

# Python Developer Resume

Name: Nikhil Sagar Suguru

Email: Nikhilsagar2545@gmail.com | Phone: 3148285899 | Location: Saint Louis, Missouri 63146

## Professional Summary

Results-driven Python Developer with 4 years of experience in designing, developing, and maintaining innovative software applications. Expert in leveraging Python with frameworks such as Django, Flask, and FastAPI to build scalable web applications and RESTful APIs. Proficient in relational and NoSQL databases including MySQL, PostgreSQL, and MongoDB with a strong focus on query optimization and performance tuning. Experienced in CI/CD pipeline automation using Jenkins and Docker, cloud deployment on AWS (EC2, S3, Lambda), and Agile/Scrum methodologies. Skilled at collaborating with cross-functional teams, leading technical discussions, and delivering end-to-end solutions tailored to client requirements. Strong background in data engineering, ETL workflows, and analytics pipelines using Pandas and NumPy. Adept at debugging, testing, and ensuring software meets high standards of security, performance, and compliance with industry best practices.

## Technical Skills

- Languages: Python, SQL, JavaScript
- Frameworks: Django, Flask, FastAPI
- Databases: MySQL, PostgreSQL, MongoDB
- Tools: Git, Docker, Jenkins, Pandas, NumPy, REST APIs
- Cloud Platforms: AWS (EC2, S3, Lambda)
- Other: Agile/Scrum, Test-Driven Development (TDD), Unit Testing, API Integrations

## Professional Experience

### Client 1 – Verso Technologies

Software Developer (Python) | May 2020 – June 2023

- Developed and maintained scalable web applications using Django and RESTful APIs, improving system efficiency and user experience.
- Designed and optimized SQL queries and stored procedures, reducing response times by 30%.
- Automated ETL processes using Python and Pandas, processing millions of records daily for analytics dashboards.
- Integrated third-party APIs for payment processing, authentication, and external data sources.
- Created unit and integration tests to improve code quality and achieve 90%+ coverage.
- Worked closely with QA and business analysts to identify gaps and deliver enhancements.
- Implemented logging, monitoring, and debugging features, reducing production incidents by 25%.

### Client 2 – AT&T

Python Developer | Feb 2023 – April 2025

- Built microservices with Flask and Docker, enabling modular architecture and faster deployments.
- Implemented secure authentication using JWT and role-based access control (RBAC).
- Developed ETL workflows integrating APIs and large datasets, reducing manual data preparation efforts by 40%.
- Automated CI/CD pipelines with Jenkins and Docker, streamlining deployments across multiple environments.
- Collaborated with DevOps to migrate applications to AWS, leveraging EC2, S3, and Lambda for scalability.
- Led sprint planning and backlog grooming sessions, contributing to Agile project delivery.
- Conducted code reviews and mentored junior developers to ensure adherence to coding standards and best practices.

## Education

- Master's in Information Technology Management
- Indiana Wesleyan University, 2025
