

NIHARIKA MANAM

Java Full Stack Developer

Education

University of Cincinnati - Ohio, USA (2023 – 2025)

- Computer Science / Masters

Carrer Objective

To obtain a challenging position as a Java Full Stack Developer with 4+ years of experience where I can leverage my expertise in front-end technologies like HTML5, CSS3, JavaScript, ReactJS, and Bootstrap, along with back-end skills in Java, Spring Boot, Hibernate, and RESTful services. I aim to contribute to enterprise-level applications by utilizing modern databases (Oracle, MySQL, MongoDB, Cassandra), cloud platforms (AWS Lambda, Azure), and DevOps practices (CI/CD, Maven, Gradle) for delivering scalable and secure solutions

Technical Skills

- Frontend Technologies:** HTML / HTML5, CSS / CSS3, Bootstrap, JavaScript, Type Script, jQuery, Ajax, XML, JSON, ReactJS, JSP, JSTL, Custom Tag Libraries
- Backend Technologies:** Java, J2EE, EJB, Servlets, JDBC, JNDI, JMS, JAXB, Spring MVC, Spring Boot, Spring Security, Spring JDBC, Spring Data JPA, Spring Data REST, JPA, Hibernate, JAX-RS
- Programming Languages:** C, C++, Java, SQL, PL SQL, Socket Programming
- Databases:** Oracle, MySQL, PostgreSQL, MongoDB, Cassandra, DynamoDB
- Build & Deployment Tools:** Maven, Gradle, Log4j, Apache
- Cloud & DevOps:** AWS Lambda, Azure, CI/CD Pipelines
- Testing & Debugging:** JUnit, Mockito
- Server-side Technologies:** NodeJS, Express
- IDE Tools:** Eclipse, Net beans IntelliJ, IBM RAD, ANT, Maven, STS
- Web/App/DB Servers:** IBM WebSphere, Web Logic Apache Tomcat, JBoss.

Profile Summary

- Results-driven and detail-oriented Java Full Stack Developer with extensive **4+ years** of experience in designing, developing, and deploying scalable web applications using a comprehensive technology stack.
- Skilled in front-end development using **HTML/HTML5, CSS/CSS3, Bootstrap, JavaScript, Typescript, ReactJS, jQuery, JSP, Ajax, XML, JSON**, and modern **UI/UX** design principles.
- Proficient in back-end development with **Java, J2EE, Servlets, JSP, JSTL, Custom Tag Libraries, EJB, JAX-RS, JDBC, JNDI, JMS, JAXB**, and advanced frameworks such as **Spring MVC, Spring Boot, Spring Security, Spring Data JPA, Spring JDBC, Spring Data REST**, and **Hibernate**.
- Strong expertise in **RESTful APIs, NodeJS**, and **ExpressJS** for building microservices architectures, Experienced in working with various **RDBMS and NoSQL** databases, including **Oracle, MySQL, SQL, PostgreSQL, MongoDB, Cassandra**, and **DynamoDB**, Familiar with build and dependency management tools like **Maven** and **Gradle**, logging with **Log4j**, and application servers like **Apache**.
- Adept in implementing **CI/CD** pipelines, leveraging **AWS Lambda** and Microsoft **Azure** for cloud-based deployments.
- Demonstrated ability to ensure code quality using **JUnit** and **Mockito** for unit testing. Passionate about delivering high-performance solutions, ensuring security, and following best software engineering practices in an **Agile/Scrum** environment.
- Hands-on expertise in developing **Angular2** features like Directives, Filters, and Services. Knowledge on various **Docker** components like **Docker Engine, Hub, Machine**, Compose and **Dockers** Registry.
- Experienced in **NodeJS, Express**, and developing microservices-based architectures with **CI/CD pipelines, Apache, Log4j, JUnit, Mockito, Maven, and Gradle** to ensure high-quality, maintainable code.
- Proficient in **JSP** and **JSTL** for creating dynamic, server-side rendered web pages and ensuring smooth user interactions.

- Good Knowledge on working with **OAuth 2.0** to provide authentication and authorization to **RESTful Web Services** by exchanging Access tokens. Good experience on **DevOps** tools such as **Jenkins, Gradle, GitHub, Artifactory, Ansible, and Docker**, Proficient in cloud platforms including **AWS (Lambda, S3, and EC2)** and **Azure**, ensuring seamless deployment, monitoring, and scaling of applications,
- Strong background in **Java** and **Spring Boot** for back-end development, with hands-on experience in building RESTful APIs and microservices architecture, Proficient in leveraging the **Oracle Database** for seamless integration with back-end services,
- Adept at working in agile environments, following DevOps best practices, and implementing **CI/CD pipelines** for automated deployments. Passionate about problem-solving, performance optimization, and continuous learning to deliver efficient and robust solutions, Experience with Version Control tools like **GIT, GitHub, CVS, SVN** and build tools like **MAVEN** and **Gradle** with Integrated Development Environments like Eclipse and **IntelliJ** and **STS**.

