Professional Summary

Data Engineer with 4+ years of experience designing and implementing scalable data pipelines and analytical solutions across cloud platforms. Expertise in building ETL/ELT pipelines, optimizing data architectures, and developing streaming solutions that ensure data accuracy and security. Proven ability to enhance efficiency by streamlining workflows and reducing processing time by up to 35%.

Technical Skills

- **Cloud Platforms:** Azure (ADF, Databricks, Synapse, Blob, Logic Apps), AWS (EMR, S3, Redshift, Glue, Lambda)
- **Big Data & ETL Tools:** Spark, Hive, Kafka, NiFi, HDFS, Sqoop, Oozie, Flume, Airflow, SSIS, Informatica
- **Programming Languages:** Python, Scala, Java, SQL, Shell, Spark SQL, HiveQL
- **Databases:** Snowflake, MySQL, MSSQL, Cassandra, MongoDB, Cosmos DB
- **BI & Reporting:** Power BI, Tableau, QlikView
- **DevOps & CI/CD Other Tools:** Jenkins, Git, Azure DevOps, Terraform, CloudFormation, Delta Lake, Delta Live Tables, Jupiter, Hadoop, Matplotlib, Sklearn, Pandas

Professional Experience

Prudential Financial

Jan 2024 - Present

Data Engineer

Newark, NJ

- Developed scalable ETL/ELT pipelines using Azure Data Factory and Databricks to support business objectives while ensuring accurate data migration and transformation.
- Enhanced pipeline performance by 35% through Delta Lake schema evolution and Auto Loader optimization, aligning with data preparation and requirement analysis best practices.
- Integrated on-premises and cloud data sources (MySQL, Cassandra, Azure SQL DB) to build effective ingestion flows into Snowflake, ensuring data service infrastructure support for business applications.
- Engineered real-time streaming solutions using Kafka, NiFi, and Spark Streaming to deliver timely insights and scalable data solutions.
- Designed and optimized Spark applications in Scala/PySpark with Spark SQL to facilitate efficient batch transformations for robust data analysis.
- Delivered reliable and scalable data models in Hive, HBase, and Snowflake, supporting BI/reporting use cases and effective data service infrastructure.
- Implemented CI/CD pipelines with Azure DevOps, integrating automated testing and monitoring to maintain the accuracy and security of data solutions.
- Visualized key performance metrics using Tableau and Python (Pandas, Seaborn, Matplotlib), supporting data-driven decision making.

Max Health Care

Nov 2021 - Mar 2023

Data Engineer

Hyderabad, India

- Designed and implemented data lakes and AWS-native ETL pipelines to meet business objectives while reducing data delivery SLAs by 40% and aligning with data requirement analysis.
- Developed and orchestrated AWS Glue, Lambda, and Step Functions for real-time ingestion and data transformation, ensuring scalable and secure data service infrastructure.
- Migrated over 10TB of on-premises data into AWS Redshift using Terraform and CloudFormation, demonstrating effective data migration strategies.
- Constructed Spark pipelines on EMR to process large datasets from S3, MongoDB, and DynamoDB, reinforcing robust data preparation processes.
- Created comprehensive monitoring dashboards with CloudWatch and Athena to improve data availability to 99.9% and support proactive maintenance.
- Optimized query performance by 30% using Redshift Spectrum and columnar storage enhancements, ensuring scalable solutions.
- Automated JSON schema mapping and dynamic table creation through Python-based workflows, contributing to efficient data transformation and preparation.

Tech Mahindra

Oct 2020 - Oct 2021

Data Engineer

Hyderabad, India

- Created streaming data pipelines using Kinesis and Spark Streaming for IoT telemetry analytics.
- Built Airflow workflows to monitor ML model training on SageMaker, improving training efficiency by 25%.
- Automated ETL jobs using Flume, Sqoop, and MapReduce for Hadoop data lakes.
- Reduced Redshift query costs through compression, partitioning, and workload management.
- Collaborated with BI teams to deliver Tableau dashboards using real-time Athena datasets.

- Deployed Kibana dashboards from Elasticsearch logs for anomaly detection and alerting.

Education

Lewis University

Master of Science, Business Analytics

Mar 2023 - Dec 2024

Vasireddy Venkatadri Institute of Technology

Bachelor of Technology, Information Technology

Jun 2016 - May 2019
