

Neharika Muppala
.Net Full Stack Developer

+1 (316) 559-9858

neharikamuppala96@gmail.com

Professional Summary:

- Around **6 years** of professional experience as software developer in all stages of **SDLC (Software Development Life Cycle)** including Requirements Analysis, Design, implementation, Build, Debugging and Testing, Acceptance, Maintenance and Production Support.
- Extensive experience of designing and developing software applications with the **C#, .NET Framework (4.6.2/4.0), ASP.NET MVC 6.0/5.0, Win Forms, ADO.NET, AJAX, LINQ, DAPPER, WCF, WPF, CSS, Web Services, IIS 7.0/6.0, Reporting Tools, JavaScript, TypeScript, JQuery, XML, Angular JS, Angular 2+, Bootstrap, Telerik Controls.**
- Worked on Microsoft Azure Cloud with PaaS and IaaS Model Services such as App Services, Virtual Machines, Storage, SQL Databases, VNets, Security Groups, **ARM, PowerShell, Azure AD, Load Balancers, Monitoring with Log Analytics, Application Insights.**
- Experience in building Web services using Web API and performing **CRUD** operations using REST API.
- Experience in creating interactive web application using AngularJS, **Angular 13, HTML5, CSS, Bootstrap, JavaScript, jQuery, AJAX.**
- Experience in MVC (Model View Controller) architecture with ASP.NET framework and Microsoft.Net Design Patterns.
- Expertise in designing and developing web-based and windows-based applications in Visual Studio using **ASP.Net, C#.Net, ADO.Net, Entity Framework, LINQ, Web Services, VB Script, JAVA Script, HTML, XML.**
- Extensive working experience with different methodologies like Agile and Waterfall.
- Designed and developed RESTful apis and Web Services for clients with the Microsoft Web API framework.
- Good command in the OOPS concepts like Inheritance, Polymorphism, Abstraction, Interfaces, Exception Handling, Partial Classes, SOLID principles. and also in depth knowledge in 3 - Tier, N-Tier architecture pattern that include (Presentation tire, Logical Tire and Data Tire)
- Experience in designing and implementing infrastructure as code and **CI/CD pipeline** for deployments of web applications.
- Implemented .NET Security features such as Authentication & Authorization using Form-based and Window-based Authentication, Authorizing Users, Roles and User Account Impersonation.
- Built Single Page Applications (SPA) in Angular 13 using Typescript and modelled Responsive Web design (RWD) using CSS 3 Media Queries and Bootstrap.
- LINQ experience to work with Datasets, Objects, Entities as well as **ADO.NET** Entity Framework.
- Developed, Configured and Deployed a variety of .NET Framework Applications including Web Forms, Web Services and Console applications.
- Experience in designing and developing Microservices for the business components using .NET framework.
- Experience with **NoSQL MongoDB** in working with collections, indexes, shards and other database management tasks.
- Exceptionally well organized, strong work ethics and willingness to work hard to achieve Client objectives.
- Effective team player with an aptitude to learn and ability to prioritize, organize and accomplish multiple tasks, both as part of a team and independently.
- Involved in development of application on azure server by creating packages through Visual Studio, Power shell and Azure Portal
- Developed User Interfaces for Applications using WPF, Silverlight, and jQuery.

Technical Skills:

Programming Languages	C#.Net 7.2/6.0/5.0/4.0/3.0, VB.Net 10.0/9.0/8.0/6.0, Agile / Scrum PL/SQL, C#, ReactJS, SQL, Angular 9 -6 and JavaScript
Web Technologies	ASP.NET 4.7/4.5/4.0/3.5/2.0, C/C++, ASP.Net Ajax 3.0/2.0, JavaScript, JQuery, .Net 4.5 framework (MVC). Identity and Access Mgmt. (MFA), Angular JS, NodeJS, ReactJS, Knockout JS and MVC 5.0/4.0/2.0
XML Technologies	XML, XAML, XDOCUMENT
Middleware	Web API, ADO.NET 4.0/3.5, Web Services, Rest API, WCF, ASMX, SOAP
Other tools	PuTTY, Tibco Gems, Kafka, Kibana
IDE Tools	Visual Studio 2017/2015/2013/2012/2010/2008, SQL Server Management Studio17.8/17.0/16.5/16.3
Databases	MS SQL SERVER2017/2016/20142012/2008, COSMOS DB, Oracle 12c/11g/10g
Servers	Windows 2012/2008, Microsoft IIS (8.0/7.0/6.0/5.0)
Middleware	ADO.NET4.0/3.5/3.0/2.0, MSMQ, Web Services, Enterprise Library 4.1/3.1
Software Methodologies	Agile Methodology using Scrum, Waterfall methodology
Version Control Tools	Team Foundation Server (2017.2015, 2012, 2010), Tortoisies 1.10, Git