Work Experience

Mohawk Industries | Java Full Stack Developer

Johnstown, Ohio, USA

Nov 2024 - Present

Description: Mohawk Industries, Inc. is a leading global flooring manufacturer it has evolved into the world's largest flooring company, offering a diverse range of products for both residential and commercial applications, I design various modules using technologies like CSS Media Queries, HTML5, AJAX, JSON, and JavaScript. And used jQuery APIs to implement cross-domain calls and handling JSON responses.

Key Responsibilities:

- Involved in design, Development and implementation of Product Lifecycle admin site based on **MVC** architecture and Front control design pattern using **Spring MVC** Framework for Presentation tier and server-side **J2EE** technologies.
- Mainly involved in deployment activities **CI/CD** deployment and familiar with **OSE (Open shift origin)**. Also made changes in **Jenkins** Files as per the requirement of the pipeline, Implemented **REST** services using Talend ESBstudio.
- Implemented a Continuous Delivery pipeline with **Docker, Jenkins** and **GitHub** and **AWS AMI's**, whenever a new **GitHub** branch gets started. **Jenkins**, our Continuous Integration server, automatically attempts to build a new **Docker** container from it, The Docker container leverages Linux containers and has the **AMI** baked in. Converted a monolithic app to microservices architecture using **Spring Boot** using 12 factor app methodologies. Deployed, Scaled, Configured, wrote manifest file for various Microservices in **PCF**.
- Integration of **Spring** Batch & validation service in the **UI & in JBOSS & APACHE** Tomcat servers as well.
- To meet scale and availability requirements, we selected **Apache** Cassandra for Cassandra's master less architecture, ability to scale horizontally easily and quickly to meet their growing data store needs, Developed **JASPER** report to show the result after validations are performed on the test cases and maintaining several data accuracy.
- Used **jQuery** to build accordion style content, drag and drop functionality, calendar, popup and modal windows.
- Used **AJAX** to implement some customizations which required dynamic behaviour like controls dependent on user value selection on some other controls, Developed REST API's using **Spring MVC** and **spring boot**, hosted all micro services on **PCF**, Involving in building and deploying on **AWS** components like **EC2** and setting up **AWS S3** storage Objects.
- Extensively involved in developing and writing Maven build **scripts** for automated build and deployment processes.
- Worked on the modernization of a legacy and outsourced **UI** technologies used were **Angular 2/4, Angular** Materials 2, **CSS, Node JS, Express JS**, The views are programmed using **JSP** pages with the struts tag library; Model is the combination of **EJB's** and **Java** classes and web implementation controllers and Servlets.
- The **Java** Message Service (**JMS**) **API** used to allow application components to create, send, receive, and read messages.
- Developed key services for authorization and authentication in **Node** server, where we used **LDAP**. Later migrate the authentication from **LDAP** to Ping Access-**SSO** (Single Sign On) Application.
- Implemented the online application by using Core **Java**, Multithreading, **JDBC, JSP**, Servlets, and Web Services.
- Good knowledge on Amazon Web Services (**AWS**), Amazon Cloud Services like Elastic Compute Cloud(EC2), Simple Storage Service(S3), **Amazon** Simple DB, **Amazon** Cloud Watch, **SNS, SQS**, and **LAMBDA**.
- Developed the **REST** Microservices using **Java** JDK 1.8, **Scala**, on IntelliJ platform by gathering the knowledge of previous phase resources and integration with **Oracle**.

- Used **Spring MVC** architecture with **Hibernate** to implement DAO code and used **RESTful Web Services** with XML parsing to interact with other modules, Developed key services for authorization and authentication in Node server, where we used **LDAP**. Later migrate the authentication from **LDAP** to Ping Access-**SSO** (Single Sign On) Application,
- Environment:** Java, J2EE, Angular 11, Spring, Hibernate, JSP, Swagger, microservices, JSTL, HTML, CSS, JavaScript, Tomcat, XML, XSD, Linux, UML, Eclipse IDE, JDBC, PL/SQL, Maven, SVN, JMS, JUNIT, log4J.

