SUMMARY

Detail-oriented and organized data science professional with a strong foundation in software development and data analytics. Demonstrates excellent ability to manage multiple projects with precision. Skilled in web technologies, data analysis, and predictive modeling. Actively expanding expertise in machine learning and statistical modeling through hands-on projects and academic experience.

EDUCATION

Master's in Data Science | Recipient Dean's Scholarship: DePaul University, Jarvis College of Computing and Digital Media

Bachelor of Science (B.S.) in Information Technology: Sal College of Engineering (2016 – 2020)

High School Diploma: Swaminarayan College of Engineering

CORE COMPETENCIES

Programming: Java | SQL | C++ | ASP.NET | HTML | .Net

Tools: Microsoft Word | Excel | Windows | Visual Studio

Web Development: PHP | MySQL | JavaScript | CSS

Data Science: Python | scikit-learn | pandas | matplotlib

EXPERIENCE

Orion Touch Technologies, Ahmedabad, Gujarat

PHP Developer

April 2018 – April 2019

- **Developed a dynamic, responsive website using PHP, MySQL, HTML, CSS, and JavaScript**, following modern web standards and best practices to ensure cross-device compatibility and optimal performance.
- **Collaborated with a cross-functional team** to gather requirements, implement secure user authentication, and optimize database design for integrity and performance.
- **Managed source code with Git**, conducted thorough testing and debugging, and supported deployment and maintenance to deliver a smooth and reliable user experience

ACADEMIC PROJECTS

- **Amazon Reviews Rating Prediction:** Implemented **Natural Language Processing (NLP)** with **Python (NLTK, TF-IDF, Logistic Regression)** to analyze sentiment in customer reviews and predict ratings, enhancing text mining and classification skills.
- **Credit Card Default Prediction:** Applied Python with scikit-learn to build classification models (Logistic Regression, SVM) using billing and demographic data, sharpening skills in data preprocessing, model evaluation, and risk prediction.
- **Online Services And Maintenance**
