

NIHARIKA PABBATHI

Full-Stack Developer

Location: San Jose, CA | Phone: +1(408) 649-2265 | Email: pniharika0301@gmail.com | [LinkedIn](#) | Cloud Certified

SUMMARY

- **5+ years** of experience as a **.NET Full Stack Developer**, with a proven track record in delivering scalable, high-performance solutions across various industries, with expertise in analysis, design, development, deployment, testing, and support of client-server systems, Windows applications, and web services.
- Analyzed and evaluated business processes, applications, and systems to enhance efficiency and effectiveness.
- Managed back-end development initiatives using **Microservices**, architecting and implementing server-side logic with **.NET Core** and **C#**, while also excelling in **RESTful API** and **Web API** integration, resulting in significant improvements in system performance.
- Drove front-end innovation, implementing responsive and user-friendly interfaces using **HTML5**, **CSS3**, **JavaScript**, **React**, **Angular**.
- Strong **Object-Oriented programming** (OOPS) skills, extensively used in **C#** to design and develop the middle tier of the applications.
- Excelled in **RDBMS**, optimizing **SQL Server**, **PostgreSQL** and **Oracle** as well as **NoSQL** databases like **MongoDB** to enhance query performance and data retrieval efficiency. Proficient in writing optimized SQL queries, stored procedures, and utilizing ORM tools like **Entity Framework** and **LINQ**.
- Skilled in **Test Driven Development** (TDD) using frameworks like **xUnit**, **NUnit**, and **Selenium** to ensure software quality and reliability throughout the development lifecycle, with a focus on both unit and integration testing.
- Deep knowledge of cloud integration strategies, leveraging **Azure** and **AWS** services, and **DevOps** tools like **Jenkins**, **Kubernetes**, and **Docker** to establish robust **CI/CD** pipelines, ensuring efficient development workflows, streamlined deployments, and enhanced system scalability.
- Demonstrated proficiency in **GIT**, **TFS**, and **Jira**, ensuring efficient collaboration and seamless integration of changes throughout the **SDLC** using **Agile** and **Scrum** methodologies, enhancing team productivity and code maintainability.
- Demonstrated ability to mentor junior developers and collaborate with cross-functional teams using technologies such as **Confluence**, and **Slack** to deliver high-quality software solutions. Leveraged strong analytical, problem-solving, and communication skills to understand and analyze business processes.

PROFESSIONAL EXPERIENCE

Intercontinental Exchange Inc.

Atlanta, GA

Software Developer

Nov 2024 – Present

Technologies: ASP.NET Core, C#, ASP.NET Web API, RESTful web services, Microservices Architecture, MVC, Web API, Node.js, Typescript, AWS, Splunk, SQL Server.

- Spearheaded the development of a UAT-to-Production migration tool, enabling automated promotion of configuration changes across environments, improving deployment efficiency by **40%**.
- Implemented and maintained Migration Job Management and Migrator Services, supporting job submission, status tracking, and error handling, resulting in a **30%** reduction in manual deployment tasks.
- Integrated **AWS** services including **Lambda** for backend processing, **S3** for configuration storage, and **CloudWatch** for real-time logging and monitoring of migration workflows.
- Built and deployed a scalable Service Framework to support dev-only infrastructure for testing the migration tool, reducing QA cycle time by **25%** and ensuring production safety.
- Collaborated cross-functionally to implement a UAT Promotion Management Link, including UI/UX alignment with existing tools and enforcing **RBAC (Role-Based Access Control)** via custom user rights.
- Conducted a technical SPIKE and solution design for migrating mission-critical configuration data, identifying architectural gaps and streamlining the promotion process across environments with improved reliability.
- Utilizes **LLM**-powered tools to enhance code quality, streamline debugging processes, and optimize development workflows.

Texas Tech University Systems

Lubbock, TX

Software Engineer (Programmer / Analyst III)

Mar 2022 – Oct 2024

Technologies: ASP.NET Core 8.0, C#, Angular 17, ASP.NET Web API, RESTful web services, Microservices Architecture, MVC, Web API, Groovy/Grails, xUnit, SQL Server, Azure VM, Azure SQL, Azure Blob Storage.

