EDUCATION

Master of Science in Information Systems – University of Texas at Arlington (GPA: 3.5) Aug 2023 – May 2025
Bachelor of Engineering in Computer Science – BMS College of Engineering (GPA: 3.52) Aug 2019 – May 2023

PROFESSIONAL EXPERIENCE

Data Engineer Intern, Daimler Trucks Innovation Centre – Bangalore, India Feb 2023 – Jun 2023

Real-Time Telemetry ETL Infrastructure

- Engineered a low-latency ETL framework using AWS Glue and Kafka to ingest 1.2M+ daily vehicle telemetry records, reducing data delivery delays by 40%.
- Constructed scalable data models in Snowflake using DBT, driving predictive maintenance insights across connected fleets.
- Tuned Redshift configurations through smart partitioning strategies, achieving a 35% improvement in dashboard and report response times.

Power Apps Automation

- Replaced manual reporting tasks with automated workflows via Power Apps, saving over 10 hours weekly and enhancing onboarding efficiency.
- Reduced internal approval cycles by 35% through logic-based automation and streamlined process orchestration.

Data Engineer Intern, Transportech Consultants – Bangalore, India

Jun 2021 – Jan 2023

Soil Data Integration for Construction Analytics

- Developed an automated ETL workflow using AWS Glue and Redshift to ingest 50,000+ daily soil test records, reducing manual input by 80% and improving data consistency.
- Designed Tableau dashboards to monitor compaction and moisture trends, guiding engineering teams in reducing cement usage by 15% through data-backed decisions.

Operations Intelligence Platform

- Aggregated performance metrics from 150+ workers and 50+ heavy assets into Snowflake using DBT, enabling structured efficiency reviews.
- Produced real-time Tableau dashboards that identified underutilization trends, reducing monthly overheads by more than 25%.

PROJECT EXPERIENCE

NYC Citi Bike Demand Analysis

Feb 2025 – Apr 2025

- Extracted and transformed trip data from AWS S3 using Python and performed complex SQL queries to identify usage peaks, rider demographics, and underperforming stations.
- Created interactive dashboards in Tableau and conducted a stakeholder presentation summarizing key insights resulting in a proposed 19% revenue improvement plan through better station-level targeting.
- Developed forecasting models to predict high-demand periods using seasonal patterns and ridership trends, helping inform bike redistribution strategies.

TECHNICAL SKILLS

- Languages:** Python, Java, C
- Web Technologies:** HTML, CSS
- Analytics & Visualization:** Power BI, Tableau
- Databases:** SQL, MySQL, PostgreSQL
- Frameworks & Libraries:** Spring Boot, Pandas, NumPy, Hadoop, Apache Spark
- Cloud Platforms:** AWS, Azure, Google BigQuery, Snowflake

CERTIFICATIONS

AWS Solutions Architect (In Progress) — Microsoft Power BI — Tableau Desktop Specialist
