EDUCATION

University of California, Riverside

Bachelor of Science in Computer Science; GPA: 3.6

Riverside, CA

Sept. 2022 – Mar. 2026

EXPERIENCE

Software Engineer Intern

DivergeIT

Jun. 2025 – Present

Torrance, CA

- Boosted pipeline reliability by 30% by engineering Azure Functions (timer/HTTP) with Flask backends and SQLite integration
- Designed a multi-tenant user dashboard with real-time analytics for 52 tenants/20,000+ users, cutting IT workload by 40%
- Reduced troubleshooting time by 25% via automated API testing/debugging with Postman
- Streamlined workflow with Cursor, Ruff, and Prettier, improving team productivity by 20%

Software Engineer Intern

Springer Capital

Mar. 2025 – Jun. 2025

Remote (Chicago, IL)

- Developed scalable Django REST APIs with PostgreSQL, improving data efficiency by 25%
- Enhanced real-time analytics speed by 30% via modular serializers, views, and URL routing
- Implemented automated API testing/documentation with Swagger/OpenAPI, reducing QA time by 30%
- Deployed React dashboards for 100+ employees and accelerated backend deployment by 20% through CI/CD

Frontend Engineer Intern

Pride Olympics

Jan. 2025 – Mar. 2025

Remote (Chicago, IL)

- Led a 4-person frontend team to build a React event platform, boosting engagement by 40%
- Optimized SEO/site performance, reducing page load times by 30% and increasing traffic by 25%
- Architected reusable components, cutting future development time by 50%
- Integrated real-time APIs supporting 5,000+ users with 99.9% uptime

PROJECTS

TeamSync (Full-Stack App) | Django, React, PostgreSQL, JWT, Docker, CI/CD

Feb. 2025 – Present

- Built team management platform, reducing manual tracking by 50%
- Secured access for 20+ accounts with JWT auth and role-based access control
- Enhanced frontend integration via Django REST Framework & Swagger
- Automated tests and deployments with Docker and CI/CD, accelerating releases by 40%

PulseAI (NLP + Analytics) | Python, NLTK, scikit-learn, pandas, Seaborn

Mar. 2025 – Present

- Built sentiment classification pipeline with 90%+ accuracy using VADER
- Visualized engagement risk patterns showing 20% higher negativity in at-risk departments
- Trained regression model to forecast sentiment trends with low prediction error

Eventify (Flask API) | Flask, JWT, Swagger, Docker

Jan. 2025 – Present

- Engineered modular Flask backend with routing/config, cutting onboarding time by 30%
- Protected user data for 40+ accounts via JWT with token expiration
- Documented and tested APIs using Swagger, reducing integration debugging by 25%

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL (Postgres, SQLite), JavaScript (ES6+), TypeScript, HTML/CSS

Frameworks: Django, Flask, React, Next.js, FastAPI, Node.js, Vue.js

Cloud/DevOps: Azure, GCP, Docker, GitHub Actions, TravisCI, CI/CD

Data/AI: pandas, NumPy, NLTK, Seaborn, Matplotlib, LangChain, OpenAI API

Tools: Git, Postman, VS Code, PyCharm, IntelliJ, Cursor, Copilot
