PROFESSIONAL SUMMARY

With 4 years of overall experience at Tata Consultancy Services, including 2.2 years as a Quality Assurance Analyst and 1.5 years as a Junior SOC Analyst. Demonstrated capacity to move from software quality assurance and automation to security operations by utilizing excellent analytical, scripting, and practical- solving abilities. In the SOC position, I used Splunk and QRadar to monitor and triage security alerts, look into phishing attacks, and analyze endpoint and network logs to find threats that matched the MITRE ATT&CK framework. My Previous QA experience with global client Google included test automation, debugging, and working with cross-functional teams. Recently obtained a Master's in Cybersecurity and Information Assurance, with a solid background in cloud security, incident response, network forensics, and Python scripting. A flexible and adaptable security engineer with practical experience in both defensive and development security areas.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services

Hyderabad, TG, India

System Engineer

Jan 2020 – July 2023

Project: Night Watch (Quality Assurance Analyst)

- Collaborated with senior engineers and worked as Quality Assurance Analyst in Junit Testing for client Google, delivering the tests without fail with maximum accuracy in a specified time helped me to get the “On the Spot ” Award. Regularly Interacting with Google testers using the Buganizer tool helps us to track all our daily work activities.
- Employed critical-thinking skills, excellent judgment, creativity, and innovation in solving problems.

Project: Typography (Front end developer Assistance)

- Worked as a front-end developer assistant and Junit tester for a Google client. Implemented efficiency and mitigated downtime by automating repeatable tasks.
- Assisted as a front-end developer and JUnit tester for a Google client, automating repeatable tasks to improve efficiency and reduce downtime.
- Upgraded 100+ HTML/JS elements on the Google Search page and contributed to 700+ code changes over two years, saving over 200 FTE hours.
- Conducted code reviews, mentored junior team members, and ensured code quality and consistency across the team.
- Executed 600+ functional and regression test cases for Google Search, performing UI/UX validation using internal tools like BigTest and Critique.
- Used Buganizer to log, track, and resolve defects, ensuring font behavior, responsive design, and accessibility standards were met.
- Automated test cases with Java and JUnit, reducing manual testing effort by ~20%, and led daily standups across global teams to review progress.

Junior SOC Analyst

- Monitored security alerts in SIEM platforms Splunk and investigated over 300+ security incidents including brute- force attacks, suspicious logins, phishing, and malware infections.
- Analyzed Windows event logs, firewall logs, proxy logs, and DNS logs to trace attacker behavior.
- Created custom correlation rules in Splunk using SPL to reduce false positives by 30%.
- Used MITRE ATT&CK matrix to align detection techniques and identify gaps in endpoint visibility.
- Responded to phishing attacks by extracting email headers, sandboxing attachments, and pulling IOCs.
- Performed endpoint triage using CrowdStrike Falcon and documented containment steps.
- Participated in weekly threat hunting and purple team exercises.

PROJECTS & OTHER EXPERIENCE

Loan Management with AWS

Lee's Summit, MO, USA

Jan 2024 - Mar 2024

- Tech Stack: Flask, MongoDB, Docker, AWS EC2, ECS, ECR, WAF, KMS, IAM, Secrets Manager, CloudWatch.
- Built a secure and scalable loan management system hosted on AWS using containerized microservices.
- Integrated IAM, KMS, WAF, and Secrets Manager to enforce access control, encryption, and threat protection.
- Enabled real-time monitoring and autoscaling via CloudWatch and ECS with Load Balancer.
- Delivered a high-availability, secure cloud platform for loan processing and repayment management.

Implementation of Drowsy Driver Warning System using Image Processing on Raspberry Pi.

ISRO (Indian Space Research Organisation) - NRSC, Hyderabad
, TG ,India

Jan 2019 - April 2019

- **Tech Stack:** Python, Raspberry Pi , Twilio service, camera with sensor
- Designed a technique to detect driver's fatigue, driver when drowsy alerts are given out in terms of buzzing alarm and sending the location of the driver to pre-programmed numbers immediately.
- An Android application interfaced with Raspberry Pi was developed which is used to activate GPS and GSM modules on mobile to send alerts.
- Project Description: Designed a technique to detect driver's fatigue, driver when drowsy alerts are given out in terms of buzzing alarm and sending the location of the driver to pre-programmed numbers immediately.

SKILLS

- **Programming:** C, Java, Python, JavaScript, SQL, HTML, CSS(Intermediate Lvl) , Shell scripting(Bash) , C++ (Basic)
- **Software Testing:** JUnit Testing
- **Cloud Technologies:** AWS (S3, EC2,WAF, IAM), GCP(Exposure)
- **SIEM Tools:** Splunk, IBM QRadar(Basic)
- **Endpoint Security:** CrowdStrike Falcon, OSQuery
- **Threat Intelligence & Analysis:** VirusTotal, Hybrid Analysis
- **Networking & Protocols:** TCP/IP, DNS, HTTP, SSL/TLS, VPN
- **Security Concepts:** MITRE ATT&CK, Incident Response (NIST 800-61)
- **Scripting:** Python, JavaScript, Shell scripting (Bash)
- **Tools:** Wireshark, FTK Imager, Zeek, Buganizer, Bigtest , Critique
- **Operating Systems :** Linux (Ubuntu), Windows
- **Cybersecurity Controls :** Authentication, Authorization, Encryption (TLS/SSL), Secure Boot
- **Software Development :** JUnit, CI/CD (GitHub Actions, Jenkins exposure)
- **DevSecOps Tools:** Docker, basic exposure to static code analysis tools (e.g., SonarQube, Checkov)

EDUCATION

University of Central Missouri

Aug 2023 – Dec 2024

Master's in Cyber Security and Information Assurance

GPA: 3.5

- Information Assurance, Cloud Security, Network Forensic, Computer Networking Security, HIPAA, ML & Data Analyst

Methodist College of Engineering and Technology (Osmania University)

Aug 2015 – July 2019

Bachelor's in Electronic and Communication Engineering

GPA: 3.04

- Relevant Coursework: Matlab, Electronics , Circuit Design and VLSI Design and Signal Processing , Embedded C.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** **CompTIA Security+**
