WORK EXPERIENCE

Applied Materials, Santa Clara, CA - Software Engineer - Contract

April 2025 – August 2025

- Worked on a sales forecasting model to predict future trends and identify key influencing factors by developing a decision tree model and implementing SHAP to interpret feature impact and enhance model transparency for business stakeholders.
- Designed and automated a SQL process in Databricks to populate a custom table with over 10K rows of daily data and built an interactive Tableau dashboard to help stakeholders monitor and analyze key costing insights.
- Collaborated on migrating data pipelines from Hadoop to Databricks and validated data integrity ensuring consistency and accuracy of opportunities, quotes, and contracts. Reconciled key financial metrics including revenue, bookings, and cost across multiple environments to enable accurate and reliable reporting.

ZenOptics, San Jose, CA - Software Engineering Intern

June 2024 – August 2024

- Engineered high performance REST APIs optimized with Java multithreading and hibernate to process 150,000 user records in under one minute, enhancing system performance and scalability by 25%.
- Built an automated data upload system using Python, resulting in a 70% reduction in manual workload and improved operational efficiency.
- Implemented a duplicate report detection system using a dice similarity algorithm, achieving 95% accuracy in identifying redundant data reports.

Accenture, Bengaluru, India - Associate Software Developer

September 2021 – July 2023

- Implemented proactive monitoring and alerting using Python scripts and cloud-based tools, reducing downtime by 30% and ensuring high availability of critical systems, aligning with customer needs for business continuity.
- Investigated and resolved production incidents, leveraging debugging and log analysis techniques to minimize downtime, ensuring high service availability for customers.
- Participated in Agile sprint planning and daily stand-ups, actively contributing to code reviews and ensuring high-quality software delivery, resulting in a 20% reduction in post-deployment defects and improved client satisfaction.

SKILLS

Languages : Python, Java, C, JavaScript, SQL, HTML, CSS

Frameworks : React.js, Node.js, REST API

Databases : MySQL, MongoDB, DynamoDB, Firebase

Tools : AWS, Azure, Databricks, LLM, Transformers, Salesforce, Git, GitHub, Jira, Selenium, Postman, Tableau

Certification : Oracle Certified GenAI Professional, Oracle Certified AI Associate

PROJECTS

Smart Event Scheduler App – React Native, Firebase, JavaScript

- Developed a full stack mobile application using React Native, Firebase, and Google Vision API, implementing RESTful API integrations for image-based OCR and Firebase Authentication for secure user access.
- Integrated Google Maps API to render interactive maps displaying user and event locations, with asynchronous data fetching for optimized performance and Firebase for location data storage.

Text Generation with Transformers – Python, Hugging Face, PyTorch

- Created a text generation pipeline using OpenLM-Research, optimizing performance with mixed precision training to enhance computational efficiency and reduce memory usage.
- Achieved coherent and contextually relevant text generation with an average perplexity score of 15.3, validated through extensive qualitative testing across diverse queries.

Stock Price Prediction with LSTM Neural Network – Python, TensorFlow, Keras

- Developed an LSTM model for stock price prediction, achieving a mean absolute percentage error (MAPE) of 5.2%.
- Employed techniques such as dropout and early stopping to prevent overfitting and improve generalization.

Digital Bakery Management Website – MongoDB, Express.js, Node.js, React.js

- Built a full-stack e-commerce platform for bakery products using React.js, Node.js and MongoDB, implementing secure RESTful API for user authentication, product catalog management and secure payment processing via PayPal API.
- Developed personalized recommendations using MongoDB aggregation pipeline and integrated real-time user-to-seller chat.

EDUCATION

Pace University, New York

September 2023 – May 2025

Master of Science in Computer Science | GPA: 3.9/4.0

NMAM Institute of Technology, Nitte India

September 2017 – May 2021

Bachelor of Engineering in Computer Science | GPA: 3.7/4.0