- Led the design and development of scalable web applications using **ASP.NET Core 8.0**, **C#**, and **Angular 17**, improving platform efficiency by **40%** and enhancing user experience through performance optimizations.
- Implemented **Object-Oriented Programming (OOP)** principles and **Microservices Architecture** in the **business logic layer**, utilizing **ASP.NET Web API** to develop secure, scalable **RESTful services**. This approach enhanced code maintainability, performance, and reduced **UI** response times by **30%**.
- Enhanced **UI** maintainability by applying the **Model-View-ViewModel (MVVM)** framework in **Angular**, effectively separating UI development from business logic, leading to more scalable and maintainable code.
- Enhanced application performance and modularity by using reusable **Angular components** and state management libraries such as **NgRx**, **Akita**, and **NgXs**, reducing page load times by **25%** and improving navigation speed.

- Developed secure **authentication** and **OAuth 2.0 authorization** mechanisms, adhering to **OWASP guidelines**, enhancing data protection and system security.
- Achieved **90% test coverage** and minimized post-deployment issues through comprehensive testing with **NUnit**, **xUnit**, and automated test scripts using **Selenium WebDriver** and **C#.Net**.
- Optimized **SQL Server** performance, achieving a **20% reduction** in query response times through indexing and query tuning techniques.
- Migrated legacy **Groovy/Grails Self-Service Banner** to Campus Applications, increasing operational efficiency by **50%** and implementing a microservices architecture for improved scalability and maintainability.
- Deployed applications on **Azure**, utilizing **Azure Virtual Machines** for scalable compute power, **Azure SQL** for reliable database management, and **Azure Blob Storage** for secure data storage, improving cloud reliability by **30%**.
- Utilized **Docker** for containerization, **Jenkins** and **Azure DevOps** for CI, and **CI/CD** pipelines, leading to a 25% reduction in deployment issues and improved system integration.
- Collaborated with cross-functional teams using **Agile methodologies** (Scrum and Kanban), reducing project delivery time by **15%** and improving collaboration through continuous integration.

Graduate Assistant

Technologies: ASP.NET Core 5.0, C#, Angular 13, RESTful Services, MVC, WebAPI, xUnit, Oracle SQL, Appworx, BannerAdmin

- Developed and maintained a **Mass Update system** using **Angular 13**, **C#**, **.NET**, and **Oracle SQL**, enabling **40% faster** data management and retrieval through optimized processing of large datasets.
- Implemented file validation and error handling, improving data accuracy by **30%** and enhancing batch processing efficiency by **25%**.
- Designed responsive UIs with **Angular 13**, boosting user engagement by **20%** through dynamic design and better accessibility.
- Automated nightly chains for fee assessment using **Appworx**, reducing manual effort and increasing efficiency by **35%**.

Development Bank of Singapore

Hyderabad, India

Full Stack Developer

Sep 2020 – Dec 2021

Technologies: ASP.NET Core, Angular 10, Entity Framework, .NET Web API, SQL Server, Multi-threading, Postman, LINQ, NUnit, SSRS, Visual Studio 2019, ASP.NET Identity, OWASP, Docker, Jenkins, Kubernetes, TFS, Maven, AWS EC2, RDS, S3