Professional Experience:

T-Mobile, Atlanta,GA
.Net Full Stack Developer

Aug 2024 to Present

Responsibilities:

- Involved in gathering all requirements from the client and provided expertise advice for better enhancement of the application
- Worked on Agile Methodology to achieve smooth collaboration between self-organizing, cross-functional teams.
- Developed front-end project using HTML5, CSS3, jQuery, JavaScript, Angular 11, TypeScript and Ajax. Supported with C#, ASP.NET Web API.
- Created Typescript reusable components and services to consume REST API's using component-based architecture provided by Angular 11.
- Applied Angular 11 modules lazy loading, create decoupled custom modules to hold its specific modules and applied keyword Load Children in the routing paths.
- Applied Angular 11 Form Validation to do input form validation and using Form Builder, Form Group, Form Control and Validator, using NgIf and NgClass to display the errors or hints.
- Applied Single Page Application (SPA) to develop the project applying the Angular Router and Injectable Data Service.
- Worked on the ASP.NET Web API to create Restful service and consuming it to return managed JSON response/result. Consumed Restful web service for GET, POST, PUT and DELETE, the CRUD methods.
- Developed Business logic layer by implementing Object Oriented Programming languages concepts, abstraction, encapsulation, inheritance, polymorphism in C#.
- Established communication between different applications running on same/different platforms using WCF.
- Applied different kinds of custom filters using Angular 11 Pipe Module in the project for filtering the dataset and provide the data format that user wants.
- Applied server-side Authentication OAuth 2.0 in ASP.NET Web API by using the nugget package ASP.NET Web API Owin.
- Used Entity Framework Database first to generate models from the database, and used T-SQL to create triggers, stored procedures and Functions in the database.
- Used LINQ to retrieve information from the data files and various data sources.
- Implemented Unit Testing at each level of application development. Performed unit testing using tool NUnit and system testing.
- Involved in all the phases of Software Development Life Cycle (SDLC) including Requirements gathering, Designing, Programming, Testing and Documentation of various projects.
- Used AGILE SCRUM methodology to deliver in sprints and Status Meetings, Code Review Meetings.
- Developed the landing pages of the application with HTML and CSS along with jQuery for custom animations.
- Responsible for developing reusable Partial Views which can be used across multiple pages for having common layout and look and feel to all the controls.
- Implemented CRUD (Create, Read, Update, Delete), sorting, filtering and paging functionality using Entity Framework in ASP.NET, MVC 5.
- Used Controller actions to implement Get and Post and return Razor HTML to View through Action Results.
- Created REST Web API web services to post and consume data between SQL database using C# MVC 5 application.
- Implemented Entity Framework with Code First Approach to retrieve and manipulate the data from the database using LINQ queries.
- Implemented Data Access layer using ADO.NET Entity Framework by using ADO.NET objects such as Data Reader, Data Set, Data Adapter and Data View to communicate with the SQL Server Database and to access, update the data in the database.
- Developed various Stored Procedures for the data retrieval from the database and generated different types of reports using SQL Reporting services (SSRS).
- Implemented authorization, authentication, and extensive exception handling.

Environment: Net Framework 4.7, C#, .Net Core 3.0, SQL Server, JavaScript, jQuery, Bootstrap, HTML, CSS, JSON, Web API, MVC MS Visual Studio 2019/17, TOAD, SSRS, Azure, TFS.

Micron - Hyderabad, India
.Net Developer

Jan 2020 to April 2023

Responsibilities:

- Involved in the complete Software Development Life Cycle including Analysis, Design, Implementation, Testing and Maintenance.
- Converted the application to Microsoft Azure Cloud Service Project as part of cloud deployment.
- Migrated SQL Server database to Microsoft Azure SQL Database and updating the Connection Strings.
- Used web services (WCF Service) to interact with data layer to access data from the database.
- Created SQL Server Tables and Complex Tables and Developed Stored Procedures, Views and User-Defined Functions those are required for the application.
- Implemented TypeScript, HTML 5, CSS 3, Bootstrap, AJAX to achieve full functionality and create a responsive web app
- Building REST Full and SOAP based WCF services to abstract and centralize common functionality.
- Extensively worked with making calls to APIs to fetch the data from the backend as JSON response and parse it on the UI for DOM/CSS Manipulation.
- Developed dynamic, user-friendly web applications using ASP.NET MVC and C#, enhancing the user experience for clients.
- Assisted in database design and optimization, implementing stored procedures and queries to improve performance and scalability.

