

NAVYA REDDY

DevOps Engineer

+1 860-937-1874 | navya.reddy.mnr@gmail.com

PROFESSIONAL SUMMARY

Highly skilled DevOps Engineer with over 5 years of experience driving scalable, reliable, and secure cloud infrastructure solutions. Proven expertise in implementing CI/CD pipelines, container orchestration, infrastructure-as-code, and monitoring for enterprise-grade clients in both the U.S. and India. Adept at collaborating with cross-functional teams, reducing deployment times by 40%+ and improving system reliability. Passionate about leveraging modern DevOps tools such as Kubernetes, Terraform, GitOps, and cloud-native observability to deliver value in fast-paced, cloud-first environments.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, IAM, EKS, SNS/SQS)

Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Pulumi

Containers & Orchestration: Docker, Kubernetes, Helm, Argo CD / GitOps

CI/CD / Automation: Jenkins / Jenkins X, GitHub Actions, GitLab CI, CircleCI

Configuration Management: Ansible, Chef, Puppet

Scripting & Programming: Python, Bash, PowerShell

Monitoring & Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Loki

Logging / Tracing: ELK, OpenTelemetry, Fluentd / Fluent Bit

Security & Secrets Management: Vault, IAM policies, Kubernetes RBAC, Container security (e.g., Trivy)

Version Control / Collaboration: Git, GitLab / GitHub, GitOps practices

Other Tools: Helm, ArgoCD, Docker Compose, AWS CLI, kubectl

PROFESSIONAL EXPERIENCE

DevOps Engineer | Prudential Financial, USA

Jan 2025 – Present

- Architected and managed scalable cloud infrastructure on AWS, including EKS (Kubernetes), EC2, S3, VPCs, IAM, and load balancers.
- Implemented Infrastructure as Code (IaC) using Terraform to automate provisioning, reducing manual efforts and configuration drift.
- Built and maintained CI/CD pipelines using Jenkins X and GitHub Actions, enabling automated build, test, and deploy workflows for microservices.
- Deployed containerized applications with Docker and orchestrated them via Kubernetes, implementing Helm charts and GitOps workflows using Argo CD.
- Established automated configuration management using Ansible, ensuring consistency across environments (dev, staging, prod).
- Developed monitoring and observability stack leveraging Prometheus for metrics, Grafana for dashboards, and ELK for centralized logging.
- Integrated Vault (or other secret management) to securely manage secrets and credentials across environments.
- Collaborated with security and compliance teams to enforce IAM policies, Kubernetes RBAC, and container security scanning.
- Reduced deployment times by ~ 40% via pipeline optimizations, blue/green deployments, and canary strategies.
- Led incident response and postmortems, contributing to a 30% reduction in production-severity incidents.

DevOps Engineer | Nexova, India

Jul 2022 – Jul

2023

- Migrated legacy monolithic applications to containerized microservices using Docker and Kubernetes (EKS / self-managed).
- Managed IaC using Terraform, provisioning cloud resources in AWS and enabling reproducible environments.
- Built CI/CD pipelines using Jenkins, implementing pipeline-as-code, unit/integration test stages, and automated deployment to Kubernetes.

- Automated server and configuration management using Ansible, reducing configuration drift and manual tasks.
- Implemented Git-based workflows (GitLab / GitHub) for code collaboration, branching, and automated deployments (GitOps).
- Set up logging and metrics infrastructure using Prometheus and Grafana, enabling real-time metrics dashboards and alerting.
- Defined SLIs / SLOs for key application services and established alerting rules to proactively monitor system health.
- Conducted capacity planning, autoscaling (Horizontal Pod Autoscaler), and resource optimization to reduce cost while maintaining performance.
- Provided DevOps training and mentorship to development teams, driving adoption of best practices in CI/CD, Infrastructure as Code, and containerization.

DevOps Engineer | Accenture, India

Dec 2021 – Jun 2022

- Designed, implemented, and managed CI/CD pipelines using Jenkins and GitHub Actions, automating build, test, and deployment workflows for AWS-hosted applications.
- Automated infrastructure provisioning using Terraform and configuration management with Ansible, ensuring scalable and reproducible AWS environments.
- Containerized applications using Docker and orchestrated deployments on Amazon EKS (Kubernetes) for improved scalability and reliability.
- Monitored system performance and application health using CloudWatch, Prometheus, and Grafana, enabling proactive alerting and incident resolution.
- Implemented security best practices with IAM roles, policies, and HashiCorp Vault for secret management across AWS environments.
- Collaborated with development teams to integrate automated testing and code quality tools into CI/CD pipelines, reducing deployment errors and increasing release velocity.

AWS Engineer | Hexaware, India

Mar 2019 – Nov

2021

- Designed, deployed, and managed core AWS infrastructure for enterprise applications, including VPC, EC2, RDS, IAM, S3, and CloudWatch.
- Automated infrastructure provisioning with CloudFormation and Terraform, ensuring versioned, auditable deployments.
- Implemented CI/CD pipelines using Jenkins to build, test, and deploy applications to AWS environments.
- Built automated scripts (Python, Bash) for infrastructure maintenance, backup, monitoring, and cost optimization.
- Facilitated security best practices by defining IAM roles, policies, and encryption strategies for data at rest and in transit.
- Set up basic monitoring and alerting using CloudWatch, configured dashboards, and logs for resource utilization.
- Worked with development teams to provide on-demand environments through IaC for development, QA, and production.
- Conducted performance tuning and cost analysis, recommending and implementing right-sizing of instances, leveraging reserved instances and autoscaling.

EDUCATION

Bachelor of Technology in Computer Science – Narasaraopeta Institute of Technology, | GPA: 7.4/10

Master's in Computer Science and Technology – Sacred Heart University, 2024 | GPA: 3.5/4

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
