Professional Summary

Motivated Computer Science graduate with a strong foundation in software development, algorithms, and data structures. Proficient in programming languages such as Python, Java and C++, with experience in collaborative projects and database management. Known for problem-solving, leadership, and communication skills developed through academic projects and professional experience as a Resident Assistant. Seeking a full-time position in the tech field to apply technical skills and contribute to innovative solutions in a growth-oriented environment.

Data analysis professional prepared for analytical roles. Proven ability to extract and interpret data to support business decisions. Known for strong collaboration and adaptability to changing project needs. Proficient in SQL, Excel, and data visualization tools.

Skills

- Skilled in software development using Python, Java, and C++
- Database administration using SQL
- Network Protocols (TCP/IP, DNS, HTTP)
- Leadership & Collaboration
- Problem Solving & Critical Thinking
- Excel functions
- Data cleaning
- Python programming
- Big data analytics
- Predictive modeling

CERTIFICATIONS

Cyber Security Professional CompTIA Security+ Sept. 2025

Experience

Data Analyst Intern, 06/2025 to Current

North American Division – Columbia, MD

- Developed interactive dashboards and visual reports using Power BI, Zoho Analytics, and Excel to support business decision-making across multiple departments.
- Responsible for collecting, cleaning, and analyzing large datasets to identify trends and actionable insights.

- Automated recurring data processes to improve efficiency and collaborated closely with cross-functional teams to understand their data needs and deliver tailored visualizations.
- Utilized SQL and spreadsheet tools to extract and manipulate data from various sources and presented my findings through clear, compelling visual storytelling that helped stakeholders make informed, data-driven decisions.

Education

Bachelor of Science: Computer Science

Oakwood University - Huntsville, AL

AIR QUALITY SENSOR DEVELOPMENT PROJECT

Led a team of Columbian students under Nation Builders and USAID to develop an air quality sensor. Designed and implemented sensors to detect airborne pollutants, including CO₂, SO₂, NO_x, PM_{2.5}, PM₁₀, O₃, and VOCs. Integrated meteorological monitoring (temperature, humidity, wind, and pressure) to enhance data accuracy. Contributed to the development of an app that processes and visualizes environmental data, supports policy decisions, and includes a chatbot for customized data requests. Supported environmental monitoring efforts by generating reports and aiding in economics, social, and biodiversity analyses.
