EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science — GPA: 3.5/4.0

August 2022 – May 2025

Atlanta, GA

EXPERIENCE

Software Development Engineer Intern

Amazon

May 2025 - August 2025

Bellevue, WA

- Deployed **AWS CloudWatch** monitoring solution onto distributed orchestration platform supporting **1,700+** applications, to streamline data processing and visualization.
- Created default metrics for all platform applications, used by **340+** development teams to monitor app health.
- Extended **Ruby on Rails** APIs to enable new real-time metrics dashboards for modeling and optimization teams.
- Built **Python/Java** wrapper library for custom metrics, and integrated it into **React**-based internal tool.

Data Science Intern

United Parcel Service

June 2024 - August 2024

Alpharetta, GA

- Built interactive dashboards in **SAP Analytics Cloud** with **JavaScript** to visualize logistics KPIs.
- Engineered **50+** live data models in **SAP Business Objects**, enabling real-time insights for operations teams.
- Optimized **SQL** queries to retrieve **10K+** real-time analytics metrics, and making the process **2.5x** faster.

Research Assistant

Georgia Institute of Technology

August 2023 - December 2024

Atlanta, GA

- Designed CNNs to detect and remove whitespace in radio recordings; trained on **20K+** augmented data segments.
- Applied model quantization with PyTorch achieving **5x** inference speedup, **75%** compression with **90%** accuracy.
- Published results in “**Cognitive Wireless Networks: Research, Applications, and Testbed**”, **IEEE World Forum on IoT 2023**.

PROJECTS

Enhanced Search for Unlabeled Packages with GenAI | *Python, Flask, React, Gemini Flash*

July 2024

- Deployed a semantic search app for unlabeled packages using **React** and **Flask**, hosted on **Google Cloud Run**.
- Improved goods categorization accuracy by **60%** with **ElasticSearch** and **Gemini 1.5 Flash**, reducing projected customer compensation costs by **\$4M** annually.
- Won **1st** place in Google Division & UPS judging at the largest UPS hackathon (**180** participants).

Two-Lane Traffic Simulator | *Python, Numpy, Pandas, Matplotlib*

April 2024

- Simulated NYC bike-sharing service operations with **80+** stations and **5K** riders, enabling analysis of bottlenecks in capacity planning.
- Created visual analytics using **Matplotlib** to present demand trends to stakeholders.

Dungeon Crawler Application | *Kotlin, Git*

August 2023 - December 2023

- Led a **6-person** development team to design a 2D dungeon crawler using OOP principles, SOLID/GRASP patterns, and JUnit testing.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, SQL, JavaScript, TypeScript, Kotlin, HTML/CSS

Frameworks: React, Flask, Ruby on Rails, Django, Next.js

Developer Tools: Git, Docker, GCP, AWS, Android Studio, IntelliJ, VS Code

Libraries: Pandas, NumPy, Matplotlib, PyTorch, Junit
