EDUCATION

Bachelor of Technology in Electronics and communication Engineering

June 2024

APJ Abdul Kalam Technological University, Kerala, India

SKILLS

Software Tools: Power BI (DAX, Data Modeling, Dashboards), Microsoft Excel (Pivot Tables, VLOOKUP, Charts), Python (Pandas, NumPy, Matplotlib, Scikit-learn, PySpark), SQL (MySQL), HTML, CSS, PHP, Embedded C, Tableau, Web Development Basics, C, C++

Functional Skills: Data Cleaning, Data Visualization, Statistical Modeling, Database Management & Querying, Report Generation, Analytical Problem Solving, Data Modeling & Analysis, Problem Solving in Data Workflows, API Development & Integration (Flask, FastAPI, OpenAI API), Data Preprocessing & Transformation (CSV, JSON), ETL/ELT Pipeline Understanding, Model Deployment (classification, regression, NLP models), Azure AI (OpenAI), Explainable AI concepts.

WORK EXPERIENCE

Project Coordinator

January 2025- April 2025

Artic Traders, Kerala, India

- Developed a procurement system using HTML, CSS, and PHP, integrating BoM management and supplier data.
- Managed project timelines, sourcing coordination, and purchasing documentation, performed KPI reporting and cost tracking using Power BI and Excel for program metrics.
- Supported cross-functional program activities, contributed to process improvement and data analysis.

Data scientist Intern

August 2024 – December 2024

GeeksforGeeks, Bangalore, India

- Built and deployed interactive dashboards using Power BI, enhancing visibility into key performance indicators (KPIs).
- Conducted data preprocessing, cleansing, and transformation using Python and SQL to ensure data integrity.
- Integrated AI models and data workflows into backend systems using FastAPI and Flask, ensuring scalable and maintainable solutions for data-driven decision-making.

Embedded Systems Project Trainee

August 2023 – September 2023

Revertech IT Solutions, Kerala, India

- Developed and executed a real-time project integrating Arduino with various sensor.
- Collaborated with senior management to design and execute a real-time project integrating Arduino.
- Strategized improvements and prepared detailed documentation for future scalability.

PROJECTS

Digital Transformation of Wholesale Distribution: Web-Based Order Management System

Artic Traders

- Designed an intuitive user interface using HTML, CSS, ensuring seamless user experience for managing orders, viewing stock, and updating inventory in real-time, Utilized PHP to handle server-side logic, user authentication, and dynamic data updates
- Implemented a MySQL database to efficiently store and manage inventory, customer, and order details, enabling quick data retrieval and modification, integrated functionalities such as stock view and updates, order tracking, and reporting dashboards for sales analytics and performance monitoring.

AI-Powered Medical Query Assistant Using NLP and OpenAI API

GeeksforGeeks

- Built an AI-powered medical query assistant using NLP and OpenAI API (Azure AI) to analyze unstructured patient data and deliver intelligent responses.
- Developed and deployed scalable Python-based APIs with FastAPI, incorporating ML models and data preprocessing pipelines for real-time assistance.
- Conducted data preprocessing and transformation workflows to ensure clean, structured inputs for training and inference pipelines.

Business Insights Dashboard – Superstore Dataset

- Designed a 4-page interactive dashboard to uncover trends in sales, profit, and product performance, leveraged SQL to extract monthly KPIs and regional insights; visualized findings using Power BI
- Interpreted data to craft business insights and trends, demonstrating strong analytical thinking and reporting skills.

CERTIFICATIONS

- Data Analytics job simulation
- Real time signal processing
- Data science program

Deloitte

Indian Institute of Technology Palakkad