- Involved in writing database scripts, stored procedures, triggers, views and functions in Microsoft SQL Server 2017.
- Used LINQ to retrieve information from the data files and various data sources.
- Implemented Unit Testing at each level of application development. Performed unit testing using tool NUnit and system testing.
- Developed custom charts for Credit Analytics module using PhantomJS and High Charts to generate reports in different formats
- Applied OAuth 2.0 in the ASP.NET Web API for security authentication.
- Developed modules by applying Object Oriented Programming (OOP) techniques using Polymorphism, Encapsulation and Inheritance.
- Involved in application release and responsible for defect free migration in different environments.
- Implemented SOA by building and consuming Web Services for easy sharing of data.
- Implementing WCF Services and better logging exception management support to help in the premature detection of new problems.
- Implemented front-end components using HTML5, CSS, and JavaScript, working closely with the UI/UX team to create responsive designs.
- Participated in code reviews, ensuring adherence to coding standards, and improving the overall quality of the codebase.
- Provided ongoing support and maintenance for legacy systems, addressing bugs and improving application functionality.
- Worked with WEB API's to make calls to the web services using URLs, which would perform GET, PUT, POST and DELETE operations on the server.
- Developed ASP.NET MVC application using MVC4/5 Layout with Entity Framework.
- Developed multi-tier web application with the use of Web Services Restful web services using ASP.Net Web API.
- With the concept of React Js Worked on usage metrics and also end to end events tracing for analysis purpose.
- Involved in Unit Testing for the developed .NET application using framework like NUnit.

Environment: .Net Framework 4.0, C#/VB.Net, SQL Server 2014, XML/XSLT, JavaScript, jQuery, HTML, CSS, MS Visual Studio 2017, ASP .Net, .Net Core 2.2, React JS Web forms, MVC, Web services.

CenturyLink Technologies, India
. Net Developer

August 2018 to Dec 2019

Responsibilities:

- Involved in the creation of the Software Requirement Specification and designing of various projects such as CUI, Sales Checkout, Guides Color Manager
- Developed business use cases, sequential, collaborative, activity and class diagrams for the enterprise presentation, business and data access components of the CUI system using UML
- Created many Xml/XSL templates to convert and create dynamic Html using XSL templates
- Responsible for developing ASP.NET pages using VB.NET to display the bonds, CDS and loan data based on the industries and sectors
- Involved wrapping security throughout the application to allow business users to service only customers within their industry
- Designed and developed web applications using ASP.NET Core, C#, and SQL Server, ensuring applications met user requirements and industry standards.
- Collaborated with business analysts and project managers to define application requirements and technical specifications.
- Developed RESTful APIs using ASP.NET Web API, improving system integration and allowing seamless communication between internal and third-party applications.
- Designed and created models, components, modules, and services to apply client-side logic and dependency injection using Angular 7/8.
- Implemented AJAX controls for partial page updates and to decrease the response time on the pages.
- Worked with Microsoft Azure, cloud base server for hosting all our project.
- Developed Unit Test Scenarios and tested Test Scenarios in Web methods using NUnit.
- Used GIT Repository with VS extensions for the purpose of version control and source code maintenance needs.
- Involved in development of application on azure server by creating packages through Visual Studio, Power shell and Azure Portal.
- Developed complex User Controls to support calendar based, time based and grid-based operations
- Created many test cases, testing plans and procedures for CUI as well as AE Sales Checkout systems
- Implemented unit testing and integration testing using xUnit and MSTest to ensure the stability and reliability of the application.
- Deployed and managed applications using Microsoft Azure and Azure DevOps, streamlining continuous integration and continuous deployment (CI/CD) processes.
- Participated in Agile development using Scrum methodology, attending daily standups, sprint planning, and retrospectives.
- Mentored junior developers, providing guidance on best practices, design patterns, and code review practices.
- Developed many complex store procedures to support framework-based operations
- Used CSS3, JQuery for front end user interface, JavaScript validations and animation effects for loading and user interactions
- Restructured and designed Cascading Style Sheets for uniform look in CUI and AE Checkout

- Guided and conducted many Knowledge Transfer sessions for many employees new to the team.
- Managed Tortoise SVN to maintain the source control code repository to efficiently utilize maintenance and development of the systems

Environment: VB.NET, C#, ASP.NET, Web Services, ADO.NET, JQuery, XML, SOAP, SQL, MS-SQL Server 2008, IIS, Windows Server, JavaScript, WPF, WCF, JIRA.

EDUCATION:

- Bachelor's in Computer Science From Sri Venkateswara College of Engineering.
(Visvesvaraya Technological University :- 2014 – 2018)
- Master's in Computer Science From University of Central Missouri.
(05-2023 to 12-2024)
