Summary

- A Seasoned Data professional with almost 5 years of professional experience. Solutions come from Strategy & Innovation, which I excel at. My passion lies in solving business problems from different domains with elegant data driven solutions. MS in Business Analytics
- Designed, developed, and maintained data pipelines to support statewide analytics and reporting initiatives. Integrated data from multiple state agencies using ETL tools and SQL, ensuring accuracy, consistency, and compliance with state data governance policies.
- Skilled in data modeling, integrating reporting components, problem-solving, and project management. Proven ability to extract insights from complex data to support business decisions and improve efficiency by automating the procedure.
- Experience in developing business requirements documents, dashboard development, and data verification and analysis.
- Experience in interpreting data and analysing data, and developing dashboards using Tableau, Microsoft Excel, and SQL in order to draw conclusions for optimized actions and strategy for the betterment of the company

Technical Skills:

Data Management: Apache Airflow

Cloud Platforms: AWS (S3, QuickSight), Google Cloud (BigQuery, Data Studio)

Statistical & Analytical Methods: Regression analysis, time series analysis, forecasting, A/B testing

Version Control & Collaboration: GitHub, Jira, Confluence

Programming & Query Languages: SQL Server, Python (Pandas), R programming

Data Analysis & Processing: Data wrangling, data cleansing, exploratory data analysis (EDA), statistical analysis, hypothesis testing

Databases: Relational Databases (PostgreSQL, MySQL), NoSQL (MongoDB)

Data Visualization & BI Tools: Tableau, Power BI, Qlik Sense, Google Data Studio

Spreadsheets & Office Tools: Microsoft Excel (PivotTables, VLOOKUP, Power Query), Google Sheets

Other: Data modelling (Star/Snowflake schema), REST API, JSON

Professional Experience:

CIVIX, State of GA, Atlanta, GA(Remote)

Jan 2024 to present

Sr. Data Analyst

Project Overview:

The Georgia Department of Community Health (DCH) and Georgia Department of Human Services (DHS) are implementing both new and existing health insurance initiatives. The system will support existing human services programs and provide hosting services for the state's Integrated Eligibility Services (IES) and Child welfare.

Responsibilities:

- Participated with stakeholders (offer management) and technical units for business requirements gathering, followed by an agile scrum approach.

- Expertise in interacting with end users, functional/technical experts, and identifying, analysing, and developing the reports that meet the business needs.
- Experienced in all activities of full life cycle implementation, including Project management, requirement analysis, Data Modeling, Design, Specification development, Reporting, Web publishing, Portal integration, Performance tuning, testing, and Documentation.
- Proficient in conducting Gap Analysis, designing data flows, and communicating the trade-off decisions on product features based on technology and customer requirements.
- Experience in gathering and writing detailed business requirements and translating them into technical specifications and design.

Environment: Python, PostgreSQL, MySQL, Power BI, Tableau, Qlik, R, MS Office, Data Manipulation, Data visualization, A/B Testing, Statistics, Trend Analysis, Predictive Modeling, Product Development and Planning

Mailabs

Oct 2022 to Nov 2023

Data Analyst

Responsibilities:

- Developed executive dashboards using Power BI, Tableau, and Excel, providing real-time insights into claims, appeals, and provider performance.
- Conducted advanced statistical and utilization analyses using SAS to support healthcare operations and regulatory reporting.
- Engineered predictive models in Python (scikit-learn, XGBoost, TensorFlow) for forecasting claims volumes and provider behaviour.
- Built scalable ETL pipelines with Apache Airflow, Talend, and SSIS, automating ingestion and transformation of healthcare data.
- Utilized Azure Data Factory and Azure SQL Database for distributed data processing and real-time reporting capabilities.
- Collaborated cross-functionally with compliance teams and operational departments to ensure Medicaid regulatory alignment.
- Maintained robust documentation (ERDs, DFDs) and conducted root cause analysis to resolve data quality and integration issues.

Environment: ETL, Python, Pandas, Github, JIRA, REST API, SQL, Tableau, AWS, PostGres, Airflow

Meesho(Offshore)

Nov 2020 to Oct 2021

QA Analyst

Responsibilities:

- Collaborated with business analysts to understand the business requirements and customer expectations, translating them into comprehensive test plans and test cases.
- Conducted API testing using Postman to ensure accurate data retrieval and integration with third-party payment gateways and logistics services. Executed regression testing to ensure that new features and updates did not disrupt existing functionality.
- Managed defect tracking and reporting using JIRA, working closely with the development team to prioritize and resolve issues.
- Conducted usability testing to evaluate the user interface (UI) and user experience (UX), providing feedback on design improvements to enhance customer satisfaction.

Environment: Windows 10, Ubuntu, Selenium, JIRA, TestRail, Postman, Java, SQL, JavaScript, Agile (Scrum), Git, Bitbucket, PostgreSQL

Education:

- **Master of Science degree in Business Analytics + Working** May 2024
Sacred Heart University
- **Bachelor of Science** Oct 2020
Villa Marie Degree College (Women)

Certification:

Currently pursuing in sequence

- AWS Certified Solutions Architect – Associate
- Google Cloud Certified – Professional Data Engineer
- Google Cloud Certified Associate Cloud Engineer
