EXPERIENCE

Software Engineering Intern

March 2024 - June 2024

Hirebird <https://www.joinhirebird.com/>

- Developed secure REST APIs on AWS Lambda integrating Phyllo SDK with LinkedIn, enabling real-time user data extraction for 10,000+ users and reducing onboarding drop-off by 25%
- Built event-driven pipelines with AWS SQS processing 5,000+ daily messages to automate document verification, implementing OWASP security best practices
- Developed responsive UI components using Radix UI, Tailwind CSS, React, and Next.js, delivering performance-optimized pages serving 50,000+ monthly visitors

Software Engineering Intern

May 2024 - December 2024

SoBet <https://sobet.io/>

- Optimized Redshift/MySQL queries handling 2M+ records and implemented New Relic monitoring, cutting report load times by 35% and reducing query timeout incidents by 60%
- Refactored complex SQL queries processing 500K+ daily transactions to identify data mismatches, improving backend data hygiene
- Partnered with cross-functional teams in agile sprints using Jira and Confluence to design data models, launch A/B tests for 100,000+ users, and reduce dashboard latency by 40%
- Enhanced event-driven data pipelines supporting 1M+ daily API calls, improving system scalability and reliability

Software Application Developer

August 2022 - May 2025

Rutgers University Finance and Administration

- Engineered automated Python data pipelines processing 600K+ supplier records across 50+ departments, cutting manual workload by 80% and improving data accuracy to 99.5%
- Built dynamic Tableau dashboards serving 200+ stakeholders with real-time insights, supporting procurement decisions and achieving \$2M+ cost savings
- Built Python scripts for Google BigQuery integration processing 10M+ records monthly, improving reporting latency by 40%

SKILLS

- **Languages & Web:** C, C++, Java, C#, Python, JavaScript, TypeScript, HTML, React, Next.js, Tailwind CSS
- **Cloud & DevOps:** AWS (Lambda, EC2, S3, API Gateway, DynamoDB, SQS), Docker, Git, Jira, Confluence
- **Data & Monitoring:** SQL, MySQL, Redshift, Neo4j, Tableau, Superset, New Relic
- **Architecture:** Event-driven systems, REST APIs, 12-factor application design, OWASP security fundamentals

EDUCATION

Rutgers University-New Brunswick (B.S. in Computer Science)

May 2025

Relevant Coursework: Data Structures and Algorithms, Systems Programming, Operating System Design

PROJECTS

AwakenSecurity (Electron, React, Ollama 3.2)

July 2025

- Built cross-platform desktop security app with real-time OCR monitoring, processing 1,000+ screenshots/minute with AI threat detection for 15+ sensitive keywords at 95% accuracy

RutgersRideshare | HackRU

February 2025

- Architected a distributed matching system using Flask, MongoDB, and Docker.
- Developed a real-time ride-matching algorithm for 5,000+ users with <100ms latency.
- Integrated backend with a React frontend via REST APIs for authentication and booking.

AWARDS AND HONORS

Excellence in Career Readiness Award – Rutgers University

Awarded April 2025 for outstanding growth in Professionalism under the NACE Career Readiness Competencies. Selected as 1 of 8 recipients university-wide. <https://careers.rutgers.edu/CareerReadinessAwards#professionalism>
