

Nikhila Bollam

Data Analyst

+1 (561) 887-9934 | bollamnikhila0608@gmail.com | FL, USA | LinkedIn

SUMMARY

Data Analyst with 3+ years of experience in driving data-driven decision-making and delivering actionable business insights. Proficient in **SQL, Python, Tableau, Power BI, and machine learning techniques** to analyze large datasets, build predictive models, and optimize business processes. Skilled in **data visualization, statistical analysis, feature engineering, and developing automated reporting solutions** to improve operational efficiency. Adept at collaborating with cross-functional teams, translating business requirements into analytical solutions, and **communicating complex insights** to stakeholders to support strategic decision-making.

SKILLS

Data Analysis & Statistics: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, Correlation & Regression Analysis, Feature Engineering

Data Visualization & Reporting: Tableau, Power BI, Interactive Dashboards, KPI Reporting, Trend Analysis, Business Insights Presentation

Programming & Scripting: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (Queries, Joins, Aggregations, Subqueries), Data Manipulation & Transformation

Machine Learning & Predictive Modeling: Logistic Regression, Decision Trees, Clustering (K-Means), Classification Models, Predictive Analytics, Model Evaluation (Accuracy, Precision, Recall, F1-Score)

Big Data & Processing Tools: Apache Spark, Data Pipeline Management, Large Dataset Processing, Performance Optimization

Business Analysis & Strategy: Requirement Gathering, Stakeholder Collaboration, Data-Driven Decision Making, Business Requirement Analysis, Process Optimization

Automation & Workflow: Automated Reports, Real-Time Data Processing, Alerts & Monitoring Systems, Model Deployment Support

Soft & Analytical Skills: Problem Solving, Critical Thinking, Analytical Reasoning, Communication of Insights, Data Storytelling, Attention to Detail

EXPERIENCE

Data Analyst | Liberty Mutual Insurance, USA

Jan 2025 – Present

- Spearheaded advanced **data analysis** to identify complex fraud patterns in insurance claims, leveraging **predictive analytics** and **machine learning techniques** to improve detection accuracy and reduce false positives by 30%, while enhancing operational efficiency.
- Designed and implemented **automated workflows** for real-time claim validation, enabling proactive fraud detection and optimizing the claims review process through **analytical modeling** and **feature engineering**.
- Developed **interactive dashboards** and **reports** using **Tableau** and **Power BI** to **visualize trends**, monitor **fraud indicators**, and communicate actionable insights to stakeholders, improving decision-making effectiveness by 25%.
- Conducted **exploratory data analysis (EDA)** and **performance evaluations of predictive models**, applying **statistical analysis** and **data visualization** to refine model accuracy and strengthen risk mitigation strategies.
- Collaborated with cross-functional teams to integrate **machine learning models** into production systems, ensuring seamless monitoring and continuous improvement of fraud detection, while applying **SQL, Python, Apache Spark, and TensorFlow** to drive project success.

Data Analyst | Mphasis Limited, India

Jun 2020 – Jul 2023

- Conducted comprehensive **data analysis** to segment customers and identify high-risk loan profiles, applying **predictive analytics** and **clustering techniques** to strengthen decision-making, improve engagement, and support business strategies using **SQL, Python, and data visualization**.
- Designed **interactive dashboards** and **automated reports** to communicate customer behavior insights and loan default risks, enabling stakeholders to optimize marketing campaigns and resource allocation, leveraging **Tableau** and **Power BI**.
- Implemented **feature engineering** and **exploratory data analysis (EDA)** to uncover patterns in customer transactions and loan histories, improving model accuracy and enabling proactive risk mitigation strategies in financial operations.
- Collaborated with cross-functional teams to define requirements, translate business needs into **analytical models**, and ensure alignment of data outputs with organizational goals, applying **stakeholder management** and **documentation** skills.
- Increased marketing effectiveness by 50% through targeted **customer segmentation** and **predictive insights**, enabling business teams to launch personalized campaigns and improve customer retention using **analytical modeling** and **visualization techniques**.
- Reduced potential loan default risks by 50% by developing and deploying **predictive models** integrated with business workflows, enhancing operational efficiency and decision-making through continuous monitoring and **analytics-driven recommendations**.
- Monitored and refined **predictive models**, analyzed trends in customer and loan data, and implemented recommendations to optimize business outcomes, applying **machine learning, statistical analysis, and advanced visualization** to support data-driven decision-making.

EDUCATION

Master’s in computer science , Florida Atlantic University, Boca Raton, FL, USA

Aug 2023 – May 2025