Western & Southern Financial Group | Java Full Stack Developer

Cincinnati, Ohio, USA

Nov 2023 - Oct 2024

Description: Western & Southern Financial Group is a Cincinnati-based diversified financial services company it as a life insurance company and has since grown into a broad financial group offering a wide range of insurance, investment, and retirement products, I worked and Managed efficiently multiple tracks such as business JBoss Rules Engine, UI, and Reporting and delivered quality product on schedule

Key Responsibilities:

- Developed and maintained dynamic and responsive web applications using **HTML/HTML5, CSS/CSS3, Bootstrap, JavaScript, jQuery, AJAX**, and **ReactJS** for front-end UI development, Implemented client-server communication using **RESTful APIs** with **JAX-RS, Servlets**, and **Spring Boot**, exchanging data via **JSON** and **XML** formats.
- Created reusable components in **ReactJS** using **Typescript**, ensuring modular and maintainable code.
- Maintained version control and collaboration through **Git** and participated in **agile** development practices (**Scrum**).
- Work in progress on **POC** to migrate to Windows **Azure** to address scalability and performance issues.
- Worked in integrating **JMS** with **SPRING BOOT** by providing an instance which is embedded with Active **MQ**.
- Use **Jenkins** for continuous Integration and deployment and **Docker** for containerization.
- Strong experience on Devops essential tools like **Kubernetes, GIT, Jenkins, Ant, Maven** and deployed/managed applications to managed cloud services in Pivotal Cloud Foundry, Developed and consumed **SOAP and RESTful** web services, utilizing **JAXB, JAX-RS**, and **JMS** for asynchronous communication,
- Migrated **SOAP** webservice resources to **Spring** REST ful web services resources using **Spring** REST API with Spring Boot.
- Supported microservice authentication service provider using **Java** Cryptology Extensions' Cipher class **API**.
- Involved in designing, capacity planning and implementing multi-rack **Cassandra** cluster, Responsible for setting up **Angular** framework to achieve binding data between **HTML** and **JavaScript** objects, Supports different markets for alerts and bugs, Analyze and understand fix them, Developed applications using **J2EE, JSP**, Servlet and **Spring** Bean Classes, Implemented **Spark** using **Scala** and **Spark SQL** for faster testing and processing of data.
- Implemented **AJAX** calls from backend without page refresh using **jQuery, AJAX, J2SE, Spring MVC** and **Hibernate**.
- Converted a monolithic app to microservices architecture using **Spring Boot** using 12-factor app methodology. Deployed, Scaled, Configured, wrote manifest file for various Microservices in **PCF**.
- Collaborated with cross-functional teams including UI/UX designers, DevOps engineers, and QA teams to deliver end-to-end solutions, Used **NodeJS, React**, and Backbone.JS **MVC** framework for developing the Single Page Application

Environment: Java 8, HTML5, CSS3, J2EE, Hibernate, Spring framework MVC, JavaScript, Agile methodology, Angular 11, NodeJS, Oracle, Medidata, Python, MongoDB, MVC, GCP, JPA, Jira, Kafka, Kubernetes, Jenkins, JUnit, Maven, Log4J, Apache Tomcat, Wire transfer, Microservices, Azure

Abbott Laboratories | Java Full Stack Developer

Mumbai, India

May 2022 - Jul 2023

Description: Abbott Laboratories is a global healthcare company it has evolved into a diversified entity specializing in medical devices, diagnostics, nutrition products, and branded generic pharmaceuticals, I involved in innovation of the current UI for SASS/LESS to make an implementation under mobile device access using cross platform technologies such as Ionic which helps in improving the business.

Key Responsibilities:

- Designed and developed server-side components using **Java, J2EE, EJB, JSP, JSTL, Custom Tag Libraries**, and **Spring MVC** frameworks, Using existing old spring **MVC** application developed a new application with **Spring** Data **JPA Rest**
- Use **Git** for version control and participate in agile development methodologies such as **Scrum** or **Kanban**.
- Worked on Big Data Integration & Analytics based on **Hadoop, SOLR, Spark, Kafka**, Storm and web Methods.

