EDUCATION

Indiana University (3.88/4)

Indianapolis, United States

Masters of Science in Applied Data Science

Jan 2023 - Dec 2024

EXPERIENCE

Data Analyst

Jul 2024 - Present

Konnex AI

Bloomington, IN

- Developed Power BI dashboards to analyze customer demographics and identify recurring lake algae/disease patterns, enabling targeted marketing strategies for high-impact treatment products.
- Leveraged DAX Time Intelligence Functions to visualize seasonal sales trends, highlighting a 15% increase in product purchases during peak algae seasons.
- Designed Snowflake Schema ERD to model transactional and operational data, structuring dimension tables for customer profiles, product catalogs, and treatment histories
- Engineered Excel-based metadata templates using advanced functions to standardize Konnex's data documentation.

Graduate Research Assistant

Feb 2023 - Dec 2024

Crisis Technology Innovation Lab

Bloomington, IN

FRST Challenge

- Built real-time data infrastructure using AWS Lambda and S3 to process and store indoor tracking data from first responders, enabling situational awareness.
- Created geospatial dashboards using Python (Pandas, Matplotlib, Folium) to clean, model, and visualize first responder tracking data (e.g., response times, team performance), enabling judges to make data-driven decisions.

CRANE Naval Base

- Identified critical response gaps by analyzing 5+ years of fire incident data in Tableau, revealing seasonal trends and high risk zones .
- Designed ArcGIS network analysis models to optimize fire station coverage, reducing response times for 15+ previously unreachable gray areas.
- Presented complex technical findings into executive briefings, utilizing Tableau dashboards and ArcGIS visuals to facilitate data-driven decisions on route optimizations

Project Engineer

Sep 2020 - Dec 2022

Wipro Technologies LTD

Bangalore, India

- Engineered 18+ Dell Boomi ETL interfaces for Philips Healthcare, transforming XML/JSON/CSV data between Salesforce and SAP/Windchill/Azure DB, enabling real-time synchronization of sales orders and billing cycles.
- Migrated 500K+ equipment records from Teradata to Azure SQL DB, optimizing SQL pipelines to slash data extraction time with zero data loss.
- Redesigned inefficient SQL queries for equipment workflows, implementing stored procedures in Azure DB that accelerated data retrieval by 3.8x, directly improving system responsiveness.
- Validated 20+ APIs using Postman for critical data flows (quote-to-contract, seasonal discounts), ensuring 100% payload accuracy and reducing post-deployment defects by 30%.
- Acted as integration lead coordinating with 5+ cross-functional teams to prioritize sprint tasks, resolve dependencies, and accelerate Agile deployment timelines.

PROJECTS

Optimizing Target Store Locations in Indiana | ArcGIS Business Analyst, Excel, PowerBI

- Leveraged Power BI and ArcGIS to analyze retail demand metrics and demographic data, identifying high-potential sites in IN, and delivering data-driven recommendations focused on KPIs like foot traffic and customer spend.

Online Education Platform Database Design — phpMyAdmin, MS Access, MSSQL

- Designed a scalable database with normalized schemas, improving query performance by 40% and ensuring data quality through validation rules.

TECHNICAL SKILLS

Data Analysis: Power BI, SQL, Python, Azure Data Fctory, Azure Synapse Analytics, R, Tableau, Excel, ArcGIS

Databases: MSSQL, MS Access, MongoDB, Database design methods, NoSQL

Cloud & Big Data Platforms: AWS, PySpark, Hadoop

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- META Data Analyst Professional Certificate
