Summary

Computer Science student at UMBC with hands-on experience in full-stack development, CI/CD workflows, and secure, role-based web applications. Built and deployed Retrievers Essentials, a Django and Vue.js-based inventory platform hosted on AWS. Skilled in Python, JavaScript, C++, and cloud technologies. Eligible for DoD clearance and passionate about building scalable, real-world software systems.

EXPERIENCE

Cognizance Technologies | Software Developer

May 2023 - Aug 2024

- Built and maintained internal tools, including an AI document analyzer and the COBRA contract management platform, using Node.js, React.js, and PostgreSQL.
- Designed RESTful APIs, secure user authentication, and document editing features.
- Deployed applications via Docker and Azure DevOps, maintaining robust CI/CD pipelines.
- Collaborated in Agile Scrum teams, managing code with Bitbucket and writing test scripts in TestComplete.

Code Ninjas | Assistant Coding Instructor

May 2022 - Aug 2022

- Taught coding basics and logic using Python, Java, and JavaScript in small-group workshops, boosting students' programming skills.
 - Introduced students to Git and basic version control, improving team collaboration efficiency.
 - Led hands-on coding sessions, helping students grasp software development principles practically.
-

PROJECTS

Contract Oversight and Business Regulatory Administration (COBRA)

- Built a contract management platform using Node.js, React.js, and PostgreSQL. Implemented features like event scheduling, secure user authentication, and document editing. Streamlined contract processing by reducing manual overhead.

Retrievers Essential Food Inventory

- Developed a full-stack inventory management system using Django, Vue.js, and PostgreSQL to track food distribution across campus. Integrated AWS for hosting and deployment. Improved checkout process efficiency by 40% through automated tracking and role-based access control.
-

EDUCATION

University of Maryland, Baltimore County

Sep 2021 - Dec 2025

Bachelor of Science in Computer Science

SKILLS

Languages: Python, C++, JavaScript, Java, C, C#, Assembly, HTML, CSS, Racket

Frameworks & Libraries: React.js, Vue.js, Node.js, Express.js, Django, .NET, Streamlit, LangChain

Databases: PostgreSQL, SQLite, MongoDB

Tools & Platforms: Git, Bitbucket, GitHub, Docker, VS Code, Eclipse, Jira, Azure DevOps, MS Office, AWS, Google Cloud

Operating Systems: Linux (Debian, Ubuntu), Windows, MacOS

Practices & Concepts: RESTful APIs, Agile (Scrum), SDLC, LLM Integration, CI/CD Pipelines, Automated Testing

Roles Experienced In: Scrum Master, Project Manager, Business Analyst, Software Developer, Full Stack Developer, Web Developer

LEADERSHIP

Google Developer Groups (UMBC) — Event Coordinator

Organized tech events like coding workshops and hackathons, collaborating on project execution.
