- Programming languages: C#, C++, Java, JavaScript, Python
- MYSQL, Website Building from Scratch
- Experienced in GitHub, VS Code, Turing/Linux, Google Colab
- Good with teamwork, time management, critical thinking, communication, friendliness
- Arabic Language

EDUCATION

Bachelor of Science in Computer Science
University of Arkansas, Fayetteville, AR

Expected: December 2025

CODING-RELATED EXPERIENCE

Hour of Code Volunteering

Fall 2023

- Went to elementary schools and helped children with their coding assignments.

Pacman Game (Coded in Python, Java, JavaScript)

Spring 2024

- First loaded a Pacman image to the screen, then I added some code so that I can move Pacman across the screen using my arrow keys then once that was working, I would make it animate.
- Added wall images to the screen then I coded it so that if Pacman hit a wall it would print "Pac-wall" then I coded a function for saving Pacman's previous coordinates so that I would be able to reset its location.
- For fruits I would use the same collision detection function as above and if it encounters a fruit I would remove it. I would do this by using a splice to delete it from the array I used to store all the fruits.

JOB EXPERIENCE

EXPLORE SCIENTIFIC

January 2025- Present

Shopify Intern

- **References:** s@explorescientific.com; +1 949-637-9075; danni@explorescientific.com; kent@explorescientific.com
- Did some data processing on excel.
- Worked on editing and adding links to the company's main website using Shopify.com

CHARTWELLS & CHICKEN SALAD CHICK

June 2024 - December 2024

- Memorized sanitary protocols for these jobs such as any change of task gloves are to be thrown away.
- Put food on plates, make sandwiches, put soups in cups, and sometimes help the prep-team with the cooking.

TIME MANAGEMENT SKILLS

- All assignments and their due dates would be written on a calendar.
- Created a schedule for myself, and it would include things like when to do this assignment, when to take a break and for how long and when to go back to finishing my assignments.

VOLUNTEERING

SALT (Service and Leadership Team)

2019-2020

- Joined a voluntary organization where I contributed in various ways, including serving free food to people who are poor or disabled and helped set up or organize a new campsite specifically for children with disabilities.

99 BALLOONS

2019-2020

- Volunteered to babysit and engage with children with special needs, ages 4-11. Activities included playing games like hide-and-seek and hangman, as well as coloring.

Volunteer Action Center

Spring 2025

- Helped recycle things.
