

Niharika Katika

Software Developer

Richardson, TX | niharikakatika07@gmail.com | +1 (469) 332 1771 | LinkedIn

SUMMARY

Software Developer with 4+ years of experience in developing full-stack web and enterprise applications using Java, Spring Boot, React.js, Node.js, and cloud-native technologies (AWS, Azure, GCP). Proven expertise in designing scalable microservices, implementing RESTful APIs, and orchestrating cloud deployments using Docker, Kubernetes, and CI/CD pipelines. Adept at working in Agile/Scrum teams, automating workflows, enhancing system performance, and building clean, maintainable codebases. Passionate about delivering impactful, user-centric software solutions in fast-paced environments.

SKILLS

Methodologies: SDLC, Agile (Scrum, Kanban), Waterfall, Test-Driven Development (TDD)

Programming Languages: Java, Python, C, C++, C#, TypeScript, JavaScript

Front-End Technologies: HTML, CSS, JavaScript, React.js, Angular, Next.js, Redux, Bootstrap, jQuery, Figma

Back-End & Web Technologies: Node.js, Express.js, GraphQL, RESTful APIs, JSON, WebSockets

Java/J2EE Technologies: JSP, Servlets, JDBC, Struts2

Spring Frameworks: Spring Boot, Spring MVC, Spring Batch, Spring Security, Spring Data JPA, Spring Cloud, Hibernate, JPA

Microservices & Messaging: Microservices Architecture, Apache Kafka, RabbitMQ, API Gateway

Databases: Oracle, MySQL, PostgreSQL, SQL Server, MongoDB, Redis

DevOps, CI/CD & Cloud: Jenkins, GitHub Actions, Docker, Kubernetes, AWS (EC2, S3, Lambda, CloudWatch, EKS, EMR, ELK Stack), Azure, GCP

Web & Application Servers: Apache Tomcat, WebSphere, WebLogic

IDEs & Build Tools: Eclipse, IntelliJ IDEA, Visual Studio Code, Spring Tool Suite (STS), Maven, Gradle

Testing & Monitoring Tools: JUnit, Mockito, Selenium, Cucumber, Jasmine, JMeter, Log4j2, Splunk, Postman

Version Control & Collaboration: Git, GitHub, Bitbucket, Jira, Confluence

Operating Systems: Windows, Linux, macOS

Concepts & Best Practices: Object-Oriented Programming (OOP), Design Patterns, Secure Coding, API Development, Performance Optimization

EXPERIENCE

McKesson, USA | Software Developer

Aug 2024 - Current

- Followed Agile Scrum methodology that included iterative application development and stand-up meetings.
- Architected and deployed 20+ microservices using Spring Boot and Spring Cloud for high-availability systems handling 500K+ daily requests.
- Implemented JWT-based authentication and authorization using Spring Security, enhancing security compliance by 60%.
- Developed responsive UI components using React.js and Redux, improving page performance and user engagement by 35%.
- Built and managed CI/CD pipelines with Jenkins, GitHub Actions, and Docker, reducing deployment time by 40%.
- Implemented React.js with Redux architecture for fetching asynchronous data from the RESTful web services.
- Implemented HTTP network requesting capabilities in an application using ReactJS Axios configurations.
- Made asynchronous tests using the testing framework Mocha with Chai libraries on NodeJS and the browser.
- Developed RESTful APIs using Spring REST to enable communication between the front-end and back-end systems.
- Lead the migration process from Action Servlets and JSPs to the Struts framework, ensuring a smooth transition and minimal disruption to existing functionality.
- Developed UI using Spring MVC framework, JSP, JSTL, HTML5, CSS, JavaScript, jQuery, AJAX, and AngularJS.
- Implemented SQL to create tables for different business logic in Oracle Database.
- Deployed Spring Boot-based microservices on Docker containers using Amazon ECS.
- Configured Jenkins to automate the build, test, and deployment processes for Java-based applications.

Infosys Limited, India | Software Developer

Project 1:

Sep 2020 - Dec 2022

- Conducted in-depth analysis of issues reported in Finacle core which includes debugging of java, stack and script traces, logs analysis, and providing solutions in product and as well in customization.
- Reconciliation fix/solutions in the script, JSP, and Java changes across versions.
- Developed and fine-tuned complex SQL queries and database schemas on MS SQL Server and Azure SQL to enhance performance and maintainability. Ensured data analytics and testing through stringent validation and encryption measures; mentored L1 support to boost database management skills and data analytical support with documentation and customer service.
- Implemented PL/SQL scripts for bulk data correction, reducing data correction time by 20% for customers.
- Collaborated with cross-functional teams to help them make important decisions based on customer usage data. Communicated results and recommendations to stakeholders and leadership, fostering cross-functional alignment and driving continuous improvement initiatives.

Project 2:

Jan 2020 - Mar 2020

- Designed and built visually appealing front-end layouts using Angular, HTML, CSS, Spring, and Bootstrap for a shopping application with market products, resulting in a 20% increase in user engagement and satisfaction in computer engineering.
- With interest, suggested and implemented designs for the look and feel of the application.
- Building middleware services for REST API calls like Get, POST, and PUT using Node JS and Express JS according to the client's requirements.
- Styling the application using CSS, Bootstrap, and material UI. Building object-oriented databases using MongoDB.
- Implemented client-side validations, navigation, and optimization and collaborated with the back-end team to integrate JSON data and restful APIs, improving functionality and seamless user experience.

Freshworks, India | Software Developer

Nov 2018 - Dec 2019

- Involved in SDLC Requirements gathering, Analysis, Development, and Testing production of applications using the Waterfall model.
- Established in Micro Services architecture and used technologies like Spring framework, Hibernate, and RESTful web services.
- Led migration of a monolithic legacy platform to a microservices-based system, resulting in 60% faster deployment cycles and improved scalability.
- Developed scalable APIs using Spring Boot and secured them using OAuth 2.0 and JWT tokens.
- Integrated Node.js backends with React.js and Angular UIs, supporting multiple client portals with unique branding and access controls.
- Leveraged Express.js to design and develop RESTful APIs in Node.js, implementing CRUD operations, request validation, and error handling.
- Developed Web Pages by using HTML5, CSS3, jQuery, and JavaScript, and working knowledge of Angular, and React.js
- Extensively used jQuery, React, Bootstrap, JSON, AJAX, and DOM scripting to create interactive web applications like message posting and auto-complete forms for secured validations.
- Orchestrated containerized applications using Kubernetes and AWS EKS, ensuring zero-downtime production releases.
- Integrated Apache Kafka for event-driven architecture, enabling real-time data processing and reducing system latency by 45%.
- Deployed the backend application and database service on AWS EC2 and put the frontend files in AWS S3 for backend fetching.
- Optimized SQL and NoSQL database queries across MongoDB and PostgreSQL, increasing API response speed by 50%.
- Automated testing using JUnit, Mockito, Selenium, resulting in 85% test coverage and reduced QA turnaround by 30%.

EDUCATION

Master in Information Technology and Management | The University of Texas at Dallas, Richardson, TX

Bachelor in Information Technology | Anil NeeruKonda Institute of Technology and sciences, India

CERTIFICATIONS

Salesforce Certified Administrator

Foundational

JavaScript

Individual Qualification

C, C++, Java certification done from Indo German Institute of Advanced Technology

SQL

Relational Database, Querying

Intermediate Python for Data Science

Pandas, Matplotlib, NumPy, Dictionaries, Control Flow

Business English Certification

Vantage
