About

Data Analyst with 3+ years optimizing gig-economy platform performance; saved stakeholders 35 hours per week (40%-time savings) by automating reporting and improved user retention by 27% through real-time dashboards and A/B testing. Proficient in SQL, Python, Tableau, and Power BI, with expertise in building automated data pipelines and statistical models that increased forecast accuracy by 95%. Collaborative partner to cross-functional teams, translating complex data into actionable insights to enhance product performance and streamline operations.

Work Experience

Data Analyst · FSF Bynd · Visakhapatnam, India

Jul '20 - Aug '22

- Enhanced data quality by leading a data cleaning initiative using R and Excel, which improved overall data accuracy by 30%.
- Conducted exploratory data analysis to identify key user behaviors and trends, providing insights that directly refined product features and boosted user engagement.
- Designed and developed interactive Tableau dashboards, reducing manual reporting time by 40% and enabling faster, data-driven decision-making for internal teams.
- Collaborated with cross-functional teams to translate complex data insights into practical business strategies, directly influencing product development and marketing campaigns.
- Managed and delivered key analytics projects that led to a measurable increase in user retention and earned leadership recognition for impactful contributions to the business.

Data Analysis & Quality Assurance · Accenture Solutions Pvt. Ltd. · Hyderabad, India

Oct '22 - Oct '23

- Designed and automated interactive Power BI dashboards to monitor key performance indicators (KPIs), leading to a 35% reduction in manual reporting time and improved cross-functional visibility.
- Conducted in-depth analysis of large-scale datasets using SQL and Python to identify root causes of production issues, which contributed to a 15% reduction in product defects.
- Collaborated with cross-functional teams including data engineers and business analysts to optimize workflows, significantly improving testing efficiency and accelerating defect resolution.
- Developed and delivered actionable insights and data-driven reports to senior leadership, directly supporting quality assurance and continuous process improvement initiatives.
- Automated reporting functions using Excel macros and Python to create a more efficient and error-free data delivery process.

Education

Northeastern University | Master of Professional Studies

Grad Mar '26

Analytics · Grade: 3.85

Relevant Coursework: Strategic Analytics, Experimentation & A/B Testing, Data Governance, Product Metrics, Stakeholder Analysis, Data Visualization, Statistical Modeling, Machine Learning, SQL

Gandhi Institute of Technology and Management | Bachelor of Business Administration

Grad Apr '22

Business Administration

Relevant Coursework: Business Analytics, Strategic Management, Customer Relationship Management, Quantitative Methods

Honors: Graduated with Distinction

Project: Built a cost-optimization model in Excel to streamline departmental budgeting, achieving a 12% reduction in overall projected expenses.

Certification

- AWS Certified Machine Learning - Specialty
- Tableau Desktop Certified Professional
- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Certified: Azure Database Administrator Associate
- [PCEP-30-02] PCEPTM - Certified Entry-Level Python Programmer
- PL-900: Microsoft Power Platform Fundamentals
- Databricks Certified Associate

Projects

Earnings Forecasting & Risk Optimization Dashboard · Interactive dashboard to forecast earnings and optimize risk exposure Apr '24

- Built forecasting models to simulate earnings outcomes and budget impact with 95% predictive accuracy
- Created interactive dashboards visualizing risk exposure and performance scenarios, enabling data-driven decisions by 8+ stakeholders
- Delivered data-driven recommendations aligned with stakeholder goals and strategic metrics, resulting in a 24% improvement in forecast reliability

Cost Modeling & Earnings Estimation Engine · Designed a regression-based engine in SQL and Python to estimate user earnings and pricing behavior. Mar '24

- Developed SQL regression models to forecast user-level earnings and pricing behavior achieving 89% accuracy
- Improved predictive accuracy by 12% using feature selection and outlier removal techniques
- Simulated earnings-logic testing scenarios for 50+ payout cases to validate compliance and ensure payout fairness and equity.

Operational Efficiency & Workflow Bottleneck Analysis · Analyzed delivery workflows using SQL and Python to identify bottlenecks and improve operational efficiency. Aug '24

- Identified process triage bottlenecks and reduced operational lag by 38% through wait-time simulation dashboards.
- Built interactive dashboards modeling real-time delivery delays and resource constraints, supporting daily monitoring by 10+ users
- Recommended control improvements mirroring logistics optimization efforts, leading to a 25% increase in on-time deliveries.

High-Risk Scenario Prediction for Earnings Variability · Built predictive models in Python and R to flag high-risk payout scenarios and inform mitigation strategies. Aug'24

- Created classification models to flag high-risk payout scenarios, achieving 92% precision in identifying anomalies
- Delivered analysis summaries informing 3+ product allocation decisions and risk mitigation rollouts.
- Predicted cost overruns with 91% accuracy and identified internal control gaps using supervised learning

Skills

Data Analysis & Visualization Tools: Alteryx · Looker · Power BI · Python · R · SQL · Tableau

Data Analysis: A/B Testing · Data Modeling · Hypothesis Testing · Regression Models · Statistical Inference · Experimental Design

Statistical & Spreadsheet Tools: Google Sheets

Data Engineering Tools: Apache Airflow · Databricks · Snowflake · API Integration · Data Pipelines · ETL

Soft Skills: Cross-functional Collaboration · Stakeholder Alignment · Verbal Communication · Written Communication · Insight Presentation

Collaboration & Productivity Tools: GitHub · Jira · Slack

Methodologies: Agile

DataAnalysis: Knime · R-Studio(Programming Language) · Scikit-Learn · Causal Inference · Forecasting · Confidence Intervals · Experiment Design

BusinessSkills: Roadmap Influence · Success Metrics · Business Acumen · Requirements Gathering

SoftSkills: Time Management · Critical Thinking · Problem Solving

Reporting: Report Writing · Microsoft Office · Excel
