## WORK HISTORY

---

AI Next – (Client: Charles Schwab)  
Job Role-Python Full Stack Developer

June 2025- current  
Aug 2021 – Sep 2024

- Developed and maintained web applications using **Python, HTML, CSS** and **JavaScript** frameworks.
- Designed, developed **RESTful APIs** and microservices using **Django, Flask**, and **FastAPI** to support automation workflows and backend services.
- Built scalable backend systems with **PostgreSQL, MySQL**, and **MongoDB**, optimizing queries and indexing for high-volume transactions.
- Implemented **Kafka** and **RabbitMQ** messaging pipelines for asynchronous data processing and real-time communication between services.
- Developed responsive UIs using **React.js** and **Angular**, integrated with backend APIs for seamless end-to-end functionality.
- Containerized applications with **Docker** and managed deployments on **Kubernetes** clusters across AWS and GCP.
- Established **CI/CD** pipelines using **Jenkins** and **GitHub** Actions to automate testing, builds, and deployments, reducing release cycles by 40%.
- Enhanced system reliability by implementing caching with **Redis** and improving application performance by 30%.
- Collaborated with cross-functional teams in **Agile/Scrum** environments to deliver features aligned with business requirements.

**Environment:** Python (Django, Flask, FastAPI), Node.js, JavaScript, TypeScript, React.js, Angular, PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Kafka, RabbitMQ, Docker, Kubernetes, AWS, Azure, GCP, Git, Jenkins, Maven, PyTest, Linux.