- Engineered a comprehensive **risk management tool** using **ASP.NET Core** and **Angular 10**, enabling accurate credit risk assessment for transactions up to **\$100,000** for over **2,000 employees**, enhancing risk assessment efficiency by **25%**.
- Reengineered REST APIs using **Entity Framework** and **.NET Web API**, reducing turnaround times by **20%** and improving data processing performance.
- Designed and deployed a **Compute Engine** to streamline the generation of MAS Submissions reports, automating data aggregation and improving reporting efficiency by **35%**.
- Developed multi-threaded jobs for reliable data transmission to **15 downstream applications**, increasing data transfer efficiency by **20%**.
- Utilized **SQL Server**, to write and optimize complex SQL queries, and created comprehensive reports with **SQL Server Reporting Services** (SSRS) to provide actionable insights and support decision-making processes.
- Created Entity classes and managed relationships between entity classes using **Entity Framework**, and used **LINQ** to manipulate data, improving query performance and data handling.
- Developed secure role-based authentication and authorization using **ASP.NET Identity**, adhering to **OWASP security standards** and safeguarding user data with zero security breaches.
- Deployed applications on **AWS** using **Kubernetes**, leveraging **EC2** for scalable computing, **RDS** for reliable database management, and **S3** for secure data storage.
- Integrated **AWS Lambda** functions to handle serverless compute tasks, improving application responsiveness and scalability.
- Managed version control with **TFS** and automated **CI/CD** pipelines using **Docker**, **Jenkins**, and **Maven**, resulting in a **30% faster** deployment cycle.
- Created detailed documentation using **Swagger** for code, APIs, and system architecture and collaborated with cross functional teams using **GitHub** and **Jira** to ensure seamless integration of UI/UX designs.

Cipla

India

Software Developer

Feb 2019 - Aug 2020

Technologies: C#, ASP.NET MVC, React, HTML5, CSS3, JavaScript, Bootstrap, Redux, React Router, ASP.NET MVC 4.8, RESTful APIs, MongoDB, Entity Framework, LINQ, JIRA, Git, Jenkins, GitLab, CI/CD, Azure.

- Designed and implemented an automated **Patient Management System** using **C#** and **ASP.NET MVC**, resulting in a **30% improvement** in managing pending bills and reducing processing time.
- Built responsive front-end interfaces using **React**, **Bootstrap**, **JavaScript**, increasing user interaction efficiency by **25%** across devices.
- Integrated **Redux** for state management, **React Router** for navigation, improving application performance and user experience by **20%**.
- Developed **HIPAA-compliant RESTful APIs** using **ASP.NET MVC 4.8**, ensuring secure data exchange and improving patient data security and integrity by **100%**.
- Leveraged **MongoDB** for managing unstructured patient data, improving data retrieval performance by **40%** and application scalability.

- Introduced **Entity Framework** and **LINQ**, streamlining backend data processes and enhancing system efficiency by **30%**.
- Optimized the invoice processing system, reducing manual verification time by **40%** and increasing billing accuracy. Collaborated with cross-functional teams and used **CI/CD pipelines** via **GitLab** to deploy updates, improving deployment efficiency by **25%** on **Azure**.

TECHNICAL SKILLS

Programming Languages:	C#, VB.NET, C++, Java, Python, PowerShell
Frameworks & Libraries:	.NET Core, .NET Framework, Entity Framework, ASP.NET MVC, MVVM, WEB API, Dapper, Blazor
APIs & Services:	RESTful APIs, SOAP, Node.js, WCF, GraphQL
Frontend Development:	HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Angular, React, vue.js
Cloud Technologies:	Microsoft Azure Services (Azure Blob Storage, Azure SQL Database, Azure Application Gateway, Azure Load Balancer), AWS (SES, EC2, S3, SQS), SaaS
Database:	SQL Server, Oracle, Entity Framework Core, LINQ, PostgreSQL, MYSQL, NOSQL(MongoDB)
Testing:	UNIT Testing (NUnit, MSTest, xUnit), Integration, Test Driven Development (TDD)
Version Tools:	GIT, Git lab, Team Foundation Server (TFS), SVN
IDEs & DevOps Tools:	Visual Studio Code+, UML, Postman, Jira, Confluence, CI/CD, Jenkins, Maven, Docker, Kubernetes
Security:	OWASP, SSL/TLS, HTTPS, HIPAA
Operating Systems:	Windows, Linux, Unix, macOS

EDUCATION

Texas Tech University - CGPA: 3.83/4.0	Lubbock, TX
Master of Science in Computer Science	Jan 2022 – May 2023
GITAM University – CGPA: 4.0/4.0*	Visakhapatnam, India
Bachelor of Science in Computer Science	Jun 2016 – Jun 2020
