

Niharika Duvvuri

Email: niharikad082@gmail.com

Ph. No: (385)204-4353

Professional Summary:

- **A Salesforce Business Analyst with more than 5 years of experience.** I focus on creating scalable **CRM solutions** improving business workflows, and bringing together stakeholders for global projects based in both India and the U.S.
- specialize in gathering requirements working with stakeholders, and delivering **Salesforce** solutions using **Agile practices**.
- created detailed documentation such as **BRDs, FRDs, and SRS** to organize project lifecycles in both **Agile** and **Waterfall** setups.
- Used tools like **JIRA** and **Confluence** to collect and organize business requirements, ensuring traceability and maintaining version control.
- Worked with **Tableau CRM** and **Salesforce dashboards** to measure **KPIs** and track how users adopt the platform.
- Used **Excel Macros** and wrote **SQL** queries to analyse data on demand and assist with data migration tasks.
- Took charge of analysing business rules and developing use cases in industries like healthcare, finance, and retail, while meeting audit and regulatory needs.
- Handled stakeholder coordination across teams like **QA, DevOps, Engineering,** and Customer Success to balance priorities and improve communication.
- Worked with design teams to prototype **UI/UX** using tools like **Figma, Miro,** and **Lucid chart** to make **Salesforce** portals easier to use.
- Ran sessions to prioritize backlogs and estimate stories while following **SAFe Agile** methods to stay in line with **business goals**.
- Arranged training across departments and wrote process guides to help with smooth product launches.
- Strong collaborator in Agile teams, improving CI/CD pipelines, test coverage, and application security. Dedicated to delivering high-quality, secure, and efficient Salesforce solutions.
- Expertise in **SDLC** methodologies including Agile, Scrum, and Waterfall.
- Strong background in system testing, **user acceptance testing (UAT), regression testing, Ad Hoc testing** and **integration testing**.
- Proficient in gathering and documenting business and functional requirements through **JAD sessions, SME interviews, workshops,** and **process analysis**.
- Created comprehensive **BRDs, FRDs, FSDs, Use Cases, Process Flows,** and **UAT test scripts,** supporting both **Agile (Scrum/SAFe)** and Waterfall SDLCs.
- Experience in change management, including developing communication plans, stakeholder engagement strategies, and training documentation.
- Led UAT and regression testing with 50+ test cases in iterative sprints, using SQL queries to validate test data and resolve 95% of defects pre-launch, ensuring a smooth go-live with zero critical issues.
- Designed business process flows using **Microsoft Visio** to support stakeholder understanding and improve development handoffs.

Technical Skills:

Skill Sets	Description
Data Base	MS Access, Oracle (SQL Series), Teradata
Tools	JIRA, Confluence, MS Project, SharePoint 2010, Lucid chart, Figma
Operating Systems	Windows 8/7, Mac, Linux
Software	MS Office Suite (Word, Excel, Access, PowerPoint & Outlook), MS Visio, Rational Rose, Rational Requisite Pro, Adobe Acrobat, MS Project, MS Office FrontPage, Lotus Notes
Performance Testing Tools	Virtual User Generator, Load Runner
BA Documentation	BRD, FRD, Use Cases, SRS, User Stories, Acceptance Criteria
Processes/Technologies	Rational Unified Process (RUP), Agile SCRUM, Waterfall, UML & Microsoft Office SharePoint
Reporting & Dashboards	Tableau, Tableau CRM, Power BI, Excel Macros
Operating Systems	Windows 11, Kali Linux, Mac, Ubuntu
Programming Languages	Python, Java, HTML & CSS, C, C++, SQL

Professional Experience:

Client: Innovative Business Concepts Inc., New York, USA

Apr 2024 - Present

Role: Salesforce Business Analyst

- Gathered and documented business requirements from 10+ stakeholders, creating **BRDs**, **FRDs** and **user stories** in Agile/Scrum environments to align technical teams and ensure delivery of key functionalities.
- Defined real-time API triggers and collaborated with Salesforce and Informatica developers to automate Guest ID validation, improving data accuracy by 30%, with **SQL** used for back-end data verification.
- Led **UAT** and regression testing with 50+ test cases in iterative sprints, using **SQL queries** to validate test data and resolve 95% of defects pre-launch, ensuring a smooth go-live with zero critical issues.
- Ran backlog reviews planned sprints and wrote user stories within **JIRA** and **Azure Boards** using **SAFe** principles.
- Designed business process flows using **Microsoft Visio** to support stakeholder understanding and improve development handoffs.
- Oversaw priority setting across teams and wrote detailed **BRDs** and **FRDs** linked to upcoming product updates.
- Guided end users through **Salesforce** updates by building easy-to-follow guides with screenshots and flowcharts.
- Created complete automation workflows in **Salesforce Flows** to handle multi-step lead qualification and case escalations.

