

NIKHIL TERATIPALLI

Data Analyst

Location: TX, USA | Mobile: +1(940) 852 9717 | Email: nikhilkumar.work45@gmail.com | [LinkedIn](#)

DATA VISUALIZATION | BUSINESS INTELLIGENCE | DATA MANAGEMENT | PREDICTIVE MODELING

■ PROFILE SUMMARY

Results-driven Data Analyst with **5+ years** of experience in delivering actionable insights across **healthcare and financial** domains. Proven expertise in **SQL, Python, Power BI, and Tableau** to drive **data-informed strategies, automate workflows**, and support enterprise reporting needs. Adept at building predictive models, streamlining ETL pipelines, and visualizing KPIs that guide executive decisions. Skilled in improving operational efficiency, data quality, and regulatory compliance through collaborative cross-functional engagements. Passionate about transforming complex data into meaningful, business-impacting intelligence in fast-paced, data-centric environments.

Functional Skills: SQL Data Extraction & Query Optimization | ETL Pipeline Development | Dashboard Development | Predictive Analytics | Data Cleaning & Preprocessing | KPI Tracking | Performance Reporting | Statistical Analysis | A/B Testing | Healthcare Claims & Risk Analytics | Data Modeling | Data Warehousing | Root Cause & Trend Analysis | Data Quality Auditing & Validation | Cross-Functional Collaboration

Soft Skills: Attention to detail | Analytical Problem-Solving | Problem-Solving | Adaptability

■ IT SKILLS

Data Analytics & Programming	Python, R, SAS
Data Visualization & Reporting	Power BI, Tableau, Excel (Advanced)
Database Management & Querying	SQL (T-SQL / PL/SQL)
Data Engineering & Integration	SQL-based ETL scripting, Alteryx workflows for claims integration
Data Governance, Quality & Compliance	Alteryx, Git
Collaboration & Documentation	JIRA, Confluence, MS Teams, SharePoint, Outlook

■ PROFESSIONAL EXPERIENCE

Data Analyst | UnitedHealth Group – TX

Jun 2023 – Present

Key Deliverables:

- Developed **15+** interactive Power BI dashboards to track KPIs, improving decision-making speed by **35%** across cross-functional healthcare units.
- Build and validate scalable data models for performance analytics, ensuring **99.5%** data accuracy.
- Automated SQL-based ETL workflows, reducing manual data processing time by **42%** and improving reporting efficiency across multiple systems.
- Drove member satisfaction analytics using **R and Excel**, identifying key churn indicators and boosting member retention rate by **18%** in two quarters.
- Built and validated scalable data models for performance analytics, ensuring **99.5%** data accuracy and reducing quarterly audit errors by **30%**.

~ Notable Projects ~

- Claim Optimization Initiative** – Analyzed historical claims data using **Python, SQL, and Tableau**, identifying **\$1.2M** in billing discrepancies and reducing future claim rejections by **31%**.
- Care Utilization Insight Hub**: Designed a predictive analytics dashboard using **Power BI and Python** to forecast utilization trends, reducing overuse by **22%** in 6 months.
- Risk Adjustment Data Quality Framework**: Established a data integrity protocol in **SQL and Alteryx**, increasing claim accuracy for **250K+** records and compliance reporting by **40%**.

Data Analyst | Citibank – IN

Jul 2019 – Jul 2022

Key Deliverables:

- Identified data inconsistencies using **SQL and Excel**, enabling policy revisions that reduced compliance breaches by **28%** across three product lines.
- Developed automated dashboards in **Tableau** to monitor transaction anomalies, improving fraud detection efficiency by **37%** in high-risk segments.
- Conducted root cause analysis of regulatory breaches using Python, influencing a **21%** improvement in audit control frameworks.
- Partnered with risk and compliance teams to interpret consumer data trends, shaping revised policies that aligned with RBI's digital lending guidelines.
- Improved portfolio segmentation models using advanced Excel analytics, boosting campaign response rates by **32%** and customer targeting precision.

~ Notable Projects ~

- Regulatory Data Integrity Dashboard**: Built Tableau dashboards to monitor policy compliance KPIs, increasing transparency and audit-readiness across 5 internal verticals.
- Credit Risk Anomaly Detection**: Applied Python and SAS to uncover irregular lending patterns, resulting in a **19%** reduction in high-risk credit approvals.

■ EDUCATION & CERTIFICATION

M.Sc. in Information System and Business Analytics from Park University, MO

B.Tech. in Computer Science and Engineering from JNTUH, Hyderabad, IN

Certifications:

- Microsoft Certified: Power BI Data Analyst Associate
- Google Advanced Data Analytics Professional Certificate (via Coursera)
- SQL for Data Science (offered by University of California, Davis – Coursera)
