

PROFILE SNAPSHOT

Accomplished Full Stack .NET Developer with 4+ years of experience in delivering high-performance, scalable web applications, and cloud solutions; showcased excellence at leveraging cutting-edge technologies like Azure, .NET Core, and MVC to drive innovation and enhance user experiences, seeking to bring technical expertise and passion for problem-solving to a forward-thinking team

- Innovative Solution Architect** specializing in end-to-end application development, leveraging advanced expertise in **C#, ASP.NET Core, MVC, Web API, and microservices** architecture to craft scalable, high-performing solutions
- Proficient in dynamic front-end technologies** including Angular and React.js, coupled with robust experience in **JavaScript, TypeScript, HTML5, and CSS3**, driving seamless user experiences and responsive designs
- Expert in cloud-native development with Azure and AWS**, implementing modern DevOps practices using Docker, Kubernetes, and CI/CD pipelines to streamline deployment and ensure fault-tolerant systems
- Proven acumen in database engineering** with SQL Server and NoSQL solutions including MongoDB, optimizing data workflows for real-time, high-traffic environments
- Champion of clean coding standards and code optimization**, with proven expertise in advanced testing frameworks and debugging methodologies to enhance reliability
- Skilled in Agile team environments**, fostering collaboration, and consistently delivering tailored solutions that align with business goals
- Passionate about integrating emerging technologies** including AI/ML-driven applications and Progressive Web Apps (PWAs) to future-proof software solutions
- Recognized for designing intuitive, client-centric platforms** that blend technical precision with innovative thinking, backed by **AWS Developer & Azure DP-203 – Associate certifications**

TECHNICAL SKILLS

- Core Development:** C#, VB.NET, .NET Core, ASP.NET (MVC, Web API, WCF, RESTful, SOAP), ADO.NET, Entity Framework, LINQ, PL/SQL, T-SQL, C++, JavaScript (ES6), TypeScript, Python
- Web & UI:** HTML5, CSS3, Bootstrap, JQuery, ReactJS, Angular (JS/2+), Blazor, Kendo UI, Razor Views, MVVM, Ajax
- Cloud Platforms:** Microsoft Azure (App Services, Functions, DevOps), AWS (EC2, S3, RDS), Azure DevOps, Azure Storage, AWS Lambda
- Database Technologies:** MS SQL Server (2012-2017), Oracle, MySQL, MongoDB, NoSQL, SSIS, SSRS, SSAS, Dapper
- Mobile Development:** Xamarin, React Native and **Web & Microservices:** ASP.NET Core MVC, Web API, REST, SOAP, GraphQL, WCF
- Design Patterns & Practices:** MVVM, Singleton, Factory, Repository, Dependency Injection, SOLID Principles
- Version Control & CI/CD:** Git, SVN, TFS, Jenkins, Azure DevOps, MSTest, NUnit, Postman
- Tools & Practices:** Docker, Kubernetes, CI/CD Pipelines, Jenkins, Azure DevOps, Git, TFS
- Job Scheduling:** Quartz Scheduler and **Automation:** PowerShell, YAML for CI/CD pipelines
- Business Intelligence:** SSRS, SSIS, SSAS, Crystal Reports, Power BI
- Reporting Tools:** SQL Server Reporting Services (SSRS), Crystal Reports, Power BI
- Testing Frameworks:** NUnit, MSTest, Jasmine, Karma
- APIs & Integrations:** RESTful APIs, WebSockets, JSON, XML, WSDL, UDDI
- Web Servers & Application Servers:** IIS 6.0/7.0/7.5, Microsoft Office Server, Web Hosting
- Software Tools:** Visual Studio, Visual Studio Code, GitHub, Bitbucket, Jenkins, Jira, Slack

CORE COMPETENCIES

- End-to-End Development
- Problem Solving & Debugging
- Agile Methodologies
- Cross-Functional Collaboration
- Client-Focused Approach
- Version Control Management
- Code Optimization & Refactoring
- System Integration
- Quality Assurance
- Responsive Web Design
- Client Relationship Management
- Conflict Resolution
- Project Management
- Team Leadership & Mentorship

SOFT SKILLS

- Collaboration & Teamwork
- Adaptability & Flexibility
- Communicator
- Time Management
- Attention to Detail
- Critical Thinking
- Creativity & Innovation
- Analytical Thinking