- Developed custom dashboards and reports using **Tableau 2023.x** with embedded analytics to assist quarterly sales discussions.
- Organized API requirement discussions with engineering teams for connecting Salesforce to DHS CARES platform.
- Supported data migration for 100,000+ records, delivered user training to 60+ DHS staff, and created post-launch materials to drive system adoption and minimize support requests.
- Built custom object models and validation rules to support workflows for product warranty registration and services in the retail sector.
- Ran sandbox test cycles and handled UAT approvals from department leaders. Used Confluence to maintain project documentation for this process.
- Managed the creation of regression test matrices to guarantee smooth rollouts of Lightning feature updates.
- Guided end users through **Salesforce** updates by building easy-to-follow guides with screenshots and flowcharts.
- Identified and documented gaps in the design, offering recommendations for improvements to meet business needs and technical specifications.

Client: Isite Technologies Inc., New Jersey, USA

Jan 2023 – Apr 2024

Role: Salesforce Business Analyst

- Held sessions with compliance and operations teams to capture how **CRM** changes affect business processes.
- Assisted Project Manager in creating the Vision Document, Business Case, and Project Plan including objectives, scope, risks, and phase plans.
- Took current banking workflows and shifted them over to **Salesforce Lightning with Experience Cloud portals**.
- Set up data visibility rules and role-based access to secure client interactions while meeting financial regulations.
- Added **Tableau CRM dashboards** to **Salesforce** homepages to track loan processing stats and **SLA performance**.
- Worked with **UI/UX** and legal teams to adjust portal layouts, create consent forms, and ensure audit trails were in place.
- Built customized report types and executive **KPI dashboards** using **Salesforce Reports** and **Tableau CRM**.
- Wrote down specifications for **REST API** data exchanges between **Salesforce** and **mortgage underwriting tools**.
- Developed **UAT test scripts** and oversaw testing with **QA teams** located in different regions.
- Logged user stories and test cases in **Jira Align** and tied acceptance criteria to sprint goals.
- Designed process maps and built **Lucid chart** diagrams to outline current and future **CRM** workflows.
- Prepared suggestions to improve account onboarding steps and contact center processes.
- Partnered with developers to boost performance of Lightning Components on finance product pages.
- Led weekly stand-ups and sprint reviews to gather feedback and fix issues based on priorities.
- Coordinated with offshore teams to make sure deployments went and handled post-launch support.

- Analyzed **API payloads** in **Postman** and gave input to backend teams on versioning compliance.

Client: Department of Innovation and Technology, Illinois, USA

Oct 2021 – Dec 2022

Role: Business Analyst

- Worked with clients and internal teams to understand business needs around logistics and transportation tools.
- Prepared BRDs and SRS documents in **Microsoft Word** and **Excel** 2010, following the **Waterfall SDLC process**.
- Used **MS Visio** 2010 to create use case diagrams and process flows for tracking shipments and onboarding customers.
- Led requirement workshops with clients and development teams to finalize functional specs and set project scope.
- Partnered with developers and testers to review requirements during system testing and resolve defects.
- Used **SharePoint** 2010 to manage and share version-controlled documents with cross-functional teams.
- Tracked project milestones and scheduled tasks in MS Project providing weekly updates to the PMO.
- Documented non-functional needs like performance, scalability, and usability constraints.
- Tracked risks and issues during every project phase and kept project sponsors informed.
- Walked client stakeholders through requirements and got approvals to move phases forward.
- Joined internal QA reviews to prepare before starting **UAT**.
- Helped train users and created guides to explain how the application works.
- Wrote **SOPs** and system documents to hand over to clients and meet audit needs.

Client: Datapro Pvt. Ltd., India

Jan 2020 - July 2021

Role: Business Analyst

- Supported the business analysis team in gathering, refining, and documenting requirements related to claim processing and policy management, helping ensure clear communication between business users and development teams.
- Participated in internal stakeholder meetings to capture system pain points and identify opportunities for automation or process enhancements using structured documentation and workflow diagrams.
- Created visual summaries and business reports using Excel and PowerPoint to present key insights and operational KPIs to team leads and department heads.
- Supported backlog grooming and change request documentation efforts, helping prioritize updates to key modules based on frequency of user complaints and issue severity.
- Led requirement workshops with clients and development teams to finalize functional specs and set project scope.

- Partnered with developers and testers to review requirements during system testing and resolve defects.
 - Used **SharePoint** 2010 to manage and share version-controlled documents with cross-functional teams.
 - Tracked project milestones and scheduled tasks in MS Project providing weekly updates to the PMO.
 - Documented non-functional needs like performance, scalability, and usability constraints.
 - Contributed to internal training sessions and process documentation for new team members, capturing step-by-step workflows and simplifying knowledge transfer.
