMIC PROJECTS

Serverless Image Processing Application

- Create a serverless application utilizing AWS Lambda, API Gateway, S3, and DynamoDB for image processing. Users upload images to S3, triggering Lambda for tasks like resizing or filtering. Processed images are stored in S3, with metadata saved in DynamoDB for management.

Digital Library Management System

- A web platform for users to borrow, return, and search books, while tracking borrowing history. Admins manage book inventory, add titles, and generate reports. The system integrates a relational database and Java-based GUI.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate SAA-CO3
- Hacker rank Certified – Java & SQL
- Udemy Certified – The Complement Web Developer Bootcamp