- Building/Maintaining **Docker** container clusters managed by **Kubernetes** Linux, Bash, GIT, **Docker**, on GCP (Google Cloud Platform). Utilized **Kubernetes** and **Docker** for the runtime environment of the **CI/CD** system to build test and deploy, Worked on **RESTful** web services to send the data using **JSON** objects.
- Started as a monolithic application that runs on **JBoss**, later migrated it in to a set of **spring boot** and **Node, JS** Microservices, Exposed Survey **API** to other applications in **DOE** using **Apache Axis2**.
- Developed the UI Screens using **HTML5, DHTML, XML, Java Scripts, JQuery** Custom-tags, **JSTL DOM** Layout and **CSS3**.
- Built scalable and secure backend services using **Spring Boot, Spring Security, Spring Data JPA**, and **Hibernate** for database interaction, Created and managed **CI/CD pipelines** using **Maven, Gradle**, Jenkins, and integrated with **AWS Lambda** cloud services for automated deployment
- Implemented **J2EE** components using **Spring MVC, Spring IOC, Spring Transactions** and **Spring Security** modules.
- Extensively Used **Jenkins** as Continuous Integration tool to deploy **Spring Boot** Microservices to Pivotal Cloud Foundry (**PCF**) using build pack, Used S3 buckets for storing the **CSV** files and used the java **AWS SDK** to read and parse the data.
- Developed/Maintained relational database hosted on PostgreSQL, accessed by **Java** programs.
- Migrated technology from Angular 1.0 to Angular 2.0 to use upgraded features such as **Angular** Components and **Angular** Routers as per the strategy requirement, Developed the Request handler's application using Struts's framework, Used various **jQuery** and Bootstrap plug-in like date picker, **Bootstrap** selectors.
- Utilized **AWS Lambda** to optimize Backend processes and improve application performance, Good Knowledge in coded **Java** applications on both client-side and server-side using **JDBC** and advanced Multithreading.
- Involved in the creation of interface to manage user menu and Bulk update of Attributes using Node.JS and **jQuery**.

Environment: Java, Multi-threading, microservices, Hibernate, SOAP, WSDL Spring, Servlets, Multi-threading, Exceptions, IO, Collections, Generics, GIT, Struts, jQuery, SQL, HTML, CSS, JSP, LINUX, UNIX, Windows Maven, SQL, Tomcat, Oracle, JUnit, Eclipse

ICICI Prudential Life Insurance | Java Developer

Mumbai, India

Mar 2021 - Apr 2022

Description: ICICI Prudential Life Insurance Company Limited is a leading private life insurer in India, the company commenced operations in the fiscal year 2001 and has since become a prominent player in the Indian life insurance sector, I implemented Spring IOC for Dependency Injection and to make the code loosely coupled and Spring AOP for logging purposes, Secured Rest API's by implementing OAuth2 tokens-based authorization schema by Spring Security.

Key Responsibilities:

- Integrated data access layers with **Oracle, MySQL, PostgreSQL, MongoDB, Cassandra**, and **DynamoDB** using **JPA, Spring JDBC**, and **Spring Data**, Worked with **Node.js** and **Express.js** for building REST APIs and microservices.
- Involved in **CI/CD** process using **GIT**, Nexus, **Jenkins** job creation, Maven build Create **Docker** image and deployment in **AWS** environment, Created Q manager connection factory, **JMS** destinations to integrate the application using **JMS**.
- Provides intermediate level system analysis, design, development, and implementation of UI and MTs for WEB and Batch based software. Used **Spring** Core Annotations for Dependency Injection **Spring DI** and **Spring MVC** for REST API s and **Spring Boot** for micro-services.
- Extensively worked on **Spark** using **Scala** on cluster for computational, installed it on top of Hadoop performed advanced analytical application by making use of spark with Hive and SQL/**Oracle**
- Developed the view-controller components using Servlets /**JSPs, JavaScript (jQuery), CSS, HTML** and **DHTML**.
- Build and maintain **SQL scripts, indexes**, and complex queries for data analysis and extraction.
- Used **Angular** to add functionalities and effects like Accordion, Infinite Scroll bar, slider bas, **Drag/Drop**, Resizable and progress bar. Have also worked on **Java 8** along with Cold Fusion and Build **RESTful** web services using Jax-RS **API**.
- Hands-on experience with **EC2, ECS, ELB, EBS, S3 VPC, IAM, SQS, RDS, Lambda, Cloud**
- Developed **RESTful** web services by using **JAX-RS [JERSEY]** for integrating multiple systems, created and read the **JSON** objects by using **JACKSON** libraries. Implemented Struts Framework and performed **SIT, UAT**.

Environment: J2EE, Web logic Application Server, JSP, Servlets, JQuery, Struts, Hibernate, SOAP, REST, Oracle, Maven, JUnit, and Subversion, PL/SQL, HTML, CSS, JavaScript, JSTL, AWS
