EDUCATION

Master of Science in Engineering Management

St Cloud State University | Plymouth, MN, USA

Aug 2022 – May 2024

GPA – 3.66/4.0

Bachelor of Technology in Electronics and Communication

SR Engineering collage | Warangal, India

Jul 2018 – May 2022

GPA – 3.4/4.0

TECHNICAL SKILLS

Programming/Querying Languages: Python, Java, JavaScript, SOQL, PostgreSQL

Web Development: HTML, CSS, React.js, NodeJS, Express.js, Spring Boot, REST APIs, Bootstrap

Frameworks and Libraries: Flask, Pandas, NumPy, Matplotlib, Scikit learn, Django, JQuery

Analytical Techniques: Data Mining, Data Pre-processing, Regression Analysis, Sentiment Analysis

Process: Agile Methodology, Scrum, DevOps

Cloud: Amazon Web Services (IAM, EC2, S3, RDS, Cloud Watch)

Developer Tools: Git, Jenkins, JIRA, Bitbucket, CI/CD, CRM, Postman, Docker, Tableau

PROFESSIONAL EXPERIENCE

Software Developer | TechAspect Solutions Private Limited (TA Digital), Hyderabad, India

Aug 2021– Jun2022

Tech Stack: Java, Java Script, HTML, CSS, SQL, GIT, AngularJS, JQuery and AEM.

- Developed and authored components for the '**Sophia.org**' project using **Adobe Experience Manager (AEM)** and **RESTful APIs**, enhancing functionality and data interaction based on client specifications.
- Led the design and development of a fully responsive website using **AngularJS**, **Sass**, **Bootstrap**, and **Node.js** to improve scalability and performance across multiple devices.
- Collaborated closely with design teams to implement **UI features**, improving project outcomes by 20% through the use of **Agile methodology**.
- Increased user engagement by 40% through **dynamic content** updates and optimized **server-client interactions**.
- Directed a 3-person team and implemented **advanced caching** strategies to **reduce API requests**, optimizing system performance and achieving a 30% improvement in responsiveness for the 'Sophia.org' project.

Trainee Software Engineer | TechAspect Solutions Private Limited (TA Digital), Hyderabad, India

Jul 2021 - Aug 2021

Tech Stack: Java, JavaScript, Spring Boot, Angular, RESTful API, HTML, and CSS.

- Gained practical experience with **HTML5**, applying its latest features to structure web content in a semantic and accessible manner.
- Developed proficiency in **Angular.js**, employing its capabilities to build interactive and dynamic user interfaces that enhance the overall user experience.
- Collaborated with senior engineers to contribute code, debug issues, and implement features, accelerating the team's project progress.
- Gained foundational experience as a QA Trainee, developing a solid understanding of quality assurance practices, test methodologies, and bug tracking systems.

ACADEMIC PROJECTS

Compliant Management System, Coursework Project

Jan 2023- May 2023

- Created an intuitive user interface for customers and staff to submit, track, and manage complaints seamlessly.
- Developed responsive front-end components using HTML, CSS, and JavaScript to facilitate complaint submission and status tracking.
- Engineered the back-end system in PHP to handle complaint submissions, assign cases to relevant teams, and maintain a comprehensive complaint database.
- Designed and optimized MySQL database schema to store complaint details, user information, and case history.

Student Info System Application, Coursework Project

Jan 2022-Mar 2022

- Designed and implemented a secure Web Application for efficient management of student information, featuring login, data retrieval, database connection, account registration, and validation functionalities leading to a 30 % reduction in workload.
- Developed proficiency in frontend development, backend programming, and database management through hands-on application.

ECommerce Website, Trainee Project, TA Digital

Jul 2021- Aug 2021

- Developed responsive layouts using Flexbox and CSS Grid, ensuring consistent designs across various screen sizes.
- Leveraged React.js to create dynamic and interactive components, including product listings, shopping carts, and checkout processes.
- Implemented advanced CSS animations and transitions to enhance user engagement and provide smooth interactions throughout the shopping journey.
