

Neha Puvvada

Java Full Stack Developer

(469) 797-9142 | neha.puvvada12@gmail.com | [nehap12](#) | Texas, USA

SUMMARY

- 5+ years of experience in designing, developing, and deploying enterprise-level applications using Java/J2EE, Spring Boot, Spring MVC, and Microservices architecture.
- Proficient in front-end development with JavaScript, Angular, React, HTML5, CSS3, and jQuery, delivering responsive and interactive user interfaces.
- Strong expertise in cloud platforms (AWS, Azure) with hands-on experience in deploying applications on EC2, S3, Lambda, CloudFront, and managing scalable, distributed systems.
- Skilled in working with databases (Oracle, MySQL, SQL Server, MongoDB, Cassandra), including schema design, data modeling, and query optimization.
- Adept at DevOps practices, implementing CI/CD pipelines with Jenkins, Maven, Git, and Docker, ensuring efficient build, testing, and deployment automation.
- Experienced in Agile/Scrum environments with strong knowledge of TDD, automation testing (Selenium, JUnit, TestNG, Cucumber), and delivering high-quality software solutions.

SKILLS

- **Methodologies:** SDLC, Agile, Waterfall, SCRUM
- **Languages & Frameworks:** Java/J2EE, Spring Boot, Spring MVC, Hibernate, JSP, Servlets, Struts, JavaScript, TypeScript, AngularJS, jQuery, AJAX, HTML5, CSS3.
- **Frontend:** Angular, React, JavaScript, TypeScript, jQuery, AJAX, HTML5, CSS3
- **Databases:** Oracle, MySQL, SQL Server, DB2, MongoDB, Cassandra.
- **Cloud Platforms:** Amazon Web Services (EC2, S3, Lambda, CloudFront, Elasticsearch).
- **DevOps Tools:** Jenkins, Bamboo, Maven, Ant, Git, SVN, CVS, Chef.
- **Testing Tools:** Selenium WebDriver, JUnit, TestNG, Cucumber, JMeter, QTP.
- **Other Tools:** Eclipse, IntelliJ IDEA, JIRA, Quality Center, SoapUI, Liquibase.
- **Operating Systems:** Linux, Unix, Solaris, Windows

EXPERIENCE

Client: Goldman Sachs

Role: Java Full Stack Developer

Jun 2022 – Present

- Designed and developed microservices using Java 11, Spring Boot, and RESTful APIs, ensuring scalability and fault tolerance in financial applications.
- Built and enhanced front-end modules using React, Angular, JavaScript, TypeScript, HTML5, CSS3, and jQuery, delivering responsive and interactive user interfaces.
- Deployed applications on AWS Cloud leveraging EC2, S3, Lambda, CloudFront, RDS, and Elasticsearch, ensuring high availability and secure access.
- Implemented event-driven architectures by integrating Apache Kafka for high-throughput messaging and real-time data streaming.
- Configured and maintained CI/CD pipelines using Jenkins, Maven, Docker, Kubernetes, and Git, automating builds, testing, and deployments across environments.
- Performed database operations using Oracle, MySQL, SQL Server, and MongoDB, optimizing queries, indexes, and stored procedures for high performance.

- Applied Test Driven Development (TDD) and executed automated test cases using JUnit, TestNG, Selenium WebDriver, and Cucumber, improving code reliability.
- Used logging and monitoring tools such as Log4j, Kibana, and AWS CloudWatch for debugging, performance tracking, and incident resolution.
- Collaborated with business analysts, QA teams, and stakeholders in Agile/Scrum ceremonies, delivering sprint goals within timelines.
- Followed DevOps practices by integrating containerized applications with Docker and Kubernetes, ensuring consistent deployments across dev, QA, and production environments.

Client: Coforge

Role: Software Engineer

Jan 2020 – Dec 2021

- Developed enterprise applications using Java 8, Spring MVC, Hibernate, and Struts, implementing modular and reusable components.
- Created and consumed SOAP and REST web services using JAX-RS, Jersey, and JAX-WS, enabling seamless integration with upstream and downstream systems.
- Built dynamic and user-friendly UI modules with AngularJS, JavaScript, jQuery, AJAX, HTML5, and CSS3, improving client-side performance and usability.
- Deployed applications on Microsoft Azure Cloud, leveraging App Services, Azure SQL Database, Blob Storage, and Azure DevOps pipelines.
- Designed and executed SQL queries, stored procedures, triggers, and indexes in Oracle and MySQL databases, improving data access and application performance.
- Implemented CI/CD automation using Maven, Jenkins, and Git, ensuring smooth and reliable deployments across multiple environments.
- Wrote and executed unit and integration tests using JUnit, Selenium, and TestNG, applying TDD and Agile best practices to improve code coverage.
- Applied log management and monitoring using Log4j, Splunk, and Azure Monitor to detect errors and improve application stability.
- Participated in Agile/Scrum ceremonies including sprint planning, daily stand-ups, backlog grooming, and retrospectives, contributing to faster delivery cycles.
- Followed DevOps practices by integrating version control (Git, SVN), build tools (Maven, Ant), and configuration management, reducing release time and errors.

EDUCATION

Master of Science in Computer Science

University Of North Texas

Certificates

- AWS Certified Solutions Architect – Associate (2024)
- Oracle Certified Professional, Java SE Programmer (2021)
