

NIKHIL SAI DANDAMUDI

Orlando, FL | (317) 717-2354 | dnsai25@gmail.com | linkedin.com/in/nikhilsai2511/

PROFILE

- Software Developer with **1.5 years of professional experience** in building scalable web applications, backend systems, and data-driven solutions using **Java, Python, React.js, Node.js, and Spring Boot**.
- Proficient in **end-to-end software development lifecycle (SDLC)** including requirements analysis, system design, development, testing, deployment, and maintenance in **Agile** environments.
- Experienced in developing **RESTful APIs**, integrating **user authentication (JWT)**, and building responsive UIs for multi-role applications using **React.js, Node.js, and Express.js**.
- Hands-on expertise in **backend frameworks** such as **Spring Boot, Hibernate, and JEE**, with strong understanding of relational and NoSQL databases including **MySQL, MongoDB, and PostgreSQL**.
- Adept in **cloud deployment** using **AWS services** and managing CI/CD workflows with tools like **Docker, Jenkins, Maven, and Kubernetes**.
- Applied **data analysis and visualization skills** using **Python** and **Tableau** to process complex datasets and deliver predictive insights on government loan data exceeding **\$3 billion** in value.
- Implemented **functional, regression, and integration testing**, improving test coverage by **35%** and reducing bug-related delays across production cycles.
- Strong version control practices using **Git**, and effective team collaboration through **Jira, Slack**, and participation in peer code reviews to maintain clean architecture and coding standards.
- Familiar with **DevOps principles, SRE concepts**, and deploying production-ready apps with high availability and performance.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C#, C, SQL, Bash

Web Technologies: HTML, CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, YAML, JSON, RESTful APIs

Backend Frameworks & Libraries: Spring, Spring Boot, Hibernate

Databases: MySQL, MongoDB, PostgreSQL, SQLite, PL/SQL

Cloud Platforms: AWS, Azure

DevOps & Automation Tools: Maven, Docker, Jenkins, Kubernetes, CI/CD pipelines

Testing & QA: Selenium, Manual Testing, Functional, Integration, System, Regression Testing

Data & Visualization: Tableau, Jupyter Notebook

Development Tools: Eclipse, IntelliJ IDEA, Visual Studio Code, Workbench

Project & Workflow Tools: Jira, Slack

Operating Systems: Linux, Ubuntu, Windows, Unix

Methodologies & Concepts: Agile, Site Reliability Engineering (SRE) Concepts

PROFESSIONAL EXPERIENCE

Software Engineer Nov 2024 – Till Date Frontier Science Foundation Amherst, NY

- Contributed to the **end-to-end software development lifecycle** for clinical trial applications, enhancing system reliability and reducing bug-related delays by **25%** through proactive testing and debugging.
- Led and participated in **code reviews**, promoting clean architecture and improving code maintainability across the team by **30%**, while mentoring junior developers with constructive feedback.
- Designed and maintained internal tools using **Python, Java/JEE, Spring MVC, Spring Boot, SQL, and ColdFusion**, boosting internal process efficiency by **20%**.
- Utilized **GIT** for version control, enabling seamless collaboration and reducing merge conflicts by **40%** in an **Agile** development environment.
- Executed comprehensive **manual, functional, and regression testing**, identifying and resolving issues early, which improved overall test coverage by **35%**.
- Collaborated with **cross-functional teams** including QA, product managers, and researchers to deliver scalable, **user-friendly software solutions**, aligning technical output with evolving **business and research goals**.

Full Stack Developer Jul 2024 – Nov 2024 Hoosier Community Network Bloomington, IN

- Designed and built a full-featured web platform using **React.js, Node.js, and MongoDB**, improving overall system performance and responsiveness by **40%**.

- Developed and integrated a custom **data visualization dashboard**, enabling Indiana state clients to access **real-time**, sector-specific insights with enhanced clarity and usability.
- Engineered dynamic filtering and **sector-based data categorization**, increasing user efficiency in data retrieval and analysis by **35%** across diverse user groups.
- Deployed the solution on **AWS (EC2, S3)** to ensure **scalability, high availability**, and seamless access across both **staging and production environments**, reducing downtime by **20%**.
- Streamlined UI/UX for improved **navigation and accessibility**, leading to a **30%** boost in user engagement and longer session durations.

Software Developer Jan 2022 – Aug 2022 DarwinBox Hyderabad, India

- Built a robust **Library Administration System** using **React.js, Node.js, Express.js, JavaScript**, and **MySQL**, efficiently managing over **10,000** book records with secure **user authentication** and streamlined CRUD operations.
- Designed and optimized **MySQL** databases to support complex queries, reducing average query response time by **45%**, ensuring faster data retrieval under high load.
- Collaborated using **Git** with clean branching and merging strategies, maintaining high **code quality** and reducing integration issues by **30%** in team workflows.
- Managed **Agile sprint cycles** via **Jira**, enhancing task tracking accuracy and accelerating delivery timelines by **20%** through better visibility and coordination.

PROJECTS

SnapMart Retail Platform

- Developed a robust **e-commerce backend application** using **Spring Boot, Java**, and **MySQL**, focusing on **user onboarding, product management, order processing**, and **payment functionalities**.
- Implemented **RESTful APIs** for **customer registration, product creation, order placement**, and **payment processing**, utilizing **Spring Web** and **Spring Data JPA** for seamless integration and **data management**.
- Utilized **Maven** for **project management** and **dependency handling**, maintaining a **streamlined development process**.

Real Estate Marketplace application

- Designed a **Real Estate marketplace application** utilizing **React.js, Express.js, Node.js**, and **MySQL**, focusing on developing a comprehensive **user interface** for **2 distinct user groups (buyers and sellers)**. Achieved **100% accuracy** in implementing **user-focused features** like **advanced search filters, user authentication (JWT)**, and **geo-location-based services**.
- Integrated **AWS services** such as **EC2, S3, SES**, and **IAM**, and incorporated **Google Maps** and **Places API** for enhanced functionality like **map-based property listings** and location-based suggestions.
- Conducted **functional, usability**, and **compatibility testing** to ensure a **seamless user experience** across multiple devices and platforms.

Small Business Loan Dynamics

- Spearheaded an **in-depth analysis** of the **Small Business Administration's 7(a) loan program** over **10 years**, utilizing **Python** and **Tableau** for **data cleaning** and **visualization**.
- Developed **interactive dashboards** that tracked over **\$3 billion** in **loan approvals**, offering stakeholders **predictive insights** and detailed **historical trends**.
- Processed and interpreted **complex data sets** to reveal **monthly** and **annual trends** in **loan approvals**, enabling data-driven decision-making.

EDUCATION

Master of Science in Computer Science Indiana University, Bloomington Luddy School of Informatics, Computing, and Engineering.	May 2024 Bloomington, IN
Bachelor of Engineering in Computer Science and Engineering Vasavi College Of Engineering	Jun 2022 Hyderabad, India
