

SUMMARY

Full Stack Developer with 4+ years of experience and a recent M.S. in Computer & Information Science from Purdue University. Skilled in building and deploying enterprise-scale applications, payment systems, and microservices. Delivered measurable results including 30% faster APIs, 50% shorter release cycles, and 99.9% uptime in production. Proficient in Java, Spring Boot, ReactJS, TypeScript, SQL/NoSQL, CI/CD (Jenkins, GitHub Actions), and cloud (Azure, AWS). Experienced in scalability, resiliency, distributed systems, high availability, monitoring, and fault tolerance. Exposure to billing systems and messaging platforms (Kafka/ActiveMQ). Passionate about developing secure, efficient, and customer-focused software in Agile environments.

TECHNICAL SKILLS

Programming & Frameworks: Java, Python, JavaScript, TypeScript, RESTful APIs, GraphQL, Spring Boot, Hibernate, Node.js, Express.js, ReactJS, Angular, JWT, OAuth2, Spring Security, Microservices
Frontend Development: ReactJS, Angular, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, AJAX, JSON
Databases: MySQL, PostgreSQL, Oracle SQL, PL/SQL, MongoDB, DynamoDB, Redis
Cloud & DevOps: Azure (App Service, SQL Database, Blob Storage), AWS (EC2, S3, RDS, Lambda, DynamoDB), Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD
Testing & QA: JUnit, TestNG, Mockito, Selenium WebDriver, Cypress, Postman, REST Assured, Cucumber, JMeter, API Testing, UI Testing, Integration Testing, Regression Testing
Monitoring & Analytics: Splunk, Dynatrace, Grafana, ELK Stack, Power BI, Tableau
Methodologies & Tools: CI/CD, BDD, Agile/Scrum, SDLC, OOP, MVC, UML, Git, Jira, Confluence, Linux, Unix, Windows

EXPERIENCE

Java Full Stack Developer

Infoway Software | Sayreville, NJ

May 2025 – Present

Project Description: Built and supported enterprise web applications integrated with Azure cloud, ensuring scalability, resiliency, high availability, and monitoring.

- Designed backend services with Java + Spring Boot, improving API response time by 30% and supporting high-volume, fault-tolerant workflows.
- Built responsive UI components with ReactJS + TypeScript, enhancing user experience.
- Automated regression testing with Selenium, Cypress, and Postman, reducing QA cycles by 35%.
- Managed CI/CD pipelines in Jenkins with Maven, cutting deployment failures and accelerating release cycles.
- Deployed applications on Azure App Service & SQL Database, achieving 99.9% uptime.
- Enhanced monitoring with Splunk/Dynatrace, reducing downtime incidents.
- Partnered with QA and product teams to define requirements, reducing defect resolution time by 20%.
- Mentored junior developers on CI/CD best practices.

Tech Stack: Java 11, Spring Boot, ReactJS, TypeScript, Azure, Jenkins, Maven, Selenium, Cypress, Postman, Splunk, Dynatrace, JUnit, TestNG, Jira

Java Full Stack Developer

Indiana University | Indianapolis, IN.

Sept 2024 – Apr 2025

Project Description: Developed a student management system to improve data accuracy, reporting efficiency, and reliability.

- Built backend services with Spring Boot + ReactJS, improving enrollment accuracy by 22%.
- Created REST APIs to manage student records, reducing manual work by 15%.
- Optimized MySQL queries, improving reporting speed by 12%.
- Developed dashboards with ReactJS, cutting reporting time by 18%.
- Improved test coverage to 82% with JUnit and Postman, reducing production bugs.
- Automated recurring reports, saving ~10 faculty hours monthly.
- Resolved high-priority production issues within SLA, minimizing student impact.

- Delivered milestones on time in Agile sprints.

Tech Stack: Java 11, Spring Boot, ReactJS, TypeScript, MySQL, JUnit, Postman, REST APIs, Agile (Scrum), CI/CD (Jenkins, Git)

Java Full Stack Intern G-Technologies Pty Ltd

Jan 2024 – Aug 2024

Project Description: Contributed to a healthcare platform for patient data management, focusing on scalability, security, and cloud deployment.

- Built modular microservices with Spring Boot + Hibernate, improving maintainability and distributed system design.
- Implemented JWT/OAuth2 authentication and RBAC, strengthening system security.
- Deployed apps on Azure with Docker, reducing deployment errors by 20%.
- Improved API efficiency with optimized MySQL queries, cutting response times by 200ms.
- Developed reusable ReactJS components, accelerating frontend delivery by 25%.
- Designed integration tests with MockMVC + JUnit, preventing regression bugs.
- Participated in Agile sprint planning and standups, ensuring timely delivery.
- Assisted in defining acceptance criteria with product owners, reducing rework.

Tech Stack: Java 11, Spring Boot, Hibernate, ReactJS 18, TypeScript, MySQL, JWT, OAuth2, Docker, Azure, JUnit 5, MockMVC, Postman, Agile (Scrum)

Software Engineer.

Mastercard

Jan 2021 - July 2023

Project Description: Developed secure, scalable payment applications for a global financial services provider, focusing on transaction processing, billing systems, and high-availability systems.

- Engineered Java + Spring Boot microservices processing thousands of daily transactions in fault-tolerant environments.
- Built responsive UIs with ReactJS + Angular, improving customer satisfaction by 15%.
- Optimized SQL/PLSQL queries in PostgreSQL/Oracle, reducing transaction times by 20%.
- Automated CI/CD pipelines with Jenkins + GitHub Actions, cutting release cycles by 50%.
- Integrated Splunk and Dynatrace monitoring, reducing downtime by 15%.
- Refactored legacy modules into microservices, reducing maintenance overhead by 30%.
- Documented APIs and workflows, reducing onboarding time by 25%.
- Collaborated with global teams across time zones to deliver compliant billing features.

Tech Stack: Java, Spring Boot, ReactJS, Angular, TypeScript, PostgreSQL, Oracle SQL, Jenkins, GitHub Actions, Docker, Kubernetes, JWT, Splunk, Dynatrace, JUnit, Mockito, Postman, Agile (Scrum), Kafka (intro)

EDUCATION

- **M.S. Computer & Information Science**, Purdue University
- **B.S. Computer Science**, Lovely Professional University