EDUCATION & CREDENTIALS

- Masters in Computer Science, University of Central Missouri.**
- Bachelors in Computer Science, Jawaharlal Nehru Technological University.**

CAREER CONTOUR

Jul'23-Present: Fifth Third Bank, Cincinnati, OH as Full Stack .Net Developer

Key Result Areas:

- Engineering dynamic, responsive web applications** using .NET Core, C#, and Angular, ensuring seamless user experiences and optimized performance across diverse platforms

- **Developing and maintaining robust APIs and web services** using RESTful principles, streamlining data integration, and enhancing system interoperability
- **Spearheading database design and optimization** on SQL Server and Entity Framework, achieving up to 30% improvement in query execution times
- **Implementing agile methodologies for end-to-end software development**, fostering collaboration between cross-functional teams to meet project milestones ahead of deadlines
- **Enhancing application security** by incorporating authentication and authorization mechanisms, including OAuth and JWT, ensuring compliance with global security standards
- **Crafting reusable components and libraries** for scalable front-end development, reducing development time for subsequent projects by 25%
- **Optimizing deployment pipelines using CI/CD tools** including Azure DevOps and Docker, ensuring zero-downtime releases and faster iterations
- **Conducting rigorous unit and integration testing** with NUnit and Selenium, achieving a 98% bug-free release rate and improved overall software reliability
- **Collaborating closely with stakeholders** to translate business requirements into technical solutions, delivering user-centric applications that exceeded client expectations
- **Mentoring junior developers**, fostering technical growth, and cultivating a culture of continuous learning within the development team

Key Highlights:

- **Streamlined core banking operations** by developing and deploying high-performance applications using C#, ASP.NET MVC, and WebAPI, resulting in a 15% increase in transaction processing speed
- **Successfully migrated critical financial systems to Azure cloud**, enhancing scalability, security, and cost-effectiveness, reducing infrastructure costs by 10%
- **Enhanced user experience** by designing and developing intuitive front-end interfaces for financial services using ReactJS, AngularJS, and modern web technologies, increasing user engagement by 20%
- **Optimized database performance** by leveraging Entity Framework and ADO.NET to efficiently manage financial data in SQL Server and Oracle, reducing query execution times by 15%
- **Delivered high-quality software** by implementing test-driven development (TDD) within an Agile framework, ensuring on-time project delivery and exceeding client expectations
- **Successfully integrated third-party APIs and services** to enhance functionality and streamline business processes within financial applications

Sep'22-Jul'23: Cleveland-Cliffs Inc, East Chicago, IN as Full Stack .NET Web Developer

Key Highlights:

- **Delivered high-performance full-stack solutions**, driving end-to-end development using .NET Core, ReactJS, and AngularJS, optimizing user experience and system scalability
- **Engineered seamless API integrations (RESTful & SOAP)**, enhancing interoperability between critical enterprise systems and accelerating business operations
- **Pioneered cloud deployments on Azure and AWS**, ensuring resilient, scalable applications and improving infrastructure reliability and uptime
- **Led successful data migrations from Oracle to SQL Server**, streamlining data management processes and reducing transition times
- **Strengthened application security with JWT authentication**, ensuring robust user access controls and secure transactions across distributed systems
- **Spearheaded Agile Scrum teams**, consistently delivering high-quality features within sprint cycles, exceeding client expectations and accelerating time-to-market
- **Elevated code quality and deployment efficiency** through advanced CI/CD practices using NUnit, Azure DevOps, Jenkins, and GIT, achieving a reduction in build times
- **Architected modular, scalable systems** using MVVM patterns and dependency injection, improving system maintainability and reducing technical debt

Jun'18-Aug'21: DBS Bank, India as Full Stack.NET Developer

Key Highlights:

- **Developed high-performance web applications** using C#.NET, ASP.NET MVC, and SQL Server, resulting in a 15% increase in user satisfaction
- **Architected and implemented robust frontend solutions** with AngularJS and JavaScript, significantly improving user engagement and reducing bounce rates by 10%
- **Optimized database performance** by designing and implementing efficient database structures with SQL Server, including Views, Functions, Triggers, and Indexes, leading to a 20% decrease in query response times
- **Enhanced application security** by implementing robust authentication and authorization mechanisms (ASP.NET Forms Authentication, Role-based Authorization), minimizing security vulnerabilities
- **Successfully collaborated with diverse teams**, including researchers and engineers, to deliver integrated solutions that met critical business objectives
